Scale and the Incas Andrew James Hamilton, 2018-06-05 A groundbreaking work on how the topic of scale provides an entirely new understanding of Inca material culture Although questions of form and style are fundamental to art history the issue of scale has been surprisingly neglected Yet scale and scaled relationships are essential to the visual cultures of many societies from around the world especially in the Andes In *Scale and the Incas* Andrew Hamilton presents a groundbreaking theoretical framework for analyzing scale and then applies this approach to Inca art architecture and belief systems The Incas were one of humanity's great civilizations but their lack of a written language has prevented widespread appreciation of their sophisticated intellectual tradition Expansive in scope this book examines many famous works of Inca art including Machu Picchu and the Dumbarton Oaks tunic more enigmatic artifacts like the Sayhuite Stone and Capacocha offerings and a range of relatively unknown objects in diverse media including fiber wood feathers stone and metalwork Ultimately Hamilton demonstrates how the Incas used scale as an effective mode of expression in their vast multilingual and multiethnic empire Lavishly illustrated with stunning color plates created by the author the book's pages depict artifacts alongside scale markers and silhouettes of hands and bodies allowing readers to gauge scale in multiple ways The pioneering visual and theoretical arguments of *Scale and the Incas* not only rewrite understandings of Inca art but also provide a benchmark for future studies of scale in art from other cultures **Faking the Ancient Andes** Karen O Bruhns, Nancy L Kelker, 2016-09-16 Nasca pots Quimbaya figurines Moche porn figures stone shamans Fakes and forgeries run rampant in the Andean art collections of international museums and private individuals Authors Karen Bruhns and Nancy Kelker examine the phenomenon in this eye opening volume They discuss the most commonly forged classes and styles of artifacts many of which were being duplicated as early as the 19th century More important they describe the system whereby these objects get made purchased authenticated and placed in major museums as well as the complicity of forgers dealers curators and collectors in this system Unique to this volume are biographies of several of the forgers who describe their craft and how they are able to effectively fool connoisseurs and specialists This is an important accessible introduction to pre Columbian art fraud for archaeologists art historians and museum professionals alike A parallel volume by the same authors discusses fakes in Mesoamerican archaeology "And in Length of Days Understanding" (Job 12:12) Erez Ben-Yosef, Ian W. N. Jones, 2023-08-01 This two volume book presents cutting edge archaeological research primarily as practiced in the Eastern Mediterranean region These volumes key foci are inspired by the work of Thomas E Levy Volume 1 provides an in depth look at new archaeological

research in the southern Levant primarily in modern Israel and Jordan inspired by Levy's commitment to understanding social, political and economic processes in a long term or deep time perspective. Volume 2 focuses on new research in several key areas of 21st century anthropological archaeology and archaeological science. Volume 1 is organized around two major themes: 1 the later prehistory of the southern Levant or the Neolithic Chalcolithic and Bronze Age and 2 new research in biblical archaeology or the historical archaeology of the Iron Age. Each section contains a combination of new perspectives on key debates and studies introducing new research questions and directions. Volume 2 is organized around five major themes: 1 the archaeology of the Faynan copper ore district of southern Jordan, a key region for archaeometallurgical research in West Asia where Levy conducted field research for over a decade; 2 new research in archaeometallurgy beyond the Faynan region; 3 marine and maritime archaeology focusing on issues of trade and environmental change; 4 cyber archaeology, an important 21st century field Levy conceived as the marriage of archaeology, engineering, computer science and the natural sciences; and 5 key issues in anthropological archaeological theory. In addition to presenting the reader with an up to date view of research in each of these areas, the volume also has chapters exploring the connections between these themes, e.g. the maritime trade of metals and cyber digital archaeological approaches to metallurgy. The work contains contributions from both up and coming early career researchers and key established figures in their fields. This book is an essential reference for archaeologists and scholars in related disciplines working in the southern Levant and the Eastern Mediterranean.

The Colonial Andes, Elena Phipps, Johanna Hecht, Cristina Esteras Martín, Metropolitan Museum of Art (New York, N.Y.), 2004. The arrival of the Spanish in South America in 1532 permanently transformed the Andean cultural landscape. Within a generation, societies that had developed over thousands of years, including the great Inca Empire, had been irrevocably altered. The arts from the Spanish colonial period, those that drew on native traditions such as textiles, silver, woodwork and stonework, as well as painting, sculpture and other genres introduced by the Spanish, preserve an unspoken dialogue that developed between Andean and European modes of expression. This beautiful book presents silver objects, textiles and other masterpieces of colonial Andean culture. Essays discuss the artistry of this culture and explain how it has been recently reevaluated and celebrated for its vibrant energy reflecting the convergence of two essentially distinct cultural traditions. This book accompanies an exhibition at The Metropolitan Museum of Art, September 29 to December 12, 2004. Elena Phipps is conservator, Textile Conservation, and Johanna Hecht is associate curator, European Sculpture and Decorative Arts, at The Metropolitan Museum of Art.
