Shaping the American Educational State, 1900 to the Present Clarence J. Karier, 1975 **Historical Dictionary of American Education** Richard J. Davis, 2017-09-01 The American Educational History Journal is a peer reviewed national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines The editors of AEHJ encourage communication between scholars from numerous disciplines nationalities institutions and backgrounds Authors come from a variety of disciplines including political science curriculum history philosophy teacher education and educational leadership Acceptance for publication in AEHJ requires that each author present a well articulated argument that deals substantively with questions of educational history AEHJ accepts papers of two types The first consists of papers that are presented each year at our annual meeting The second type consists of general submission papers received throughout the year General submission papers may be submitted at any time They will not however undergo the review process until January when papers presented at the annual conference are also due for review and potential publication For more information about the Organization of Educational Historians OEH and its annual conference visit the OEH web site at www.edhistorians.org *The Other Struggle for Equal Schools* Rubén Donato, 1997-10-02 Examining the Mexican American struggle for equal education during the 1960s and 1970s in the Southwest in general and in a California community in particular Donato challenges conventional wisdom that Mexican Americans were passive victims accepting their educational fates He looks at how Mexican American parents confronted the relative tranquility of school governance how educators responded to increasing numbers of Mexican Americans in schools how school officials viewed problems faced by Mexican American children and why educators chose specific remedies Finally he examines how federal state and local educational

policies corresponded with the desires of the Mexican American community *Resources in Education*, 1998 *The Last Children's Plague* Richard J. Altenbaugh, 2015-09-16 Poliomyelitis better known as polio thoroughly stumped the medical science community Polio's impact remained highly visible and sometimes lingered exacting a priceless physical toll on its young victims and their families as well as transforming their social worlds This social history of infantile paralysis is plugged into the rich and dynamic developments of the United States during the first half of the twentieth century Children became epidemic refugees because of anachronistic public health policies and practices They entered the emerging clinical world of the hospital rupturing physical and emotional connections with their parents and siblings As they underwent rehabilitation they created ward cultures They returned home to occasionally find hostile environments and always discover changed relationships due to their disabilities The changing concept of the child from an economic asset to an emotional commitment medical advances and improved sanitation policies led to significant improvements in child health and welfare This study relying on published autobiographies memoirs and oral histories captures the impact of this disease on children's personal lives encompassing public health policies hospitalization philanthropic and organizational responses physical therapy family life and schooling It captures the anger frustration and terror not only among children but parents neighbors and medical professionals alike

The Americanization of West Virginia John C. Hennen, 2021-12-14 Local teachers and ministers extolling the virtues of hard work and loyalty to God and country Veterans groups and women's clubs promoting the military fighting radicalism and equating business and patriotism Industrial leaders gaining legal as well as moral influence over national domestic policy Such scenes might seem to be lifted from a Sinclair Lewis novel or a Contract with America publicity video But as John C. Hennen shows in this piercing analysis of early twentieth century American political culture from 1916 to 1925 Americanization became the theme indeed the script not only of West Virginia but of the entire nation Hennen's interdisciplinary work examines a formative period in West Virginia's modern history that has been largely neglected beyond the traditional focus on the coal industry Hennen looks at education reform and industrial relations in the state in the context of war mobilization postwar instability and national economic expansion The First World War he says consolidated the dominant positions of professionals business people and political capitalists as arbiters of national values These leaders emerged from the war determined to make free market business principles synonymous with patriotic citizenship Americanization therefore refers less to the assimilation of immigrants into the national mainstream than to the attempt to encode values that would guarantee a literate loyal and obedient producing class To ensure that the state fulfilled its designated role as a resource zone for the perceived greater good of national strength corporate leaders employed public relations tactics that the Wilson administration had refined to gain public support for the war Alarmed by widespread labor

activism and threatened by fears of communism the American Constitutional Association in West Virginia one of dozens of similar organizations nationwide articulated principles that identified the well being of business with the well being of the country With easy access to teacher training and classroom programs antiunion forces had by 1923 rolled back the wartime gains of the United Mine Workers of America Middle class voluntary organizations like the American Legion and the West Virginia Federation of Women s Clubs helped implant mandated loyalty in schoolchildren Far from being isolated during America s transformation into a world power West Virginia was squarely in the mainstream The state s people and natural resources were manipulated into serving crucial functions as producers and fuel for the postwar economy Hennen s study therefore is a study less of the power or force of ideas than of the importance of access to the means to transmit ideas The winner of the 1995 Appalachian Studies Award is a significant contribution to regional studies as well as to our understanding of American culture during and after World War I

The Classroom Arsenal Douglas D. Noble, 2017-09-29 A quarter of a century after its initial publication The Classroom Arsenal remains pivotal in understanding and challenging the relentless promotion of technology to reform education This seemingly benign education technology

juggernaut carries forward the momentum of military agendas in man machine systems detailed in the book Promoters continue to flood schools with technology and its still unfulfilled promise of cutting edge personalized learning Meanwhile they continue as well their insatiable pursuit of federal funding educational legitimacy corporate profits and access to student subjects and their accumulated learning data for product development Less understood though is a companion enterprise there from the start to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high performance systems from weapons systems to high tech corporations As education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself the goal of this human engineering project the depersonalized accumulation of cognitive components for a 21st century militarized economy best befits the book s original title The Human Arsenal This ongoing military corporate sponsored enterprise continues to impact education today largely unnoticed One example is the federally funded Advanced Distributed Learning Initiative ADL which has been a major force behind the implementation of electronic learning systems now used in all Defense Department and federal employee training With the Defense Advanced Research Project Agency ARPA ADL is developing structures to capture students soft skills and the Army Research Laboratory is developing intelligent tutoring systems to enable instructional management of affect engagement and grit perseverance ADL through the Department of Defense has developed Experience API a learning technology that can monitor all student online and offline interactions and archive these in data lockers or learning record stores ADL has already impacted thousands of school districts through nonprofits such as IMS Global and Future Ready Schools part of an industry massively subsidized by high tech corporations and valued at 255 billion annually A 90 million Advanced Research Projects Agency for Education ARPA ED modeled after the military s ARPA has been proposed to fund dramatic breakthroughs in learning and teaching These include digital tutors as effective as personal tutors and with the Navy s Full Spectrum Learning project data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences ADL is just one example of how the military corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized data driven automated and monitored Its promoters envision education as children interacting with online learning systems where based on past performance algorithms will serve up what each student needs to know next Through this digital curriculum students create virtual educational identities at very young ages and learning devices are watching students as much as students are watching them Such is the education landscape presaged by The Classroom Arsenal a quarter century ago whose origins and trajectories need to be deeply understood now more than ever [The American School](#) Joel Spring, 2018-02-15 This current comprehensive history of American education is designed to stimulate critical analysis and critical thinking by offering alternative interpretations of each historical period In his signature straight forward concise style Joel Spring provides a variety of interpretations of American schooling from conservative to leftist in order to

spark the reader's own critical thinking about history and schools. This tenth edition follows the history of American education from the seventeenth century to the integration into global capitalism of the twenty-first century to the tumultuous current political landscape. In particular, the updates focus on tracing the direct religious links between the colonial Puritans and the current day Trump administration. Chapters 1 and 2 have been rewritten to take a closer look at religious traditions in American schools leading up to the educational ideas of the current U.S. Secretary of Education Betsy DeVos. An updated Chapter 15 further links traditional religious fundamentalist ideas and the twentieth-century free market arguments of the Chicago school of economists to President Trump's administration and the influence of the Alt Right.

Black and White Styles of Youth Ministry William R. Myers, 2009-10-01 Bill Myers has offered a much needed picture of black and white styles of youth ministry. His own style of writing is stunning. The book is so rich in historical reflection and descriptive detail that one cannot avoid being confronted by the urgent issues of race, culture, and social history, all vitally important in shaping ministry.

The Undeserving Poor Michael B. Katz, 2013-09-30 The Undeserving Poor is a history of the ideas that underlie America's enduring confrontation with poverty. The book shows that poverty remains a national disgrace in part because of the way we define and think about it, which in turn shapes the energy we put or don't put into its eradication.

Education and the Risk Society Steven Bialostok, Robert Whitman, William Bradley, 2012-12-23 Sociological and anthropological literature has examined how contemporary western society has become a risk society. *Education and the Risk Society* is the first volume to explore this seminal concept through the lens of education. Drawing on a theoretical literature that has great potential as a lens to view changes in neoliberal discourses of global capitalism from both critical and generative perspectives, *Education and the Risk Society* presents situated empirical studies investigating an uncertain world as people practice it on the ground through language and activity within educational settings.
