Perspective As Symbolic Form:

Perspective as Symbolic Form Erwin Panofsky, 2020-09-01 Erwin Panofsky's *Perspective as Symbolic Form* is one of the great works of modern intellectual history, the legendary text that has dominated all art historical and philosophical discussions on the topic of perspective in this century. Finally available in English, this unrivaled example of Panofsky's early method places him within broader developments in theories of knowledge and cultural change. Here drawing on a massive body of learning that ranges over ancient philosophy, theology, science, and optics, as well as the history of art, Panofsky produces a type of archaeology of Western representation that far surpasses the usual scope of art historical studies. Perspective in Panofsky's hands becomes a central component of a Western will to form the expression of a schema linking the social, cognitive, psychological, and especially technical practices of a given culture into harmonious and integrated wholes. He demonstrates how the perceptual schema of each historical culture or epoch is unique and how each gives rise to a different but equally full vision of the world. Panofsky articulates these distinct spatial systems, explicating their particular coherence and compatibility with the modes of knowledge, belief, and exchange that characterized the cultures in which they arose. Our own modernity, Panofsky shows, is inseparable from its peculiarly mathematical expression of the concept of the infinite within a space that is both continuous and homogeneous.

Panofsky, Cassirer, and Perspective as Symbolic Form, 2000 **Perspective as a Symbolic Form** Erwin Panofsky, 1952 *Art history* Michael Hatt, Charlotte

Klonk, 2025-03-18 *Art History* A critical introduction to its methods provides a lively and stimulating introduction to methodological debates within art history. Offering a lucid account of approaches from Hegel to post colonialism, the book provides a sense of art history's own history as a discipline from its emergence in the late eighteenth century to contemporary debates. By explaining the underlying philosophical and political assumptions behind each method, along with clear examples of how these are brought to bear on visual and historical analysis, the authors show that an adherence to a certain method is in effect a commitment to a set of beliefs and values. The book makes a strong case for the vitality of the discipline and its methodological centrality to new fields such as visual culture. This book will be of enormous value to undergraduate and graduate students and also makes its own contributions to ongoing scholarly debates about theory and method.

The Visual Turn Angela Dalle Vacche, 2003 This collection of essays demonstrates the usefulness of looking at cinema with the analytical methods provided by art theory. *The Visual Turn* is a dialogue between art historians and film theorists from the silent period to the aftermath of World War II. *Body and Text in the Eighteenth Century* Veronica Kelly, Dorothea E. von Mücke, 1994-09-01 Twelve scholars from the fields of English, French, and German literature here examine the complex ways in which the human body becomes the privileged semiotic model through which eighteenth-century culture defines its political and conceptual centers. In making clear that the deployment of the body varies tremendously depending on what is meant by the human body, the essays draw on popular literature, poetics, and aesthetics.

Sovereignty as Symbolic Form Jens Bartelson, 2014-05-09 This book is a critical inquiry into sovereignty and argues that the meaning and functions performed by this concept have changed significantly during the past decades with profound implications for the ontological status of the state and the modus operandi of the international system as a whole Although we have grown accustomed to regarding sovereignty as a defining characteristic of the modern state and as a constitutive principle of the international system Sovereignty as Symbolic Form argues that recent changes indicate that sovereignty has been turned into something granted contingent upon its responsible exercise in accordance with the norms and values of an imagined international community Hence we need a new understanding of sovereignty in order to clarify the logic of its current usage in theory and practice alike and its connection to broader concerns of social ontology what kind of world do we inhabit and of what kind of entities is this world composed This book will be of interest to students of International Relations Critical Security and International Politics

Law as Symbolic Form Deniz Coskun, 2007-07-17 This book describes the rule of law as the reign of persuasion rather than the reign of force and democracy as the reign by persuasion rather than the reign by force It synthesizes a vast amount of current Cassirer literature and makes a contribution to jurisprudence The book is the first systematic elaboration on law as a symbolic form and it sheds new light on a still dark area of intellectual and jurisprudential thought

Leon Battista Alberti and Nicholas Cusanus Charles H. Carman, 2016-04-22 Providing a fresh evaluation of Alberti's text On Painting 1435 along with comparisons to various works of Nicholas Cusanus particularly his Vision of God 1450 this study reveals a shared epistemology of vision And the author argues it is one that reflects a more deeply Christian Neoplatonic ideal than is typically accorded Alberti Whether regarding his purpose in teaching the use of a geometric single point perspective system or more

broadly in rendering forms naturalistically the emphasis leans toward the ideal of Renaissance art as highly rational. There remains the impression that the principle aim of the painter is to create objective even illusionistic images. A close reading of Alberti's text however including some adjustments in translation points rather towards an emphasis on discerning the spiritual in the material. Alberti's use of the tropes Minerva and Narcissus for example indicates the opposing characteristics of wisdom and sense certainty that function dialectically to foster the traditional importance of seeing with the eye of the intellect rather than merely with physical eyes. In this sense these figures also set the context for his and as the author explains Brunelleschi's earlier invention of this perspective system that posits not so much an objective seeing as an opposition of finite and infinite seeing which moreover approximates Cusanus's famous notion of a coincidence of opposites. Together with Alberti's and Cusanus's ideals of vision extensive analysis of art works discloses a ubiquitous commitment to stimulating an intellectual perception of divine essential and unseen realities that enliven the visible material world. **The**

Rhetoric of Perspective Hanneke Grootenboer, 2005 Perspective determines how we as viewers perceive painting. We can convince ourselves that a painting of a bowl of fruit or a man in a room appears to be real by the way these objects are rendered. Likewise the trick of perspective can prevent us from being absorbed in a scene. Connecting contemporary critical theory with close readings of seventeenth century Dutch visual culture *The Rhetoric of Perspective* puts forth the claim that painting is a form of thinking and that perspective functions as the language of the image. Aided by a stunning full color gallery Hanneke Grootenboer proposes a new theory of perspective based on the phenomenological aspects of non narrative still life trompe l'oeil and anamorphic imagery. Drawing on playful and mesmerizing baroque images Grootenboer characterizes what she calls their sophisticated deceit asserting that painting is more about visual representation than about its supposed objects. Offering an original theory of perspective's impact on pictorial representation the act of looking and the understanding of truth in painting Grootenboer shows how these paintings both question the status of representation and explore the limits and credibility of perception. An elegant and honourable synthesis Keith Miller Times Literary Supplement

The Share of Perspective Emmanuel Alloa, 2024-08-02 This book is a defense of perspectivism in the age of post truth. At the crossroads of science art and philosophy it unearths a tradition that we must rediscover: the point of view is not only what divides it is also what is shared. Today perspective is associated with individualism and personal viewpoints. But in an age of post truth the only robust answer to relativism lies in fact in a reappraisal of perspectivism. In discussion with contemporary new realisms of various sorts this book makes a case why perspectivism alone can avoid us falling back into epistemological naiveté. A journey into the history of optics art philosophy and social psychology this book unearths the forgotten tradition of *perspectiva communis* which makes perspective the vector of a common horizon. This book argues that vision is never immediate. Rather to see through is the key to understanding the perspectival operation. We never see by ourselves all seeing must pass through something other than itself through the mediation and the detour of an apparatus or the witness of a third

party Besides the theoretical framework for this new approach to perspective this book presents a series of case studies ranging from innovative interpretations of classical authors and key moments in the history of art from ancient painting trompe l'oeil and Brunelleschi's experiment in Renaissance Florence to the issue of perspective in the work of contemporary artists such as Robert Rauschenberg The Share of Perspective will be of interest to scholars and advanced students working in aesthetics phenomenology art history and the history of sciences Continuity and Change in Art Sidney J. Blatt, Ethel S. Blatt, 2014-04-04 The representation of the form of objects and of space in painting from paleolithic through contemporary time has become increasingly integrated complex and abstract Based on a synthesis of concepts drawn from the theories of Piaget and Freud this book demonstrates that modes of representation in art evolve in a natural developmental order and are expressions of the predominant mode of thought in their particular cultural epoch They reflect important features of the social order and are expressed in other intellectual endeavors as well especially in concepts of science A fascinating evaluation of the development of cognitive processes and the formal properties of art this work should appeal to professionals and graduate students in developmental cognitive aesthetic personality and clinical psychology to psychoanalysts interested in developmental theory and to anyone interested in cultural history especially the history of art and the history of science **Image Beyond the Screen** Daniel Schmitt, Marine Thébault, Ludovic

Burczykowski, 2020-02-19 Videomapping with its use of digital images is an audiovisual format that has gained traction with the creative industries It consists of projecting images onto diverse surfaces according to their geometric characteristics It is also synonymous with spatial augmented reality projection mapping and spatial correspondence Image Beyond the Screen lays the foundations for a field of interdisciplinary study encompassing the audiovisual humanities and digital creation and technologies It brings together contributions from researchers and testimonials from some of the creators technicians and organizers who now make up the many faceted community of videomapping Live entertainment museum urban or event planning cultural heritage marketing industry and the medical field are just a few examples of the applications of this media

Heidegger and the Work of Art History Amanda Boetzkes, 2017-07-05 Heidegger and the Work of Art History explores the impact and future possibilities of Heidegger's philosophy for art history and visual culture in the twenty first century Scholars from the fields of art history visual and material studies design philosophy aesthetics and new media pursue diverse lines of thinking that have departed from Heidegger's work in order to foster compelling new accounts of works of art and their historicity This collected book of essays also shows how studies in the history and theory of the visual enrich our understanding of Heidegger's philosophy In addition to examining the philosopher's lively collaborations with art historians and how his longstanding engagement with the visual arts influenced his conceptualization of history the essays in this volume consider the ontological and ethical implications of our encounters with works of art the visual techniques that form worlds how to think about things beyond human centred relationships the moods dispositions and politics of art's history and

the terms by which we might rethink aesthetic judgment and the interpretation of the visible world from the early modern period to the present day The Practice of Persuasion Keith Moxey, 2018-08-06 This sequel to *The Practice of Theory* stresses the continued need for self reflective awareness in art historical writing Offering a series of meditations on the discipline of art history in the context of contemporary critical theory Moxey addresses such central issues as the status of the canon the nature of aesthetic value and the character of historical knowledge The chapters are linked by a common interest in even fascination with the paradoxical power of narrative and the identity of the authorial voice Moxey maintains that art history is a rhetoric of persuasion rather than a discourse of truth Each chapter in *The Practice of Persuasion* attempts to demonstrate the paradoxes inherent in a genre that while committed to representing the past must inevitably bear the imprint of the present In Moxey's view art history as a discipline is often unable to recognize its status as a regime of truth that produces historically determined meanings and so continues to act as if based on a universal aesthetic foundation His new book should enable art historians to engage with the past in a manner less determined by tradition and more responsive to contemporary values and aspirations *Visuality in the Theatre* M. Bleeker, 2008-04-17 This book presents an exploration of the under explored terrain of visuality demonstrating the use of new theoretical insights into vision for the analysis of theatre and performance and simultaneously shows theatre and performance to be an excellent theoretical object for exploring the cultural historical and embodied character of visuality *The Dialogical Mind* Ivana Marková, 2016-09-01 Dialogue has become a central theoretical concept in human and social sciences as well as in professions such as education health and psychotherapy This dialogical turn emphasises the importance of social relations and interaction to our behaviour and how we make sense of the world hence the dialogical mind is the mind in interaction with others with individuals groups institutions and cultures in historical perspectives Through a combination of rigorous theoretical work and empirical investigation Markov presents an ethics of dialogicality as an alternative to the narrow perspective of individualism and cognitivism that has traditionally dominated the field of social psychology The dialogical perspective which focuses on interdependencies among the self and others offers a powerful theoretical basis to comprehend analyse and discuss complex social issues Markov considers the implications of dialogical epistemology both in daily life and in professional practices involving problems of communication care and therapy
