A Macrosociological Theory of Societal Systems Peter Heintz, 1972 *A Macrosociological Theory of Societal Systems ... Vol. 1* P. Heintz, 1972 **A Macrosociological Theory of Societal Systems ... Vol. 2** P. Heintz, 1972

Macro-Sociological Theory S N Eisenstadt, H J Helle, 1985-10 This important and much needed two volume work takes stock of the new approaches in sociology which have developed since the 1960s It presents from different vantage points the major dimensions of recent theoretical controversy and highlights the growing recognition of problems common to all areas of sociological endeavour Significant new contributions to ethnomethodology to social psychology and to the study of institutions are examined in Macro Sociological Theory and its companion volume Micro Sociological Theory Together they show that the traditional line of division between structuralist macro theories and interactionist micro theories is increasingly being eroded These stimulate Macrosociology Frank W. Elwell, 2015-12-03 Social theorists dwell on the canonical works of Marx Weber and Durkheim but little on the theories of the major contemporary macrotheorists This book fills this gap with a focus on the work of four modern theorists who have taken on the larger questions spawned by classical social theory C Wright Mills Marvin Harris Immanuel Wallerstein and Gerhard Lenski have examined such phenomena and processes as the rise and impact of capitalism the centralization and enlargement of authority inequality and the historical intensification of production and populations Borrowing what is useful from the classics as well as relying on contemporary practitioners and empirical evidence each theorist adds his own insights and interpretations in constructing a comprehensive perspective of sociocultural stability and change This book fully synthesizes and documents each perspective using language and examples that resonate with the general reader A short biography on each theorist is also provided *A Dictionary of Sociology* John Scott, 2014 Coverage is extensive and includes terms from the related fields of psychology economics anthropology philosophy and political science Provided by publisher *A macrosociological theory of societal systems* Peter Heintz, 1972

Perspectives on Sociological Theory: Macro-sociological theory Shmuel Noah Eisenstadt, Horst Jürgen Helle, 1985 *The Meaning of General Theoretical Sociology* Thomas J. Fararo, 1992-07-31 This book sets out a generative structuralist conception of general theoretical sociology its philosophy its problems and its methods The field is defined as a comprehensive research tradition with many intersecting subtraditions that share conceptual components *A Macrosociological Theory of Social Systems* Peter Heintz, 1972 *Social Theory and Education* Raymond Allen Morrow, Carlos Alberto Torres, 1995-03-09 This book summarizes and critiques theories of social and cultural reproduction as they relate to sociology of education **Social Entropy Theory** Kenneth D. Bailey, 1990-01-23 Social Entropy Theory illuminates the fundamental problems of societal analysis with a nonequilibrium approach a new frame of reference built upon contemporary macrological principles including general systems theory and information theory Social entropy theory using Shannon's H and the entropy concept avoids the common and often artificial separation of theory and method in

sociology The hallmark of the volume is integration as seen in the author's interdisciplinary discussions of equilibrium entropy and homeostasis Unique features of the book are the introduction of the three level model of social measurement the theory of allocation the concepts of global mutable immutable discussion of order and power and a large set of testable hypotheses

Ralf Dahrendorf Olaf Kühne, Laura Leonardi, 2020-04-24 Ralf Dahrendorf 1929 to 2009 has worked in sociology political practice and political philosophy and is associated with significant impulses in role theory and conflict theory This book presents the first synthesis of his extensive oeuvre in English Dahrendorf's political commitment was driven largely by his desire to maximize life chances thus contributing to the further development of liberalism In the tradition of Karl Popper his work in all areas was aimed at defending the open society and he saw conflicts if they were settled as being suitable in principle for contributing to social progress This book provides insights into the various methodological and theoretical aspects and critiques of Ralf Dahrendorf's work as well as his reflections on the position of sociology in the system of sciences and in relation to political practice The current crisis of liberal politics has made Dahrendorf's work more relevant than ever and this overview will be of great interest to students and researchers across sociology political science political ideologies and European integration

Sociocultural Systems Frank L. Elwell, 2013 Macrosociology the study of large scale social structures and the fundamental principles of social organization was the style of sociology practiced by the founders of the discipline Today the social theories of Karl Marx Max Weber mile Durkheim and Herbert Spencer among others are commonly studied as part of the history of the field but although the macrosociological approach that these thinkers advocated is still employed it no longer dominates the discipline Instead sociologists typically adopt a narrower focus specializing in areas such as social psychology medicine religion or the study of social stratification Examining the bigger picture is a task often left to public intellectuals Sociocultural Systems aims to reinstate macrosociology as the heart of the discipline by demonstrating that both classical and contemporary macrosociologists stand upon common ground Focusing on the broad issues that concerned the founders Elwell addresses questions such as Historically what factors accounted for the origin survival and evolution of sociocultural systems Why were some societies more technologically advanced than others What is the origin of capitalism What factors determine the allocation of goods and services within and among societies What effects do changes in government and economic institutions have on communities Elwell argues that as evolution does for biology the macrosociological paradigm offers an analytical strategy that can be used both to guide and prioritize research in all of the myriad specialties within sociology and to lay forth an orderly body of knowledge for students Clearly articulating important sociological principles Sociocultural Systems provides a critical understanding of social institutions and issues while also furnishing a framework for possible solutions to the perennial social crises that are part and parcel of the development of human societies

Crosscutting Social Circles Peter M. Blau, Joseph E. Schwartz, 2018-01-18 Crosscutting Social Circles describes a theory of groups relations to each other and tests the theory in the 125 largest metropolitan areas in the United States The focus is on the influence social structure exerts on intergroup relations Blau and Schwartz show how role relations are influenced by how people are distributed

among social positions Examples are a community's racial composition division of labor ethnic heterogeneity income inequality or the extent to which educational differences are related to income differences Blau and Schwartz test their theory by considering its impact on such structural conditions as intermarriage an important form of intergroup relations The authors derive the main principles of previously formulated theories of intergroup relations and present them in simpler and clearer form They empirically test the power of the theory by analyzing its ability to predict how social structure affects intermarriage in the largest American cities where three fifths of the American population live They selected cities because population distribution of a small neighborhood might be affected by casual associations among neighbors it is much more sociologically interesting if population distribution also affects mate selection in a city of millions Unlike most theories that emphasize the implications of such cultural orientations as shared values and common norms this volume focuses on the significance of various forms of inequality and heterogeneity As one of the few books that supplies a large scale empirical test of implications of a theory *Crosscutting Social Circles* serves as a model The new introduction by Peter Blau reviews the origins and impact of the book It will be of immense value to sociologists psychologists and group relations specialists

Social Action Gottfried Seebaß, R. Tuomela, 2012-12-06 The papers contained in this volume are based on the contributions to an international interdisciplinary Symposium entitled Analytical and Sociological Action Theories which took place in Berlin West on September 13 1982 Each part comprises a main paper followed by two in Part IV three papers commenting on it On the whole there is an equal division into philosophical and sociological papers In particular each main paper receives both inter and interdisciplinary comments The Berlin Symposium was supported by the Deutsche Forschungsgemeinschaft Bonn and to a smaller extent by the Freie Universität Berlin both grants are acknowledged gratefully Berlin and Helsinki May 1984 GOTTFRIED SEEBASS RAIMO TUOMELA vii GOTTFRIED SEEBASS

INTRODUCTION I It is a striking fact that the extended efforts of both sociologists and analytical philosophers to work out what is termed a theory of action have taken little if any account of each other Yet of the various reasons for this that come to mind none appears to be such as to foil any hopes for fruitful interdisciplinary exchange Being concerned apparently with the same set of phenomena viz individual and social actions the two theories can reasonably be expected to be partially overlapping as well as competitive and complementary Accordingly each can eventually be shown by the other to need completion or revision Whether or to what extent this is the case is subject to inquiry and discussion

Legal Construct, Social Concept Larry Barnett, 2017-07-12 Based on sophisticated demographic analysis *Legal Construct Social Concept* argues that legal doctrine on social issues is shaped by the needs and values of society rather than by individuals and interest groups and that it evolves in response to social change but has little impact on that change The book also explains why a substantial body of social science research has found that although law may be effective for some types of economic problems its impact on social problems is generally small and of brief duration At least in the United States legal doctrine

seems to operate primarily to provide symbols that enhance commitment to the social system and increase the cohesiveness of the system Barnett's approach to legal thought derives from the practices and assumptions of the social sciences particularly sociology and not from those of critical legal studies His main concern is with social issues issues that substantively differ from economic issues In addressing legal thought on social problems with the conceptual framework and quantitative techniques of macrosociology he considers a topic that is infrequently investigated and employs an approach that is infrequently used To illustrate this thesis Barnett presents data on social patterns relevant to three current issues sex discrimination age discrimination and the availability of contraception and abortion His analyses of these data are compared to constitutional philosophy judicial rulings and federal statutes Barnett then turns from the evolution of legal doctrine in the past to its possible change in the future and considers whether active forms of euthanasia are likely to be legalized He concludes with an exploration of additional issues for future research and theory *Social Capital Versus Social Theory* Ben Fine, 2002-05-03 This volume traces the origins of social capital through the work of Becker Bourdieu and Coleman and comprehensively reviews the literature across the social sciences
