Rethinking Civilization

Majid Tehranian, 2012-11-12 *Rethinking Civilization* offers an alternative view of human civilization in a globalizing age. Majid Tehranian analyses the transition from nomadic to agrarian, commercial, industrial, and digital civilizations and argues that the growing gaps among the five major civilizations have led to terror operating as a form of global communication. This new book explores the uneven pace of development of human societies particularly in the last two centuries and argues that this is leading to a global civil war. Taking a long-term historical perspective and developing a model that explains how empires, resistance, and civilizations have evolved alongside major technological breakthroughs in history, Tehranian offers a multi-cultural and multi-disciplinary analysis of the phenomenon. Seeking to counter the current rhetorical trends, Tehranian reconceptualizes civilization to make it a useful analytical rather than ideological category, defines the varieties of terrorism including structural, nuclear, state, opposition, messianic, and anomic, addresses the contemporary problems of global governance and the evolution of international relations, traces the evolution of global communication from orality to literacy, print, electronic, and digital modes, forecasts the emerging problems of encounters among the five civilizations. This unique and original volume will be of great interest to students and researchers of globalization, international relations, peace studies, and sociology.

Global Perspectives on Global History Dominic Sachsenmaier, 2011-08-04 In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement have remained limited in scope as theoretical exchanges on the tasks, responsibilities, and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge, and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany, and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political, and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation, and exchange.

The Making of the Modern Chinese State Huaiyin Li, 2019-08-13 *The Making of the Modern Chinese State 1600-1950* offers an historical analysis of the formation of the modern Chinese state from the seventeenth century to the mid-twentieth centuries, providing refreshing and provocative interpretations on almost every major issue regarding the rise of modern China. This book explores the question of why today's China is unlike any other nation-state in size and structure. It inquires into the reasons behind the striking continuity in China's territorial and ethnic compositions over the past centuries and explicates the genesis and tenacity of the Chinese state as a highly centralized and unified regime that has been able to survive into the twenty-first century. Its analysis centres on three key variables: namely, geopolitical strategy, fiscal constitution, and identity building, and it demonstrates how they worked together to shape the outcome of state transformation in modern China. Enhanced by a selection of informative tables and illustrations, *The Making of the Modern Chinese State 1600-1950* is

ideal for undergraduates and graduates studying East Asian history Chinese history empires in Asia and state formation

Eden and the Fall - the Fallacies of Radical Ecological History, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today's ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on

the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t **A Global History of History** Daniel Woolf,2011-02-17 An illustrated survey of global historical scholarship from the ancient world to the present for courses in theory and historiography

Theory and Method in Historical Ethnomusicology Jonathan McCollum,David G. Hebert,2014-09-11 Historical ethnomusicology is increasingly acknowledged as a significant emerging subfield of ethnomusicology due to the fact that historical research requires a different set of theories and methods than studies of contemporary practices and many historiographic techniques are rapidly transforming as a result of new technologies In 2005 Bruno Nettl observed that the term historical ethnomusicology has begun to appear in programs of conferences and in publications Nettl 2005 274 and as recently as 2012 scholars similarly noted an increasing concern with the writing of musical histories in ethnomusicology Ruskin and Rice 2012 318 Relevant positions recently advanced by other authors include that historical musicologists are all ethnomusicologists now and that all ethnomusicology is historical Stobart 2008 yet we sense that such arguments while useful and theoretically correct may ultimately distract from careful consideration of the kinds of contemporary theories and rigorous methods uniquely suited to historical inquiry in the field of music In *Theory and Method in Historical Ethnomusicology* editors Jonathan McCollum and David Hebert along with contributors Judah Cohen Chris Goertzen Keith Howard Ann Lucas Daniel Neuman and Diane Thram systematically demonstrate various ways that new approaches to historiography and the related application of new technologies impact the work of ethnomusicologists who seek to meaningfully represent music traditions across barriers of both time and space Contributors specializing in historical musics of Armenia Iran India Japan southern Africa American Jews and southern fiddling traditions of the United States describe the opening of new theoretical approaches and methodologies for research on global music history In the Foreword Keith Howard offers his perspective on historical ethnomusicology and the importance of reconsidering theories and methods applicable to this field for the enhancement of musical understandings in the present and future Functional Coexistence in Socio-Political Conflict Tatsushi Arai,Margarita Tadevosyan,2025-01-31 This book introduces the concept of functional coexistence as a context for building practical strategies for long term conflict intervention and social change Functional coexistence is a pragmatic relationship of mutual non recognition sustained in the absence of physical violence In this volume a team of internationally recognized scholar practitioners of peacebuilding presents seven in depth case studies of functional coexistence expanding its potential for practical conflict intervention Bridging theory to evidence and vision to practice the book offers guideposts for sustained conflict intervention presents compelling examples of peace potential within the context of functional coexistence and identifies common pathways for change among them It also proposes a customized framework
