The Kurdish Question Revisited Gareth R. V. Stansfield, Mohammed Shareef, 2017 The Kurds once marginal in the study of the Middle East and secondary in its international relations have moved to centre stage in recent years In Turkey where the Kurdish question is an issue of national significance and in Iraq where the gains made by the Kurdistan Regional Government have allowed it to impose its authority moves are afoot to solve the Kurdish Question once and for all The picture is less positive in Syria where the Kurds have borne the brunt of the Islamic State's onslaught and in Iran where they struggle to express their cultural distinctiveness and suffer disproportionately at the hands of the Islamic Republic's security apparatus Yet the situations in both countries remain in flux affected by developments in Iraq and Turkey in a manner that suggests we may have to revise the notion of the Kurds being forever divided by the boundaries of the Middle East's and subsumed into the state projects of other nations The contributors to *The Kurdish Question Revisited* offer insights into how this once seemingly intractable immutable phenomenon is being transformed amid the new political realities of the Middle East Publisher's description

Fascism: The social dynamics of fascism Roger Griffin, Matthew Feldman, 2004. The nature of fascism has been hotly contested by scholars since the term was first coined by Mussolini in 1919. However, for the first time since Italian fascism appeared, there is now a significant degree of consensus amongst scholars about how to approach the generic term, namely as a revolutionary form of ultra-nationalism. Seen from this perspective, all forms of fascism have three common features: anticonservatism, a myth of ethnic or national renewal, and a conception of a nation in crisis. This collection includes articles that show this new consensus, which is inevitably contested, as well as making available material which relates to aspects of fascism independently of any sort of consensus, and also covering fascism of the inter and post-war periods. This is a comprehensive selection of texts reflecting both the extreme, multi-faceted nature of fascism as a phenomenon and the extraordinary divergence of interpretations of fascism.

The Making of Modern Lithuania Tomas Balkelis, 2009-06-02. This book argues that, contrary to contemporary Lithuanian nationalist rhetoric, Lithuanian nationalism was modern and socially constructed in the period from the emergence of the Lithuanian national movement in the late nineteenth century to the birth of an independent state in 1918. The book brings into sharp focus those aspects of the history of Lithuania that earlier commentators had not systematically explored; it shows how, in this period, the nascent political elite fashioned its own, and the emerging nation's, identity. Moreover, factors such as the elite's social isolation, educational experience, marital strategies, and narrowly based, fragmented, and uncoordinated political activities were crucial factors in shaping identity and nation building. It demonstrates how the elite was often in conflict with the peasantry, the religious establishment, and other ethnic groups, and how critical considerations such as class, religion, displacement, and ethnicity, rather than national ideology, were. The book's conclusion that Lithuanian nationalism is a construct emerging from modern social forces is highly significant for understanding nationalism and contemporary political developments in Eastern Europe more generally.

The Quest for the Primordial Elisa Vitali, 2023-07-31. Although fifty years passed since the boom of the theories on Japanese national character and considerable academic literature was produced to debunk its ideological tenets, the *Nihonjinron* still plays a significant role in the mainstream public discourse on Japanese identity. Intellectuals, journalists, policymakers routinely repropose the ever-lasting cliché of Japanese cultural, linguistic, racial uniqueness. In doing so, they

adopt a primordialist stance in the narration of Japanese identity that is a conception of Japanese nation as a primordial entity located in an original fatherland since immemorial times Drawing on the writings of Suzuki Takao and Watanabe Shoichi the book analyses the rhetorical strategies and discursive features supporting essentialist ideas of Japaneseness At the same time it highlights the heuristic value of primordialism as an effective descriptor of the nationalist ideology thus challenging its widespread usage as a category of analysis

The Unintended Destruction of the Human Race Alex Roberto Hybel, 2024-09-11 Through a sweeping historical narrative spanning centuries Hybel traces the evolution of human civilization from the dawn of the Renaissance to the digital age Drawing upon diverse disciplines including history politics religion economics and environmental science Hybel reveals how each successive wave of technological innovation economic growth and individual political and economic freedom has fueled a destructive cycle of consumerism exploitation and ecological degradation At the heart of this book lies a stark warning our addiction to growth and consumption is driving us inexorably towards our own demise Hybel argues that our unwavering faith in the virtues of capitalism democracy and technological advancement has blinded us to the existential threats facing our planet and our species But Hybel offers more than a critique of the status quo he presents a compelling case for radical transformation By interrogating the intertwined forces of technology capitalism and individualism Hybel challenges readers to confront the uncomfortable truths at the root of our collective predicament
