Longterm Stewardship And The Nuclear Weapons Complex:

Long-Term Stewardship and the Nuclear Weapons Complex Katherine N. Probst, Michael H. McGovern, 2014-04-04

Decades of U S nuclear weapons production have exacted a heavy environmental toll The Department of Energy estimates that cleaning up waste and contamination resulting from production activities will cost over 150 billion Yet even once that money is spent these sites will need long term attention to assure protection of human health and the environment In the authors words stewardship refers to institutions information and strategies needed to ensure protection of people and the environment both in the short and the long term Probst and McGovern make a compelling case for establishing a formal program of long term stewardship for contaminated sites Their report details the requirements of a successful stewardship program and discusses the daunting technical and political challenges facing such efforts including the designation of an institutional home for key stewardship functions The legacy of environmental damage is considerable hazardous waste disposal radioactive waste and contaminated facilities are among the problems that will remain after DOE cleanup efforts are complete Stewardship planning according to Probst and McGovern must start now *106-2 Hearings: Energy And Water Development Appropriations For 2001, Part 6, March 21, 2000*, 2000 **Forum for Applied Research and Public Policy**

Management of Long Term Radiological Liabilities International Atomic Energy Agency, 2006 Experience in IAEA member states has often shown that sites with radiation legacies cannot be remediated to residual levels of radioactivity below concern and so cannot be released for unrestricted use Residual contamination buried wastes and other hazards may remain after cleanup is complete for several reasons including technical limitations economic feasibility worker health and safety issues This publication deals with the key conceptual managerial and technical issues involved in the maintenance of institutional control over sites for prolonged periods of time possibly for hundreds or even thousands of years The management of sites with such long term radiological liabilities is often referred to as stewardship Resources, 1996

Half-Truths Barbara Rose Johnston, 2007-03-19 A collection of papers by activists and anthropologists reveals the devastating complex and long term environmental health problems afflicting the people who worked in uranium mining and processing lived in regions dedicated to the construction of nuclear weapons or participated often unknowingly in radiation experiments The nations and individuals many of them members of indigenous or ethnic minority communities are now demanding information about how the United States and the Soviet Union poisoned them and meaningful remedies for the damage done to them and the generations to come Environmental Law: Hazardous wastes and substances William H. Rodgers, 1986 *Environmental Law Reporter*, 2002 *The New Republic* Herbert David Croly, 1998 *Hanford* R. E. Gephart, 2003 In *Hanford A Conversation About Nuclear Waste and Cleanup* Roy Gephart takes us on a journey through a world of facts values conflicts and choices facing the most complex environmental cleanup project in the United States the U S Department of Energy s Hanford Site Starting with the top secret Manhattan Project Hanford was used to create tons of plutonium for nuclear weapons Hundreds of tons of waste and millions of curies remain In an easy to read illustrated text Gephart crafts the story of Hanford becoming the world s first nuclear weapons site to release large amounts of contaminants into the environment This was at a time when radiation biology was in its infancy industry practiced unbridled waste dumping and the public trusted what it was told Hanford history reveals how little we sometimes understand events when caught inside of them The plutonium market stalled with the end of the Cold War Public accountability and environmental compliance ushered in a new cleanup mission Today Hanford is driven by remediation choices whose outcomes remain uncertain It s a story whose epilogue will be written by future generations This book is an information resource written for the general reader as well as the technically trained person It provides an overview of Hanford and cleanup issues facing the nuclear weapons complex Each chapter is a topical mini series It s an idea guide that encourages readers to be informed consumers of Hanford news and to recognize that knowledge high ethical standards and social values are at the heart of coping with nuclear waste Hanford history is a window into many environmental conflicts facing our nation it s about building upon success and learning from failure And therein lies a key lesson when powerful interests are involved no generation is above pretense
