Macroeconomic Problems Of Transformation Stabilization Policies And Economic Restructuring:

Macroeconomic Problems of Transformation Hansjörg Herr, Silke Tober, Andreas Westphal, 1994 In *Macroeconomic Problems of Transformation* a distinguished group of economists examines the cause of the dramatic output collapse in the transforming economies of Eastern Europe and formulates policies to promote economic recovery Drawing on scholarship from East and West this book features discussion of such important aspects of the transformation process as the role of monetary policy fiscal crises exchange rate policies and privatization In particular several authors stress the importance of dealing with the distortions still existing in financial sectors and argue that export led growth may be a potential driving force of accumulation in the economies currently in transition The causes and consequences of the current fiscal crises are analysed as are the processes of wage formation and privatization in each case combining theoretical insight with empirical findings from the transforming economies Later papers make comparisons with the reconstruction after the Second World War discuss the effects of different exchange rate policies and consider the role of Western economies in promoting growth in Central and Eastern Europe

Exchange-Rate Policies For Emerging Market Economies Richard J Sweeney, 2019-03-13 With the loss of Soviet control in Central and Eastern Europe as well as the move toward economic liberalization in many developing countries a huge increase in the number of convertible currencies in the world has occurred A key aspect of the management of these currencies involves their relationships with the world economy which is determined

The Macroeconomics of Transition Andrzej Kondratowicz, Jan Winiecki, 2005-08-18 How successful has the transition to market economies proved in East Central Europe The decision by the East European countries to move to market economies was accompanied by much hypothesising and expounding of economic theories However now that the initial euphoria has passed it is time for a rational assessment of this transition and the success of those theories in practice Since the more economically advanced countries are situated in East Central Europe Jan Winiecki and Andrzej Kondratowicz have focused their study on Czechoslovakia Hungary Poland and former Yugoslavia The authors present a systematic account

of macroeconomic developments and institutional changes They assess progress dealing with the determinants of output macro policies wage price and employment issues and the external balance *The Bulgarian Economy in Transition* John A. Bristow,1996 Traces economic developments since 1989 Includes a discussion of political and economic issues from the mid 1940s to mid 1989 Politics and Finance Gretchen Ruth Rodkey,1996 *Problems of Economic and Political Transformation in the Balkans* Ian Jeffries,1996 Provides an assessment of the problems of transformation in the Balkan countries covering topics on both politics and economics The book gives an overview of the problems of transition and also country specific coverage including Albania Bulgaria Romania and the former Yugoslavia **Macroeconomic Analysis and Stabilization Policy** Stephen J. Turnovsky,1977-08-04 The main focus of this book is the construction and analysis of an integrated macroeconomic model **After the Market Shock** Maciej Perczyński,J. A. Kregel,Egon Matzner,1994 *Coordinating Stabilization and Structural Reform* Mr.Richard C. Bart,Mr.Chorng-Huey Wong,Mr.Alan Roe,1994-09-15 This seminar volume edited by Richard C Barth Alan R Roe and Chorng Huey Wong presents an overview of the links between structural and macroeconomic policies that were addressed in an IMF Institute seminar held in Washington D C in 1993 The most important areas of structural reform are covered the price system tax and expenditure policy exchange rate management external trade public enterprises the financial sector and social safety nets Four case studies are presented China Poland Argentina and the Gambia *Lessons from the Economic Transition* Salvatore Zecchini,2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be In this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 No other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems It is this transformation that has come to define the transition Early in the transformation process in November 1990 with the support of the Centre for Co operation with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries About six years have gone by and a new economic landscape has emerged in that part of the world The difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future **The Global Monetary System After the Fall of the Soviet Empire** Miklós Szabó-Pelsőczy,1995 This book is a collection of papers presented at a conference held at Castle Szirak Hungary in memoriam of Robert Triffin the Belgian American economist who taught at Yale 1958 1977 From 1946 almost to his death he was a leading contributor to
