The Complete Works of H. P. Blavatsky. Works of Henry S. Olcott. Illustrated** H. P. Blavatsky, Henry S. Olcott, Fyodor Dostoyevsky, 2025-02-26 Theosophy is a religion established in the United States during the late 19th century It was founded primarily by the Russian Helena Blavatsky and draws its teachings predominantly from Blavatsky s writings Categorized by scholars of religion as both a new religious movement and as part of the occultist stream of Western esotericism it draws upon both older European philosophies such as Neoplatonism and Asian religions such as Hinduism and Buddhism At a meeting of the Miracle Club in New York City on 7 September 1875 Blavatsky Olcott and Judge agreed to establish an organisation with Charles Sotheran suggesting that they call it the Theosophical Society Prior to adopting the name Theosophical they had debated various potential names among them the Egyptological Society the Hermetic Society and the Rosicrucian Society The term was not new but had been previously used in various contexts by the Philaletheians and the Christian mystic Jakob B hme Etymologically the term came from the Greek theos god s and sophia wisdom thus meaning god wisdom divine wisdom or wisdom of God The term theosophia appeared in both Greek and Latin in the works of early church fathers as a synonym for theology In her book The Key to Theosophy Blavatsky said that the term Theosophy had been coined by the Alexandrian philosophers especially Ammonius Saccas Contents H P Blavatsky ISIS UNVEILED FROM THE CAVES AND JUNGLES OF HINDOSTAN WHAT IS THEOSOPHY WHAT ARE THE THEOSOPHISTS MAHATMAS AND CHELAS OCCULT OR EXACT SCIENCE THE ESOTERIC CHARACTER OF THE GOSPELS OCCULTISM VERSUS THE OCCULT ARTS IS THEOSOPHY A RELIGION THE VOICE OF THE SILENCE THE KEY TO THEOSOPHY THE SECRET DOCTRINE ADVENTURE AMONG THE ROSICRUCIANS THE GRAND INQUISITOR Translated by H P Blavatsky Henry Steel Olcott THE LIFE OF BUDDHA AND ITS LESSONS THE BUDDHIST CATECHISM THE GOLDEN RULES OF BUDDHISM THE SPIRIT OF ZOROASTRIANISM An Outline of the Principles of Modern Theosophy Claude Falls Wright, 1894 **The Origins of Self-Consciousness in The Secret Doctrine** H. P. Blavatsky, 2009 Any attempt to explain the mysterious connections between consciousness and matter and self consciousness in particular necessarily involves much complexity Because all levels of relative reality are present here and now the human being embodies the whole hierarchy of the cosmos a microcosm of the macrocosm to use an insightful Renaissance expression Besides the physical human body there is the dynamic structural plan of that body called the astral body the desire nature the life force that permeates all living creatures consciousness involved in sense perception and practical operations consciousness capable of universal thought and awareness and pure consciousness manifest in pristine intuition Above these six principles of human nature broods the

luminous spirit called the Atman Many people are seldom aware of anything more in themselves than the first five of these principles although many also have intuitive glimpses of universal understanding often as transcendent experiences which cannot be sustained Because understanding cannot be separated from experience and experience cannot be divorced from the way we live think feel and have our being various spiritual traditions have offered practices to nurture these inner awakenings to our higher natures and to a greater awareness of spiritual reality Theosophy connects together how we live our lives what we think and how we focus our attention the bold exploration of our inner natures how we react to what comes to us karma and how we can build depth of awareness across lifetimes with Enlightenment Theosophy therefore connects ethics and action including both physical action in the world and the action of our own thoughts Where we are ignorant of all the dimensions of our circumstances and short of Enlightenment we are all ignorant motive for thought and action is fundamental for altering one's karmic trajectory and future incarnations The selections from *The Secret Doctrine* in this book are gathered with a focus on the consciousness exhibited in Nature its origin and destiny and on human self consciousness in particular This book therefore explores one vital current in the Ocean of Wisdom that is Theosophy A thoughtful and persistent reading of these texts will radically transform one's understanding of the unity of self consciousness and the world around us and of one's place in the greater scheme of things

Evolution And Intelligent Design in the Secret Doctrine
Editorial Board of Theosophy Trust, 2006 The pendulum of thought oscillates between extremes Having now finally emancipated herself from the shackles of theology Science has embraced the opposite fallacy and in the attempt to interpret Nature on purely materialistic lines she has built up that most extravagant theory of the ages the derivation of man from a ferocious and brutal ape So rooted has this doctrine in one form or another now become that the most Herculean efforts will be needed to bring about its final rejection The Darwinian anthropology is the incubus of the ethnologist a sturdy child of modern Materialism which has grown up and acquired increasing vigour as the ineptitude of the theological legend of Man's creation became more and more apparent It has thriven on account of the strange delusion that as a scientist of repute puts it All hypotheses and theories with respect to the rise of man can be reduced to two the Evolutionist and the Biblical exoteric account There is no other hypothesis conceivable The anthropology of the secret volumes is however the best possible answer to such a worthless contention *The Secret Doctrine* ii 689
