New Models of Care for Patients with Severe Mental Illness - Bridging In- and Outpatients Martin Heinze, Yasser Khazaal, Alexandre Wulschleger, 2018-03-13 Over the past

years psychiatric services have been continuously faced with the challenge of providing comprehensive care to people suffering from severe mental illnesses. Legal and conceptual advances like the UN convention on the rights of persons with disabilities or the concept of recovery have rendered this challenge more actual and urgent than ever. However, psychiatric institutions often show only low levels of cooperation and integration between their different services. Hence, they need to develop new ways of bridging all sectors of care in order to help people most in need on their way to recovery and full inclusion in society. In this research topic, European researchers and clinicians present new ways of dealing with this essential issue by developing strategies and interventions on both institutional and non-institutional levels. The nine contributions of this ebook thus reflect actual clinical and conceptual considerations. They all aim at improving quality of care and providing adequate support to people suffering from severe mental illness. Handbook of Psychopathy Christopher J.

Patrick, 2018-04-23 Widely considered the go-to reference and now extensively revised with over 65% new material, this authoritative handbook surveys the landscape of current knowledge on psychopathy and addresses essential clinical and applied topics. Leading researchers explore major theoretical models, symptomatology, and diagnostic subtypes, assessment methods, developmental pathways, and causal influences from genes and neurobiology to environmental factors. The volume examines manifestations of psychopathy in specific populations as well as connections to antisocial behavior and recidivism. It presents contemporary perspectives on prevention and treatment and discusses special considerations in clinical and forensic practice. New to This Edition: Extensively revised with more than a decade's theoretical, empirical, and clinical advances. Many new authors and topics. Expanded coverage of phenotypic facets with chapters on behavioral disinhibition, callous-unemotional traits, and boldness. Chapters on DSM-5 clinical interviewing, cognitive and emotional processing, and serial murder. Significantly updated coverage of etiology, assessment methods, neuroimaging research, and adult and juvenile treatment approaches. *Psychiatry* Allan Tasman, Jerald Kay, Jeffrey A.
