Made To Order The Myth Of Reproductive And Genetic Progress Athene Series:

Made to Order Patricia Spallone, Deborah Lynn Steinberg, 1987 Conjunto de ensayos que desde una perspectiva feminista hacen un analisis critico de las consecuencias de las nuevas tecnologias reproductivas en lo que estas suponen de control social y medico del cuerpo de las mujeres quienes ven reducida su integridad su autonomia y la fuerza del movimiento de liberacion feminista

Infertility Renate D. Klein, 2024-11-20 Originally published in 1989 Infertility looks at how fertility treatments fail women At the time there was disturbing evidence of medical malpractice and invasive technologies which violated women s bodies and took a heavy toll on their lives Here for the first time women from all over the world tell their own stories about the pain and stigma of infertility never ending cycles of drugs and hormone injections the trauma of the test tube baby method IVF their unmet hopes when technology fails yet again the damage caused by experimental medicine and surgery how they have been exploited as so called surrogate mothers These shocking stories shattered the myths of benevolent doctors working in the interests of women The women who speak out in this book offer support and suggest alternative strategies for other people with fertility problems Their experiences show that we urgently need to resist the false promise of reproductive technologies if all women are not to become test sites for medical experimentation and scientific ambition Still often discussed today it is considered a classic in the field

Test-Tube Women Rita Arditti, Renate Duelli Klein, Shelley Minden, 2024-11-20 Originally published in 1984 when new reproductive technologies were just beginning to become part of the public discussion this edition was published with a new preface in 1989 The Editors wanted to look carefully at how much real choice reproductive technologies offered to women Genetic engineering sperm banks test tube fertilization sex selection surrogate mothering experimentation in the so called third world increased technological intervention in childbirth were we taking pregnancy and the birth process out of the dark ages or into a terrifying brave new world They ask who controls it Who benefits The technological machine grinds on in headline grabbing leaps or in quiet developments in research laboratories but what are the implications for women worldwide Still a huge industry today this reissue can be read in its historical context

Women, Biomedical Research and Art Ninette Rothmüller, 2021-06-14 Die Studie widmet sich intersektionalen Verletzbarkeiten sozio geografischen und rassistischen Ungerechtigkeiten sowie dem Traumapotenzial von Reproduktionsmedizin Menschenhandel und Schwarzmarkt Organhandel Mittels eines empirischen kritisch diskursanalytischen künstlerischen und philosophisch theoretischen Zugangs entwickelt die interdisziplinäre Studie praktische kreative Werkzeuge für eine Pädagogik die Würde und Integrität betont und die Menschenrechte im Alltag der betroffenen Bevölkerung unterstützt
