Quintana Roo Archaeology:

Quintana Roo Archaeology Justine M. Shaw, Jennifer P. Mathews, 2005-11 Mexico's southern state of Quintana Roo is often perceived by archaeologists as a blank spot on the map of the Maya world a region generally assumed to hold little of interest thanks to its relative isolation from the rest of Mexico But salvage archaeology required by recent development along the Maya Riviera along with a suite of other ongoing and recent research projects have shown that the region was critical in connecting coastal and inland zones and it is now viewed as an important area in its own right from Preclassic through post contact times The first volume devoted to the archaeology of Quintana Roo this book reveals a long tradition of exploration and discovery in the region and an increasingly rich recent history of study Covering a time span from the Formative period through the early twentieth century it offers a sampling of recent and ongoing research by Mexican North American and European archaeologists Each of the chapters helps to integrate sites within and beyond the borders of the modern state inviting readers to consider Quintana Roo as part of an interacting Maya world whose boundaries were entirely different from today's In taking in the range of the region the authors consider studies in the northern part of the state resulting from modern development around Cancun the mid state sites of Muyil and Yucop both of which witnessed continual occupations from the Middle Preclassic through the Postclassic and new data from such southern sites as Cerros Lagartera and Chichmuul The contributions consider such subjects as ceramic controversies settlement shifts site planning strategies epigraphic and iconographic materials the impact of recent coastal development and the interplay between ancient historic and modern use of the region Many of the chapters confirm the region as a cultural corridor between Cob and the southern lowland centers and address demographic shifts of the Terminal Classic through Postclassic periods while others help elucidate some of Peter Harrison's Uaymil Survey work of the 1970s *Quintana Roo Archaeology* unfolds a rich archaeological record spanning 2 500 years depicting the depth and breadth of modern archaeological studies within the state It is an important touchstone for Maya and Mesoamerican archaeologists demonstrating the shifting web of connections between Quintanarooense sites and their neighbors and confirming the need to integrate this region into a broader understanding of the ancient Maya

Quintana Roo Archaeology Justine M. Shaw, Jennifer P. Mathews, 2022-08-23 Mexico's southern state of Quintana Roo is often perceived by archaeologists as a blank spot on the map of the Maya world a region generally assumed to hold little of interest thanks to its relative isolation from the rest of Mexico But salvage archaeology required by recent development along the Maya Riviera along with a suite of other ongoing and recent research projects have shown that the region was critical in connecting coastal and inland zones and it is now viewed as an important area in its own right from Preclassic through post contact times The first volume devoted to the archaeology of Quintana Roo this book reveals a long tradition of exploration and discovery in the region and an increasingly rich recent history of study Covering a time span from the Formative period through the early twentieth century it offers a sampling of recent and ongoing research by

Mexican North American and European archaeologists Each of the chapters helps to integrate sites within and beyond the borders of the modern state inviting readers to consider Quintana Roo as part of an interacting Maya world whose boundaries were entirely different from today's In taking in the range of the region the authors consider studies in the northern part of the state resulting from modern development around Cancun the mid state sites of Muyil and Yucalpeten both of which witnessed continual occupations from the Middle Preclassic through the Postclassic and new data from such southern sites as Cerros Lagartera and Chichmuul The contributions consider such subjects as ceramic controversies settlement shifts site planning strategies epigraphic and iconographic materials the impact of recent coastal development and the interplay between ancient historic and modern use of the region Many of the chapters confirm the region as a cultural corridor between Cobol and the southern lowland centers and address demographic shifts of the Terminal Classic through Postclassic periods while others help elucidate some of Peter Harrison's Uaymil Survey work of the 1970s Quintana Roo Archaeology unfolds a rich archaeological record spanning 2500 years depicting the depth and breadth of modern archaeological studies within the state It is an important touchstone for Maya and Mesoamerican archaeologists demonstrating the shifting web of connections between Quintanarooense sites and their neighbors and confirming the need to integrate this region into a broader understanding of the ancient Maya

A Preliminary Study of the Ruins of Xcaret, Quintana Roo, Mexico, with Notes on Other Archaeological Remains on the Central East Coast of the Yucatan Peninsula Edward Wyllys Andrews, Anthony P. Andrews, 1975

The Maya of the Cochuah Region Justine M. Shaw, 2015-12-01 In recent years the Cochuah region the ancient breadbasket of the north central Yucatecan lowlands has been documented and analyzed by a number of archaeologists and cultural anthropologists This book the first major collection of data from those investigations presents and analyzes findings on more than eighty sites and puts them in the context of the findings of other investigations from outside the area It begins with archaeological investigations and continues with research on living peoples Within the archaeological sections historic and colonial chapters build upon those concerned with the Classic Maya revealing the ebb and flow of settlement through time in the region as peoples entered left and modified their ways of life based upon external and internal events and forces In addition to discussing the history of anthropological research in the area the contributors address such issues as modern women's reproductive choices site boundary definition caves as holy places settlement shifts and the reuse of spaces through time

The Archaeology of Muyil, Quintana Roo, Mexico Walter Robert Thurmond Witschey, 1992

Heritage Or Heresy Cameron Jean Walker, 2009-01-08 How can we effectively interpret and present one culture to another without stereotypes or over simplifications What is the best way to present an authoritative version of a national heritage without also endangering ancient sites or being insensitive to the local customs beliefs and religious practices of the indigenous peoples This volume addresses the ongoing thrust in archaeology to take the next step after preserving the past interpreting that past for the future That future audience includes both local citizens and tourists who may have little

background in archaeology anthropology or the history of the culture featured Walker presents the key components of the anthropological study of tourism as a global phenomenon with particular emphasis on the more prominent arguments for how and why tourism is a universal and meaningful human activity The highly controversial topic of authenticity is examined with special attention given to how authentic has been defined and how it relates to the ways in which archaeological sites artifacts and cultural traditions are presented or not presented to the visiting public The ephemeral promise of authenticity drives the heritage tourism industry which is a key consideration for the long term economy of the Maya Riviera and elsewhere Through analysis of seven archaeological sites on the Yucatan peninsula that are open to heritage touring Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of international tourism on both ancient structures and the contemporary Maya people and culture

The Ancient Maya of Mexico Geoffrey E. Braswell, 2014-10-14 The archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands However such advances have been under represented in both scholarly and popular literature until now The Ancient Maya of Mexico presents the results of new and important archaeological epigraphic and art historical research in the Mexican states of Yucatan Campeche and Quintana Roo Ranging across the Middle Preclassic to the Modern periods the volume explores how new archaeological data has transformed our understanding of Maya history The Ancient Maya of Mexico will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society rituals and economic organisation of the Maya region

Archaeological Reconnaissance in Campeche, Quintana Roo, and Peten Karl Ruppert, John Hopkins Denison, 1943 Archaeological Reconnaissance in Campeche, Quintana Roo, and Peten Karl Ruppert, John H. Denison, Jr., *The Archaeology of Maritime Landscapes* Ben Ford, 2011-05-21 Maritime cultural landscapes are collections of submerged archaeological sites or combinations of terrestrial and submerged sites that reflect the relationship between humans and the water These landscapes can range in size from a single beach to an entire coastline and can include areas of terrestrial sites now inundated as well as underwater sites that are now desiccated However what binds all of these sites together is the premise that each aspect of the landscape cultural political environmental technological and physical is interrelated and can not be understood without reference to the others In this maritime cultural landscape approach individual sites are treated as features within the larger landscape and the interpretation of single sites add to a larger analysis of a region or culture This approach provides physical and theoretical links between terrestrial and underwater archaeology as well as prehistoric and historic archaeology consequently providing a framework for integrating such diverse topics as trade resource procurement habitation industrial production and warfare into a holistic study of the past Landscape studies foster broader perspectives and approaches extending the study of maritime cultures beyond the shoreline Despite this potential the archaeological study of maritime

landscapes is a relatively untried approach with many questions regarding the methods and perspectives needed to effectively analyze these landscapes The chapters in this volume which include contributions from the United States the United Kingdom Norway and Australia address many of the theoretical and methodological questions surrounding maritime cultural landscapes The authors comprise established scholars as well as archaeologists at the beginning of their careers providing a healthy balance of experience and innovation The chapters also demonstrate parity between method and theory where the varying interpretations of culture and space are given equal weight with the challenges of investigating both wet and dry sites across large areas The View from Yalahau Scott L. Bioarchaeology of Pre-Columbian Mesoamerica Cathy Willermet,Andrea Cucina,2018-09-03 This volume offers a novel interdisciplinary view of the migration mobility ethnicity and social identities of pre Columbian Mesoamerican peoples In studies that combine bioarchaeology ethnohistory isotope data and dental morphology contributors demonstrate the challenges and rewards of such integrative work when applied to large regional questions of population history The essays in this volume are the results of fieldwork in Honduras Belize and a variety of sites in Mexico One chapter uses dental health data and burial rituals to investigate the social status of sacrificial victims during the Late Classic period Another analyzes skeletal remains from multiple research perspectives to explore the immigrant makeup of the multiethnic city of Copan Contributors also use strontium and oxygen isotope data from tooth enamel and dental morphological traits to test hypotheses about migration and they incorporate ethnohistorical sources in an examination of ancient Maya understandings of belonging and otherness Revealing how complementary fields of study can together create a better understanding of the complex forces that impact population movements this volume provides an inspiring picture of the exciting collaborative work currently under way among researchers in the region A volume in the series Bioarchaeological Interpretations of the Human Past Local Regional and Global Perspectives edited by Clark Spencer Larsen **Archaeology and Tourism** Dallen J. Timothy,Lina G. Tahan,2020-06-10 This book provides a global and thematic examination of the relationships between archaeology and tourism and a critical analysis of thinking in the area of archaeology based tourism It focuses on the differences and similarities between archaeology based tourism and heritage tourism and highlights the interdependence and dissonance between tourism and archaeology and archaeological traditions The volume offers a systematic investigation of current issues and implications in the relationship between tourism and archaeology from both tourism and archaeological perspectives It is a key academic resource for students researchers and practitioners in tourism archaeology cultural heritage management and anthropology **An Archaeological Reconnaissance of Northern Quintana Roo** William T. Sanders,1955 **Maya Archaeology and Ethnohistory** Norman Hammond,Gordon R. Willey,2014-04-15 Embracing a wide range of research this book offers various views on the intellectual history of Maya archaeology and ethnohistory and the

processes operating in the rise and fall of Maya civilization The fourteen studies were selected from those presented at the Second Cambridge Symposium on Recent Research in Mesoamerican Archaeology and are presented in three major sections The first of these deals with the application of theory both anthropological and historical to the great civilization of the Classic Maya which flourished in the Yucatan Guatemala and Belize during the first millennium A D The structural remains of the Classic Period have impressed travelers and archaeologists for over a century and aspects of the development and decline of this strange and brilliant tropical forest culture are examined here in the light of archaeological research The second section presents the results of field research ranging from the Highlands of Mexico east to Honduras and north into the Lowland heart of Maya civilization and iconographic study of excavated material The third section covers the ethnohistoric approach to archaeology the conjunction of material and documentary evidence Early European documents are used to illuminate historic Maya culture This section includes transcriptions of previously unpublished archival material Although not formally linked beyond their common field of inquiry the essays here offer a conspectus of late twentieth century Maya research and a series of case histories of the work of some of the leading scholars in the field

The Archaeology of Yucatán: New Directions and Data Travis W. Stanton, 2014-10-10 This volume was conceived to provide a forum for Mexican and foreign scholars to publish new data and interpretations on the archaeology of the northern Maya lowlands specifically the State of Yucatán

Archaeology and Bioarchaeology of Population Movement among the Prehispanic Maya Andrea Cucina, 2014-11-17 Archaeological evidence i e presence of exogenous foreign material objects pottery obsidian and so on is used to make inferences on ancient trade while population movement can only be assessed when the biological component of an ancient community is analyzed i e the human skeletal remains But the exchange of goods or the presence of foreign architectural patterns does not necessarily imply genetic admixture between groups while at the same time humans can migrate for reasons that may not be related only to trading The Prehispanic Maya were a complex highly stratified society During the Classic period city states governed over large regions establishing complex ties of alliance and commerce with the region's minor centers and their allies against other city states within and outside the Maya realm The fall of the political system during the Classic period the Maya collapse led to hypothetical invasions of leading groups from the Gulf of Mexico into the northern Maya lowland at the onset of the Postclassic However it is still unclear whether this collapse was already underway when this movement of people started The whole picture of population dynamics in Maya Prehispanic times during the Classic and the Postclassic can slowly emerge only when all the pieces of the puzzle are put together in a holistic and multidisciplinary fashion The contributions of this volume bring together contributions from archaeology archaeometry paleodemography and bioarchaeology They provide an initial account of the dynamic qualities behind large scale ancient population dynamics and at the same time represent novel multidisciplinary points of departure towards an integrated reconstruction and understanding of Prehispanic population dynamics in the Maya
