Houston, Space City USA Ray Viator,2019-02-13 On July 20 1969 humanity paused with attention locked to television

and radio broadcasts as the astronauts of the Apollo 11 mission dramatically touched down on the dusty face of the moon The first word from the lunar surface Houston Houston Space City USA is a visual celebration of the city's historic ties to the US human space program When President Kennedy declared We choose to go to the moon in this decade and do the other things not because they are easy but because they are hard he did so from the campus of Rice University More than half a century later Houston continues to serve as the nerve center of the American human space program Author and photographer Ray Viator a longtime Houstonian has lovingly captured the spirit of a city's devotion to space exploration from then to now Using striking photographs of the full moon as a visual motif of Houston's connection to spaceflight Viator also weaves together historic images to show how former cow pastures transformed into mission control Some connections are obvious the Houston Astros or the Houston Rockets Others are hidden in plain sight like the arm patches on the uniform of every Houston police officer that read Space City U S A Viator's lens captures this and more Houston Space City USA not only marks the important milestone of the first lunar landing but it also helps readers discover and rediscover a city's constellation of connections to one of humankind's greatest achievements The author's proceeds from the sale of this book will benefit Houston Public Media

The New Medical Astrology Mario Kertscher, 2025-02-25 The teaching of a New Medical Astrology is an attempt to bring medicine and astrology closer together again While medicine has continued to develop and gain new insights into the organs classical medical astrology has hardly developed at all in the last 2000 years since the doctrine that Aries begins with the head and Pisces ends with the feet After 40 years of thorough research the New Medical Astrology is now based on 12 vital organ systems within the head and torso which correspond to the 12 signs of the zodiac Unlike in Hippocrates time more than 2000

years ago the arms and legs do not play a major role in the new classification as they do not represent vital organs This work is a new connection between the psychological astrology human anatomy psychosomatics and eye diagnosis This textbook forms the basis for learning astrology New Medical Astrology and at the same time forms a bridge to the psychosomatic explanations of illnesses in relation to the individual zodiac signs The intention was to write a textbook in an easily understandable way and to avoid confusing foreign or technical terms that too difficult to understand This makes it equally suitable for learning teaching or just exploring for both young and old explorers of astrology
