Myth Of The North American City Continentalism Challenged:

The Myth of the North American City Michael Goldberg, John Mercer, 2011-11-01 The continuing tendency to continentalize Canadian issues has been particularly marked in the area of urban studies where United States based research findings methodologies and attitudes have held sway In this book Goldberg and Mercer demonstrate that the label North American City as widely used is inappropriate and misleading in discussion of the distinctive Canadian urban environment Examining such elements of the cultural context as mass values social and demographic structures the economy and political institutions they reveal salient differences between Canada and the United States One of the most important of the many contextual differences is the strong collective sense in Canada which accepts more public intervention in social and economic matters in contrast to the American commitment to individualism Canadians consequently expect a livable central city which is compact and well served by public transit and which has a fiscally sound local government To demonstrate these issues the discussion includes a detailed cross national empirical analysis of over 300 North American metropolitan areas along some three dozen dimensions including density transportation household change and structure income and fiscal disparities and economic structure Since much urban planning in Canada is based upon the continentalist assumption this volume should generate a reassessment of policy and encourage the development of a research base to suit the distinctiveness of the Canadian experience With growing pressures to take a North American view of Canadian policies it is vitally important that the differences delineated in this book are understood not just for their urban policy implications but for broader purposes as well

The Myth of the North American City Michael Arthur Goldberg, 1986 Global Port Cities in North America Boris Vormann, 2014-11-27 As the material anchors of globalization North America's global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public

America's Urban Future Ray Tomalty, Alan Mallach, 2015 In this book the authors examine U S policy in the light of the Canadian experience and use that experience as a starting point to generate specific policy recommendations Their recommendations are designed to help the U S further its urban revival build more walkable energy efficient communities and in particular help land use adapt better to the needs of the aging population Publisher's description *Constructions of Race, Place, and Nation* Peter Jackson, Jan Penrose, 1994 **Housing the North American City** Michael Doucet, John C.

Weaver,1991-08-06 Doucet and Weaver begin this empirical analytical and narrative study with an analysis of the evolution of land development as an enterprise and continue with an examination of house design and construction practices the development of the apartment building and an account of class and age as they relate to housing tenure They also relate developments in Hamilton to the current state of urban historiography using their case study to resolve discrepancies and contradictions in the literature Among the major themes the authors deal with is a controversial exploration of what they see as a central North American urge the desire to own a home Other themes include the social allocation of urban space the quality and affordability of housing the increased interest of large corporations in the land development and financial service industries and a comparative analysis of housing in Canada and the United States The authors have drawn on civic and business records dating from the early nineteenth century to the latest planning data Combining this information with their comprehensive analysis Doucet and Weaver show that current housing problems and potential solutions are better understood when seen as part of a historical process They provide a critical assessment of the ways in which contemporary society produces shelter and question the use of technical innovations alone to resolve housing crises

Urban Ministry Manuel Ortiz,Harvie M. Conn,2025-06-06 No 3 in the Academy of Parish Clergy Top Ten Books of the Year The city presents serious challenges that cry out for answers poverty racism human exploitation and government corruption How can the church move ahead in the midst of these demands with the gospel of hope Here in one comprehensive volume Harvie Conn and Manuel Ortiz two noted scholars and proven practitioners of urban ministry address the vital work of the church in the city Their dual goal to understand the city and God s work in it Through four great waves of development Conn and Ortiz trace the history of the city around the world Then they tackle the critical issue of a biblical basis for urban mission How does the Bible view the city Are we closer to God in the country than the city Does the Bible have an anti urban bias These questions are given a thorough analysis that unveils God s urban mandate as reflected in both Old and New Testaments From this foundation the authors unpack the multifaceted nature of the city as place as process as center as power and as a place of change and stability They move us beyond fragmented stereotypes to a new way of seeing that is holistic enough for a fully biblical ministry to develop In addition Conn and Ortiz lay out what the social sciences have to offer urban mission including ethnographic and demographic studies and they focus on the particular issues and needs of urban leadership including a plan for developing and mentoring leaders while equipping the laity for ministry in the city This is the essential text for bringing God s kingdom to the city through the people of God

Planning Toronto Richard White,2016-01-15 Paris is famous for romance Chicago the blues Buenos Aires the tango And Toronto Well Canada s largest urban centre is known for being a city that works a remarkably livable metropolis for its size In this lavishly illustrated book Richard White reveals how urban planning contributed to Toronto becoming a functional world class city Focusing on the period from 1940 to 1980 he examines how planners shaped the city and its development amid a maelstrom of local and international obstacles and

influences Based on meticulous research of Toronto's postwar plans and supplemented by dozens of interviews Planning Toronto provides a comprehensive and lively explanation of how Toronto's postwar plans city metropolitan and regional came to be who devised them and what impact they had When it comes to the history of urban planning the question may not be whether a particular plan was good or bad but whether in the end it made a difference As White demonstrates in Toronto's case planning did matter just not always as expected Eastern Transportation Corridor (ETC), SR-231 Between SR-91 and South of I-5 at SR-133, Orange County, Supplemental EIS, 1994 **North America** Michael M. Brescia, John C. Super, 2009-01-01 This exquisitely written history of a complex but unstudied continent should be required reading for all residents of the emerging region of North America Robert A. Pastor Professor and Director of the Center for North American Studies American University **The Political Culture of Planning** J. Barry Cullingworth, J. Barry Cullingworth, 2002-09-26 First published in 1993 Routledge is an imprint of Taylor Francis an informa company City Form and Everyday Life Jon Caulfield, 1994-01-01 Drawing on a series of in depth interviews among a segment of Toronto's inner city middle class population Caulfield argues that the seeds of gentrification have included patterns of critical social practice and that the gentrified landscape is highly paradoxical **Difference and Community** Peter Easingwood, Konrad Gross, Lynette Hunter, 1996 This volume brings together essays which suggest that the relationship between Canada and Europe is a two way process as historically the traffic between them has been either may have something to offer the other Europe too acknowledges situations today in which difference and community are hard terms to reconcile Difference refers to gender sexuality race nationality or language Community is the collective understanding which must continually be renegotiated and reconstructed among these factors The Canadian European connection is one in which it seems especially appropriate to explore such circumstances The topics covered include pioneer women's writing transcultural women's fiction canonical taxonomy of the contemporary novel the city poem in Confederate Canada poetry of the Great War various ethno cultural perspectives Jewish South Asian Italian Native reappropriations Quebec cinema literature and the media and small press publishing Some of the authors treated Sandra Birdsell Nicole Brossard Jack Hodgins Henry Kreisel Robert Kroetsch Janice Kulyk Keefer Archibald Lampman Malcolm Lowry Lesley Lum Daphne Marlatt Susanna Moodie Bharati Mukherjee Alice Munro Frank Paci and Susan Swan Identities in North America, 1995-02 This wide ranging inquiry into the socio cultural forces that define the three nations of North America seeks out ways in which the countries can become more comfortable with their collective future on the continent **Power in the Global Era** T. Cohn, S. McBride, J. Wiseman, 2000-09-08 This volume discusses the effects of globalization on changing power relationships between transnational corporations TNCs and transnational capital the state and subnational groups TNCs have expanded their power with the deepening of market relations but they are not causing the state to wither away Indeed neoliberal changes often occur with the permission or even encouragement of powerful states Transnational capital has weakened labour groups in order to make production more

competitive but the disadvantaged groups may mobilise to counter the power of transnational capital Finally globalization is subjecting domestic policies to increased international scrutiny

The Public Metropolis Frances Frisken, 2007 The Public Metropolis traces the evolution of Ontario government responses to rapid population growth and outward expansion in the Toronto city region over an eighty year period Frisken rigorously describes the many institutions and policies that were put in place at different times to provide services of region wide importance and skilfully assesses the extent to which those institutions and policies managed to achieve objectives commonly identified with effective regional governance Although the province acted sporadically and often reluctantly in the face of regional population growth and expansion Frisken argues that its various interventions nonetheless contributed to the region's most noteworthy achievement a core city that continued to thrive while many other North American cities were experiencing population economic and social decline This perceptive and comprehensive examination of issues related to the evolution of city regions is critical reading not only for those teaching and researching in the field but also for city and regional planners officials at all levels of government and urban historians The research writing and publication of this book has been supported by the Neptis Foundation

Changing Suburbs Richard Harris, Peter Larkham, 2003-09-02 The editors and contributors to this volume demonstrate how suburbs and the meaning of suburbanism change both with time and geographical location Here the disciplines of history geography and sociology together with subdisciplines as diverse as gender studies art history and urban morphology are brought together to reveal the nature of suburbia from the nineteenth century to the present day

The Mexican Border Cities Daniel D. Arreola, 1994-02-01 From Matamoros to Tijuana Mexican border cities have long evoked for their neighbors to the north images of cheap tourist playgrounds and more recently industrial satellites of American industry These sensationalized and simplified perceptions fail to convey the complexity and diversity of urban form and function and of cultural personality that characterize these places The Mexican Border Cities draws on extensive field research to examine eighteen settlements along the 2 000 mile border ranging from towns of less than 10 000 people to dynamic metropolises of nearly a million The authors chronicle the cities growth and compare their urban structure analyzing them in terms of tourist districts commercial landscapes residential areas and industrial and transportation quarters Arreola and Curtis contend that despite their proximity to the United States the border cities are fundamentally Mexican places as distinguished by their cultural landscapes including town plan land use pattern and building fabric Their study richly illustrated with over 75 maps and photographs offers a provocative and insightful interpretation of the geographic anatomy and personality of these fascinating and rapidly changing communities

And I Will Dwell in Their Midst Etan Diamond, 2014-03-17 Suburbia may not seem like much of a place to pioneer but for young religiously committed Jewish families it's open territory This sentiment expressed in the early 1970s by an Orthodox Jew in suburban Toronto captures the essence of the suburban Orthodox Jewish experience of the late twentieth century Although rarely associated with postwar suburbia Orthodox Jews in metropolitan areas across

the United States and Canada have successfully combined suburban lifestyles and the culture of consumerism with a strong sense of religious traditionalism and community cohesion By their very existence in suburbia argues Etan Diamond Orthodox Jewish communities challenge dominant assumptions about society and religious culture in the twentieth century Using the history of Orthodox Jewish suburbanization in Toronto Diamond explores the different components of the North American suburban Orthodox Jewish community sacred spaces synagogues schools kosher homes and social networks In a larger sense though his book tells a story of how traditionalist religious communities have thrived in the most secular of environments In so doing it pushes our current understanding of cities and suburbs and their religious communities in new directions *The Power of Geography (RLE Social & Cultural Geography)* Jennifer Wolch, Michael Dear, 2014-01-23 This book illuminates the profound influence of geography on everyday life Concentrating on the realm of social reproduction gender family education culture and tradition race ethnicity the contributors provide both an articulation of a theory of territory and reproduction and concrete empirical analyses of the evolution of social practices in particular places At the core of the book's contribution is the concept of society as a time space fabric upon which are engraved the processes of political economic and socio cultural life A second distinctive feature of the book is its substantive focus on the relation between territory and social practice Thirdly it represents a significant step in the redefinition of the research agenda in human geography
