Rescued By Europe:

At Europe's Edge Cetta Mainwaring, 2019 This book examines clandestine migrant journeys across the Mediterranean Sea and into Europe It combines ethnographic focus with macro level analyses of EU and national migration policies and practices It draws on the case study of Malta and pushes the boundaries of our knowledge of the global politics of migration asylum and border security

Rescue of Business in Europe Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30 This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016 The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses Although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures

The European Rescue of the Nation State Alan Milward, 1999-12-16 Newly revised and updated this second edition is the classic economic and political account of the origins of the European Community book offers a challenging interpretation of the history of the western European state and European integration

The War on Rescue William Plowright, 2024-12-15 The War on Rescue documents how governments block assistance to people in times of crisis Focusing on the European Migration Crisis of 2015-2022 to address the reasons why governments do this William Plowright discusses the strategies employed that prevent suffering people from receiving help The European Migration Crisis motivated people around the world to offer assistance to needy refugees and migrants across Europe the Mediterranean and North Africa Both large and small organizations rushed to bring food medical care and rescue to those stranded at sea However many European governments sought to prevent humanitarian assistance and deny safe haven to the desperate Boats filled with those rescued were blocked from harbors activists were arrested and staff were threatened some faced violence The War on Rescue adds to social science understanding of and explanations for humanitarian assistance and the reasons why governments obstruct rescue efforts

The European Rescue of the Franco Regime, 1950-1975 Fernando Guirao, 2021-01-21 The European Rescue of the Franco Regime 1950-1975 explores how the governments of the founding members of the European Coal and Steel Community and the European Economic Community acting collectively via the European Communities assisted in the consolidation of the Franco regime It explains how the Six the Nine after 1972 implemented a set of policy measures that facilitated the subsistence of the Franco regime proving that trade with the Six improved Spain's overall economic performance which in turn secured Franco's rule The Six

provided the Spanish economy with a stable supply of essential raw materials and capital goods and with outlet markets for the country's main export commodities. Through these mechanisms the European Communities assisted Spanish economic development and supported the stabilization of the non-democratic political regime ruling Spain. The Franco regime was never threatened by European integration and the Six Nine managed to isolate meaningful Community negotiations with Spain from mounting political disturbance. The European Rescue of the Franco Regime 1950-1975 shows that without unremitting material assistance from Western Europe it would have been considerably more challenging for the Franco regime to attain the stability that enabled the dictator to maintain his rule until he died peacefully at 82 years old.

Unravelling Europe's 'Migration Crisis' Crawley, Heaven, Duvell, Franck, Katharine Jones, Simon McMahon, Nando Sigona, 2018. The past few years have seen an unprecedented mass migration to Europe as refugees from war and poverty throughout North Africa and the Middle East have embarked on perilous journeys across the Mediterranean in the hope of being allowed to start new lives in Europe. This book draws on more than five hundred firsthand accounts to reveal the human story behind the statistics and demagoguery. What is it like to set out for Europe with your family knowing the dangers you face on the way? Why are so many people willing to risk their lives crossing the Mediterranean? What are their hopes and fears? And why is Europe one of the richest regions of the world unable to cope? More than just telling a human story, Heaven, Crawley and colleagues provide a framework for understanding the dynamics underpinning the current wave of migration and challenging politicians, policy makers and the media to rethink their understanding of why and how people move.

Increasing Legal Rights for Zoo Animals Jesse Donahue, 2017-04-12. We are on the precipice of momentous legal changes for animals that may soon give some of them rights of personhood and citizenship. Companion animals in particular are gaining rights to public representation in government, access to housing, inheritance and increased protection through the criminal justice system. Nonhuman primates used as research subjects are also gaining limited rights of personhood in some countries. This book examines how zoo animals could benefit from that revolution as well. Reviewing zoo law and politics in the United States, New Zealand and Southeast Asia, scholars and zoo directors grapple with how the current law in those regions of the world impacts zoo animals and how it could be changed to serve them better. They discuss the ways in which zoo animals could benefit from some reworked companion animal law in the United States, the challenges of reintroductions and their legal barriers, how we can extend ideas of human research subject rights to zoo animal research, the stark problems of too few animal welfare laws in South East Asia, the need for a central governing body focused solely on exotic captive animals in New Zealand and the need for stricter laws preventing the exotic pet problem that is increasingly affecting both zoos and sanctuaries. The book starts a dialogue that moves the scholarship about zoos beyond a general discussion of ethics to a concrete dialogue and set of suggestions about how to extend legal rights to this group of animals.

Human Security and Migration in Europe's Southern Borders Susana Ferreira, 2018-12-13. This book examines the

management of migratory flows in the Mediterranean within an international security perspective The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union s immigration and asylum policies and its ability to respond to humanitarian crises Moreover these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states By using Spain and Italy as case studies the author theorizes that the EU given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border uses a deterrence strategy based on minimum common denominators

The Myth of Rescue W.D. Rubinstein,2002-01-22 It has long been argued that the Allies did little or nothing to rescue Europe s Jews Arguing that this has been consistently misinterpreted The Myth of Rescue states that few Jews who perished could have been saved by any action of the Allies In his new introduction to the paperback edition Willliam Rubinstein responds to the controversy caused by his challenging views and considers further the question of bombing Auschwitz which remains perhaps the most widely discussed alleged lost opportunity for saving Jews available to the Allies

The European Miracle E. L. military analysis Mann offers new insight into the many consequences of choosing war
