Frost, Kou K. Nelson, 1995 This first volume in a projected two volume history of the Louisiana State University College of Engineering recounts the formative decades of the school in the context of a half century of technological advance and social discord The authors explore efforts to sustain the engineering program during *Program of the Annual Meeting - American Historical Association* American Historical Association, 1996 Some programs include also the programs of societies meeting concurrently with the association **LLA Bulletin** Louisiana Library Association, 1995 **America, History and Life**, 1997 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Thinking Confederates** Dan R. Frost, 2000 Dan Frost shows how inspired by the idea of progress these men set about transforming Southern higher education Recognizing the north s superiority in industry and technology they turned their own schools from a classical orientation to a new emphasis on science and engineering These educators came to define the Southern idea of progress and passed it on to their students thus helping to create and perpetuate an expectation for the arrival of the New

Hoffman,2020-01-08 Paul E Hoffman s Louisiana State University and Agricultural and Mechanical College 1860 1919 is a highly detailed analysis of LSU s beginnings and early development starting well before it first opened its doors in Pineville Louisiana in 1860 Hoffman reveals how political and ideological contests in areas of governance curriculum finances discipline the military feature and student life influenced the early identity and development of the school shaping and laying the groundwork for the university we recognize today The institution s first name the Louisiana State Seminary of Learning and Military Academy reflected its contested character part imitation of the Virginia Military Institute part true military academy and part classical college The school was renamed Louisiana State University in 1870 after graduating its first class When the land grant university created at New Orleans in 1874 merged with LSU in 1877 the school became Louisiana State University and Agricultural and Mechanical College The new disagreements about the character of the institution did not resolve until 1919 At the turn of the twentieth century new challenges led to the establishment of a law school the admittance of women for the first time the organization of the institution into distinct colleges and demands to emphasize on campus agricultural instruction Hoffman shows that President Thomas D Boyd faced with flat inadequate state funding for the university as a whole moderated those demands until 1918 Then the wartime emphasis on agricultural production various federal programs that encouraged enrollment in LSU s College of Agriculture and a critical shortage of space on the downtown campus worked together to prompt the purchase of Gartness Plantation the site of the current campus but without any funds or immediate plans for its development Hoffman s study ends in the spring of 1919 By then the school had largely resumed its prewar rhythms in academic and extracurricular areas The ROTC program begun in 1917 was again in place transforming LSU into the Ole War Skule of living memory With most of its struggles over its identity resolved LSU was poised to resume the growth that World War I had interrupted and that with the development of the new campus would characterize the school during the next twenty years of its history This first fully documented history of LSU in its early years contributes to a broader understanding of the growth of both LSU itself and American higher education showing how fiscal realities and contested ideas about higher education during the post Civil War era shaped university development *The LSU College of Engineering: Growth and maturity, 1909-1970* Dan R. Frost,Kou K. Nelson,1995 In 1909 the LSU College of Engineering was a modest program struggling to define itself In 1970 it was an internationally recognized institution This fascinating study the second in an ongoing history of the College traces that remarkable evolution Dan R Frost not only details the internal workings of the College of Engineering and its

relationship with LSU as a whole but places the story in the context of the times He shows how LSU s engineering faculty administrators and students coped with the challenges that confronted the nation the region and the state In the Great Depression for example engineers had to face the widespread belief that the machines they designed cost workers badly needed jobs After both world wars especially World War II society debated the moral responsibilities of the profession in the invention and proliferation of weapons of mass destruction Meanwhile some faculty and students ridiculed and others cheered the College s first female graduate in 1937 and more than thirty years later its first African American graduate
