Risk Sharing, Risk Spreading and Efficient Regulation T.V.S. Ramamohan Rao, 2015-10-22 The book provides an integrated approach to risk sharing risk spreading and efficient regulation through principal agent models It emphasizes the role of information asymmetry and risk sharing in contracts as an alternative to transaction cost considerations It examines how contracting as an institutional mechanism to conduct transactions spreads risks while attempting consolidation It further highlights the shifting emphasis in contracts from Coasian transaction cost saving to risk sharing and shows how it creates difficulties associated with risk spreading and emphasizes the need for efficient regulation of contracts at various levels Each of the chapters is structured using a principal agent model and all chapters incorporate adverse selection and exogenous randomness as a result of information asymmetry as well as moral hazard and endogenous randomness due to the self interest seeking behavior on the part of the participants
