Looking For Answers Conversations On Art And Science:

Looking for Answers Ernst Hans Gombrich, Didier Eribon, 1993 People know me as the author of *The Story of Art* who have never heard of me as a scholar But many of my colleagues have never read the book They may have read my papers on Poussin or Leonardo but not that It is a curious double life Sir Ernst Gombrich is one of the very few men able to lead such a double life as familiar to the general public as to academicians Recently the French intellectual Didier Eribon engaged in a series of probing conversations with Gombrich seeking to discover how his mind and attitudes had been formed during his early years in Vienna and how they developed after he emigrated to England in 1939 There Gombrich wrote *The Story of Art* his acclaimed introductory art survey and became director of the Warburg Institute in London The result of the dialogue between these two men is found in this fascinating and thought provoking volume Gombrich tells of reading examining pondering and talking to numerous historians psychologists artists and philosophers among them Erwin Panofsky Karl Popper Oskar Kokoschka and Konrad Lorenz about subjects ranging from art history to biology and zoology The reader observes one of our century's most acute minds as he informally brings together all the themes that have preoccupied him for over sixty years the meaning of paintings especially those of the Renaissance the relation between representational art and perception and the way in which our responses are conditioned by conventions history social pressures and changes of taste As undogmatic skeptical and wide ranging as ever Gombrich not only provides a brilliant account of his life's work but also makes us think anew about fundamental issues provoking as many questions as he answers *Psychology, Art, and Antifascism* Louis Rose, 2016-09-15 A vivid portrait of two remarkable twentieth century thinkers and their landmark collaboration on the use and abuse of caricature and propaganda in the modern world In 1934 Viennese art historian and psychoanalyst Ernst Kris invited his mentee E H Gombrich to collaborate on a project that had implications for psychology and neuroscience and foreshadowed their contributions to the Allied war effort Their subject caricature and its use and abuse in propaganda Their collaboration was a seminal early effort to integrate science the humanities and political awareness In this fascinating biographical and intellectual study Louis Rose explores the content of Kris and Gombrich's project and its legacy **Handbook of Material Culture** Christopher Y. Tilley, 2006-01-26 Provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human **A Dictionary of Cultural and Critical Theory** Michael Payne, Jessica Rae Barbera, 2013-05-06 Now thoroughly updated and revised this new edition of the highly acclaimed dictionary provides an authoritative and accessible guide to modern ideas in the broad interdisciplinary fields of cultural and critical theory Updated to feature over 40 new entries including pieces on Alain Badiou Ecocriticism Comparative Racialization Ordinary Language Philosophy and Criticism and Graphic Narrative Includes reflective broad ranging articles from leading theorists including Julia Kristeva Stanley

Cavell and Simon Critchley Features a fully updated bibliography Wide ranging content makes this an invaluable dictionary for students of a diverse range of disciplines

The Geometry of an Art Kirsti Andersen, 2008-11-23 Key Issues ver since the late 1970s when Pia Holdt a student of mine at the time and Jed Buchwald a colleague normally working in another field made E me aware of how fascinating the history of perspective constructions is I have wanted to know more My studies have resulted in the present book in which I am mainly concerned with describing how the understanding of the geometry behind perspective developed and how and to what extent new insights within the mathematical theory of perspective influenced the way the discipline was presented in textbooks In order to throw light on these aspects of the history of perspective I have chosen to focus upon a number of key questions that I have divided into two groups Questions Concerning the History of Geometrical Perspective How did geometrical constructions of perspective images emerge How were they understood mathematically How did the geometrical constructions give rise to a mathematical theory of perspective How did this theory evolve In connection with the last question it is natural to take up the following themes

Making Art History Elizabeth Mansfield, 2014-05-01 Making Art History is a collection of essays by contemporary scholars on the practice and theory of art history as it responds to institutions as diverse as art galleries and museums publishing houses and universities school boards and professional organizations political parties and multinational corporations The text is split into four thematic sections each of which begins with a short introduction from the editor the sections include Border Patrols addresses the artistic canon and its relationship to the ongoing war on terror globalization and the rise of the Belgian nationalist party The Subjects of Art History questions whether art and history are really what the discipline seeks to understand Instituting Art History concerns art history and its relation to the university and raises questions about the mission habits ethics and limits of university today Old Master New Institutions shows how art history and the museum respond to nationalism corporate management models and the culture wars

The postsocialist contemporary Octavian Esanu, 2021-11-23 The postsocialist contemporary joins a growing body of scholarship debating the definition and nature of contemporary art It comes to these debates from a historicist perspective taking as its point of departure one particular art programme initiated in Eastern Europe by the Hungarian American billionaire George Soros First implemented in Hungary the Soros Center for Contemporary Art SCCA expanded to another eighteen ex socialist countries throughout the 1990s Its mission was to build a western open society by means of art This book discusses how network managers and artists participated in the construction of this new social order by studying the programme s rise evolution impact and broader ideological and political consequences Rather than recounting a history it engages critically with contemporary art as the aesthetic paradigm of late capitalist market democracy

Creativity Rob Pope, 2005-04-15 Seeking throughout to bridge the gap between the creative and the critical and to span disciplinary boundaries this book offers a significant intervention in the theory of creativity and the practice of criticism

The Absolute Artist Catherine M. Soussloff, 1997 Analyzing the myth of the artist in western

culture this work considers the social construction of the artist from the 15th century to the present **Framing Russian Art** Oleg Tarasov, 2012-01-01 The notion of the frame in art can refer not only to a material frame bordering an image but also to a conceptual frame Both meanings are essential to how the work is perceived In *Framing Russian Art* art historian Oleg Tarasov investigates the role of the frame in its literal function of demarcating a work of art and in its conceptual function affecting the understanding of what is seen The first part of the book is dedicated to the framework of the Russian icon Here Tarasov explores the historical and cultural meanings of the icon's setting and of the iconostasis Tarasov's study then moves through Russian and European art from ancient times to the twentieth century including abstract art and Suprematism Along the way Tarasov pays special attention to the Russian baroque period and the famous nineteenth century Russian battle painter Vasily Vereshchagin This enlightening account of the cultural phenomenon of the frame and its ever changing functions will appeal to students and scholars of Russian art history
