Sensory Worlds In Early America:

Sensory Worlds in Early America Peter Charles Hoffer, 2005-12-12 Over the past half century historians have greatly enriched our understanding of America's past broadening their fields of inquiry from such traditional topics as politics and war to include the agency of class race ethnicity and gender and to focus on the lives of ordinary men and women We now know that homes and workplaces form a part of our history as important as battlefields and the corridors of power Only recently however have historians begun to examine the fundamentals of lived experience and how people perceive the world through the five senses In this ambitious work Peter Charles Hoffer presents a sensory history of early North America offering a bold new understanding of the role that sight sound smell taste and touch played in shaping the lives of Europeans Indians and Africans in the New World Reconstructing the most ephemeral aspects of America's colonial past the choking stench of black powder the cacophony of unfamiliar languages the taste of fresh water and new foods the first sight of strange peoples and foreign landscapes the rough texture of homespun the clumsy weight of a hoe Hoffer explores the impact of sensuous experiences on human thought and action He traces the effect sensation and perception had on the cause and course of events conventionally attributed to deeper cultural and material circumstances Hoffer revisits select key events encounters and writings from America's colonial past to uncover the sensory elements in each and decipher the ways in which sensual data were mediated by prevailing and often conflicting cultural norms Among the episodes he reexamines are the first meetings of Europeans and Native Americans belief in and encounters with the supernatural the experience of slavery and slave revolts the physical and emotional fervor of the Great Awakening and the feelings that prompted the Revolution Imaginatively conceived deeply informed and elegantly written Sensory Worlds of Early America convincingly establishes sensory experience as a legitimate object of historical inquiry and vividly brings America's colonial era to life Richard Godbeer author of Sexual Revolution in Early America **Sensory Worlds of Early America** Peter Charles Hoffer,2003 The Science of the Soul in Colonial New England Sarah Rivett, 2012-12-01 The Science of the Soul challenges long standing notions of Puritan provincialism as antithetical to the Enlightenment Sarah Rivett demonstrates that instead empiricism and natural philosophy combined with Puritanism to transform the scope of religious activity in colonial New England from the 1630s to the Great Awakening of the 1740s In an unprecedented move Puritan ministers from Thomas Shepard and John Eliot to Cotton Mather and Jonathan Edwards studied the human soul using the same systematic methods that philosophers applied to the study of nature In particular they considered the testimonies of tortured adolescent girls at the center of the Salem witch trials Native American converts and dying women as a source of material insight into the divine Conversions and deathbed speeches were thus scrutinized for evidence of grace in a way that bridged the material and the spiritual the visible and the invisible the worldly and the divine In this way the science of the soul was as much a part of seventeenth and eighteenth century natural philosophy as it was part of post Reformation theology Rivett's account restores

the unity of religion and science in the early modern world and highlights the role and importance of both to transatlantic circuits of knowledge formation A Sensory History Manifesto Mark M. Smith, 2021-05-10 A Sensory History Manifesto is a brief and timely meditation on the state of the field It invites historians who are unfamiliar with sensory history to adopt some of its insights and practices and it urges current practitioners to think in new ways about writing histories of the senses Starting from the premise that the sensorium is a historical formation Mark M Smith traces the origins of historical work on the senses long before the emergence of the field now called sensory history interrogating exploring and in some cases recovering pioneering work on the topic Smith argues that we are at an important moment in the writing of the history of the senses and he explains the potential that this field holds for the study of history generally In addition to highlighting the strengths of current work in sensory history Smith also identifies some of its shortcomings If sensory history provides historians of all persuasions times and places a useful and incisive way to write about the past it also challenges current practitioners to think more carefully about the historicity of the senses and the desirability even the urgency of engaged and sustained debate among themselves In this way A Sensory History Manifesto invites scholars to think about how their field needs to evolve if the real interpretive dividends of sensory history are to be realized Concise and convincing A Sensory History Manifesto is a must read for historians of all specializations Women in Early America Dorothy Auchter Mays, 2004-11-23 This volume fills a gap in traditional women's history books by offering fascinating details of the lives of early American women and showing how these women adapted to the challenges of daily life in the colonies Women in Early America Struggle Survival and Freedom in a New World provides insight into an era in American history when women had immense responsibilities and unusual freedoms.
