Macrohistory Essays In The Sociology Of The Long Run:

Macrohistory Randall Collins,1999 Explores the accomplishments of the golden age of macrohistory the sociologically informed analysis of long term patterns of political economic and social change The topics range from the Marxian inspired theory of revolutions to the roots of the Holocaust The Institutional Dynamics of Culture, Volumes I and II Perri Six,2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences **Hannah Arendt, Totalitarianism, and the Social Sciences** Peter Baehr,2010-03-11 This book examines the nature of totalitarianism as interpreted by some of the finest minds of the twentieth century It focuses on Hannah Arendt s claim that totalitarianism was an entirely unprecedented regime and that the social sciences had integrally misconstrued it A sociologist who is a critical admirer of Arendt Baehr looks sympathetically at Arendt s objections to social science and shows that her complaints were in many respects justified Avoiding broad disciplinary endorsements or dismissals Baehr reconstructs the theoretical and political stakes of Arendt s encounters with prominent social scientists such as David Riesman Raymond Aron and Jules Monnerot In presenting the first systematic appraisal of Arendt s critique of the social sciences Baehr examines what it means to see an event as unprecedented Furthermore he adapts Arendt and Aron s philosophies to shed light on modern Islamist terrorism and to ask whether it should be categorized alongside Stalinism and National Socialism as totalitarian

Acceleration of History Alexios Alecou,2016-09-30 We willingly imagine that the speed of development of events has always remained constant here on earth This is reflected in the fact that it is generally believed that the rate of natural phenomena is the same today as it has always been in the past and will remain this way more or less in the future It is now a fact that the speed of progression of events is not constant over time It was ascertained that since around the beginning of the 20th century the rate has accelerated in various fields hence the term acceleration of history came to describe this phenomenon This acceleration continues its course today and will even intensify Examples meeting these historical vaults in short time periods are many either local or international that contributed to the change of the direction of history Under any circumstances though the mature conditions for change are not enough without the human interference This phenomenon has been referred to as the acceleration of history in order to emphasize the fact that if in the past a certain lapse of time was necessary for history to unfold for the events to take place today and starting around the beginning of the 20th century this time lapse was becoming increasingly shorter The events today therefore have intensified much more than in the past So which are considered as the main acceleration periods in history Which events or developments de normalized or deeply reformed the then acceptable norms either national or international Which events or developments changed the hard bits of history These are the questions that we will try to answer in this edited volume

Faith as an Option Hans Joas, 2014-09-03 Many people these days regard religion as outdated and are unable to understand how believers can intellectually justify their faith Nonbelievers have long assumed that progress in technology and the sciences renders religion irrelevant Believers in contrast see religion as vital to society's spiritual and moral well being But does modernization lead to secularization Does secularization lead to moral decay Sociologist Hans Joas argues that these two supposed certainties have kept scholars from serious contemporary debate and that people must put these old arguments aside in order for debate to move forward The emergence of a secular option does not mean that religion must decline but that even believers must now define their faith as one option among many In this book Joas spells out some of the consequences of the abandonment of conventional assumptions for contemporary religion and develops an alternative to the cliché of an inevitable conflict between Christianity and modernity Arguing that secularization comes in waves and stressing the increasing contingency of our worlds he calls upon faith to articulate contemporary experiences Churches and religious communities must take into account religious diversity but the modern world is not a threat to Christianity or to faith in general On the contrary Joas says modernity and faith can be mutually enriching

The Lopsided Spread of Christianity Robert L. Montgomery, 2001-10-30 Comparing the spread of Christianity to the East to its more successful spread to the West Montgomery illustrates the uneven diffusion of one of the

world's most influential and successful religions Through his sociological analysis the author examines the causes for Christianity's success to the West and its relative failings in major societies to the east of Jerusalem including India Persia and China Applying five variables including Christianity's missionary orientation geography intersocietal relations sociocultural structures and individual perceptions Montgomery provides a theory of the diffusion of religion in general and of Christianity in particular Beginning by laying out the variables he will apply to the study Montgomery carefully explains his approach introducing the reader to this unique field of study He then moves on to examine Christianity's earliest spread to areas east of Jerusalem An examination of the rise of Islam in the East precedes a comparative analysis of the success of Christianity in its spread to the West to its relative failure to spread to the East He concludes with a discussion of religious pluralism Groundbreaking in its attempt to establish a better understanding of religious diffusion this work will be indispensable to those interested in the study of sociology of religions religious studies missionary studies and Christianity

Derluguian, 2005-07-15 Bourdieu's Secret Admirer in the Caucasus is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism Fusing a narrative of human agency to his critical discussion of structural forces Georgi M Derluguian reconstructs from firsthand accounts the life story of Musa Shanib who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu Derluguian discerns how and why this dissident intellectual became a nationalist warlord Exploring globalization democratization ethnic identity and international terrorism Derluguian contextualizes Shanib's personal trajectory from de Stalinization through the nationalist rebellions of the 1990s to the recent rise in Islamic militancy He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals institutions ethnicities and social networks that make up those societies Drawing on the work of Charles Tilly Immanuel Wallerstein and of course Bourdieu Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history
