Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe s preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics *The Language of Architecture* Andrea Simitch, Val Warke, 2014-06-01 DIV Learning a new discipline is similar to learning a new language in order to master the foundation of architecture you must first master the basic building blocks of its language the definitions function and usage Language of Architecture provides students and professional architects with the basic elements of architectural design divided into twenty six easy to comprehend chapters This visual reference includes an introductory historical view of the elements as well as an overview of how these elements can and have been used across multiple design disciplines divDIV divDIV Whether you re new to the field or have been an architect for years you ll want to flip through the pages of this book throughout your career and use it as the go to reference for inspiration ideas and reminders of how a strong knowledge of the basics allows for meaningful memorable and beautiful fashions that extend beyond trends divDIV divDIV This comprehensive learning tool is the one book you ll want as a staple in your library divDIV div The Place of Silence Mark Dorrian, Christos Kakalis, 2020-02-06 The Place of Silence explores the poetics and politics of silence in architecture Bringing together contributions by internationally recognized scholars in architecture and the humanities it explores the diverse practices affects politics and cultural meanings of silence silent places and silent buildings in historical and contemporary contexts What counts as silence in specific situations is highly relative and the term itself carries complex and varied significations which make it a revealing field of study Chapters explore a range of themes from the apparent loss of silence in the

contemporary urban world through designed silent spaces to the forced silences of oppression catastrophe or technological breakdown The book unfolds a rich and complementary array of perspectives which address through the lens of architecture and place questions of sound atmosphere and attunement together building a volume which will form the key scholarly resource on architecture and silence *Trajectories in Architecture* Michael Jasper, 2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Shu Cheng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of *The Oxford Dictionary of Architecture* has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader *Hejduk's Chronotope* K. Michael Hays, 1996-09 Anyone interested in the intersection of theory and practice in architecture will appreciate the insight offered by Hejduk's *Chronotope* With essays by Stan Allen Peggy Deamer K Michael Hays Catherine Ingraham Detlef Mertins Edward Mitchell and Robert Somol the volume examines today's

tendency towards theoretical production as exemplified by John Hejduk known for his ventures outside the realm of the practical Hejduk the Dean of the School of Architecture at The Cooper Union has created a unique body of theoretical work publications such as *Mask of Medusa* and small scale constructions such as his compelling masques structures that fall between architecture scenography sculpture and poetry Additionally Hejduk has several built works to his name housing in Berlin and a renovation of The Cooper Union which display the same themes and tectonics as his theoretical creations

Mask of Medusa Kim Shkapich, 1985 **The Monster Leviathan** Aaron Betsky, 2024-01-09 Visionary proposals for a mythic and strange architecture or anarchitecture through which we can imagine other and better worlds Lurking under the surface of our modern world lies an unseen architecture or anarchitecture It is a possible architecture an analogous architecture an architecture of anarchy which haunts in the form of monsters that are humans and machines and cities all at once or takes the form of explosions veils queer playful spaces or visions from artwork and video games In *The Monster Leviathan* Aaron Betsky traces anarchitecture through texts design and art of the twentieth and early twenty first century and suggests that these ephemeral evocations are concrete proposals in and of themselves Neither working models nor suggestions for new forms they are scenes just believable enough to convince us they exist or just fantastical enough to open our eyes *The Monster Leviathan* gives students and lovers of architecture as well as those hoping to construct a better more sustainable and socially just future a set of tools through which they can imagine that such other worlds are possible As Betsky eloquently articulates anarchitecture already exists and does not exist at all It is the myth of building and all we have to do is find it

Diller Scofidio + Renfro Edward Dimendberg, 2013-03-20 In *Diller Scofidio Renfro Architecture after Images* Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios Since founding their practice in 1979 Elizabeth Diller and Ricardo Scofidio have integrated architecture urban design media art and the performing arts in a dazzling array of projects which include performances art installations and books in addition to buildings and public spaces At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture Dimendberg provides an extensive overview of these concerns and the history of the studio revealing how principals Elizabeth Diller Ricardo Scofidio and Charles Renfro continue to expand the definition of architecture question the nature of space and vision in contemporary culture and produce work that is endlessly surprising and rewarding from New York's High Line to *Blur* an artificial cloud and *Facsimile* a video screen that moves around a building facade Dimendberg also explores the relation of work by DS R to that by earlier modernists such as Marcel Duchamp and John Hejduk He reveals how the fascination of the architects with evolving forms of media technology and building materials has produced works that unsettle distinctions among architecture and other media Based on interviews with the architects their clients and collaborators as well as unprecedented access to unpublished documents sketchbook entries and archival records *Diller Scofidio Renfro* is the most thorough consideration of DS R in any language

Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers this book is an essential study of one of the most significant and creative architecture and design studios working today

, 2009 **The Grove Encyclopedia of American Art** Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Architecture's Desire** K. Michael Hays, 2009-10-02 Theorizes an architectural ethos of extreme self reflection and finality from a Lacanian perspective While it is widely recognized that the advanced architecture of the 1970s left a legacy of experimentation and theoretical speculation as intense as any in architecture's history there has been no general theory of that ethos Now in Architecture's Desire K Michael Hays writes an account of the late avant garde as an architecture systematically twisting back on itself pondering its own historical status and deliberately exploring architecture's representational possibilities right up to their absolute limits In close readings of the brooding melancholy silence of Aldo Rossi the radically reductive decompositions and archaeologies of Peter Eisenman the carnivalesque excesses of John Hejduk and the cinegrammatic delirium of Bernard Tschumi Hays

narrates the story of architecture confronting its own boundaries with objects of ever more reflexivity difficulty and intransigence The late avant garde is the last architecture with philosophical aspirations an architecture that could think philosophical problems through architecture rather than merely illustrate them It takes architecture as the object of its own reflection which in turn produces an unrelenting desire Using the tools of critical theory together with the structure of Lacan's triad imaginary symbolic real Hays constructs a theory of architectural desire that is historically specific and yet sets the terms and the challenges of all subsequent architectural practice including today's

Radical Pedagogies Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria Meister, 2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture's status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture's role in the new century

Kay Fisker Martin Søberg, 2021-05-20 Kay Fisker 1893 1965 is considered one of the most influential Danish architects of the twentieth century and yet there has existed until now no in depth English language study of his works and writing Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this book examines Fisker's key projects from his early railway stations and innovative housing projects to the Danish Academy in Rome and analyses his work as a historian and writer Fisker's output is closely associated with the functional tradition a hybridization of international modernism and regional architectural typologies and this book shows how his architectural poetics can be understood as an amalgamation of an ideal order with the contingent conditions of landscapes and urban sites Hybridization is not only a valuable notion for understanding Fisker the book argues it can also be applied to an understanding of modernist architecture as a whole with its various expressions agendas and tensions both regionally and internationally

The Theory of Architecture Paul-Alan Johnson, 1994-04-18 The

Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design
