Long Term Retention Of Knowledge And Skills:

The Long-Term Retention of Knowledge and Skills Marshall J. Farr, 2012-12-06 A INTRODUCTION AND BACKGROUND
2 This report reviews and interprets research on the nature and magnitude of the effects of those factors which influence how well knowledge and skills K 1 I am indebted to Dr Jesse Orlansky Institute for Defense Analyses for his encouragement and guidance through all phases of this report *The Long-Term Retention of Knowledge and Skills* Marshall J Farr, 1987-06-01 **The Long-Term Retention of Knowledge and Skills**, 1998 We received three classes of guidelines we found to optimize long term retention The first class concerned ways to optimize the conditions of training We discussed three general guidelines in this class The first concerned the contextual interference found for example with random sequences of tasks as opposed to fixed or predictable sequences The second concerned training parts of a task versus the whole task The third concerned the distinction between generating and reading The second class of guidelines concerned ways to optimize the strategies used We found that in tasks that require deliberate retrieval from memory training that promotes efficient encoding strategies maximizes long term retention The third class of guidelines concerned ways to attain direct access or automatic retrieval from memory We found in several domains that achieving automaticity requires extensive practice Further even when retrieval appears automatic after extensive practice mediators may still continue to exert their influence **Learning and Memory of Knowledge and Skills** Alice F. Healy, Lyle E. Bourne, 1995 By analyzing the results of experiments that use a wide variety of training tasks including those that were predominantly perceptual cognitive or motoric this volume answers such questions as Why do some people forget certain skills faster than others What kind of training helps people retain new skills longer Inspired by the work of Harry Bahrick and the concept of permastore the contributors explore the Stroop effect mental calculation vocabulary retention contextual interference effects autobiographical memory and target detection They also summarize an investigation on specificity and transfer in choice reaction time tasks In each chapter the authors explore how the degree to which reinstatement of training procedures during retention and transfer tests accounts for both durability and specificity of training Researchers and administrators in education and training will find important implications in this book for enhancing the retention of knowledge of skills You have to read this book Anyone interested in training will want to read it This book provides the theoretical bases of the acquisition of durable skills for the next decade It advances and demonstrates a new principle of skill learning that will prove to be as important as the encoding specificity principle and its corollary the principle of transfer appropriate processing This new principle is that highly practiced skill learning will be durable when the retention test embodies the procedures employed during acquisition This principle and the other important findings reported in this text will have a great impact on the evolution of memory theory and on the wide range of applications Douglas Hermann University of Maryland The Oxford Handbook of Memory Endel Tulving, Fergus I. M. Craik, 2005-05-05 The strengths and weaknesses of human memory

The Acquisition of Knowledge and Skills for Taskwork and Teamwork to Control Complex Technical Systems Annette Kluge,2014-05-05 This book provides the first comprehensive literature review on the acquisition and retention of complex skills in High Reliability Organizations Based on this review it introduces a theoretical model of how skill and knowledge acquisition for complex tasks is accomplished and shows how this model can be used to derive training methods and instructional techniques Successful acquisition and retention of complex technical skills within High Reliability Organizations requires a full understanding of the learning process knowledge structure and skill requirements associated with the effective operation and management of technology For researchers and for organizations the understanding of these processes is vital for designing training programs as well as for reducing errors with severe consequences for human lives and the environment Until now only theoretical fragments exist on this topic and only a very limited number of publications actually address complex tasks in vocational occupational settings The Acquisition of Knowledge and Skills for Task Work and Teamwork to Control Complex Technical Systems uses its literature overview and theoretical model to formulate training principles that can be used to develop training experiments for further empirical investigations as well as training methods for applied organizational contexts
