Sun Oh,2005-01-31 This remarkable study articulates a Korean Confucian Christian theory of human nature theory of justification sanctification and salvation by means of a reformed concept of filial piety The book investigates in depth the theological anthropology of Robert C Neville and the inclusive humanism of Tu Wei ming Neville and Tu represent contemporary Christian and Confucian approaches to religious anthropology Furthermore they have engaged in an extended and productive dialogical encounter on the themes of comparative thought and religious renewal in Asia and North America This book argues that Neville s and Tu s insights into human nature have great relevance for a comparative contemporary Korean theology by focusing on the role of a reformed version of filial piety as a new component of Korean theology The articulation of filial piety as a potential key of contemporary Korean theology is an example of creative appropriation of a Confucian theme of the Christian praxis of sanctification and ultimately the soteriology of divine grace and transformation This study construes human nature to be such that any living theology will reflect the creative engagement of Christian theologians as public intellectuals in search of the articulation of the gospel Pasture Landscapes and Nature
