Masked Inversion in French, 1987 *Topics in French Syntax* Geraldine Legendre, 2016-11-10 The main goal of this study first published in 1994 is to present a substantial part of the grammar of French This goal is achieved by bringing together two aspects of syntactic investigation First the study focuses on a vast range of French clausal phenomena including Object Raising constructions Causative constructions of various types Impersonal constructions amongst many others Second the investigation is conducted within the framework of Relational Grammar This title will be of interest to students of language and linguistics **French North America in the Shadows of Conquest** Ryan André Brasseaux, 2020-12-29 French North America in the Shadows of Conquest is an interdisciplinary postcolonial and continental history of Francophone North America across the long twentieth century revealing hidden histories that so deeply shaped the course of North America Modern French North America was born from the process of coming to terms with the idea of conquest after the fall of New France The memory of conquest still haunts those 20 million Francophones who call North America home The book re examines the contours of North American history by emphasizing alliances between Acadians Cajuns and Québécois and French Canadians in their attempt to present a unified challenge against the threat of assimilation linguistic extinction and Anglophone hegemony It explores cultural trauma narratives and the social networks Francophones constructed and shows how North American history looks radically different from their perspective This book presents a missing chapter in the annals of linguistic and ethnic differences on a continent defined in part by its histories of dispossession It will be of interest to scholars and students of American and Canadian history particularly those interested in French North America as well as ethnic and cultural studies comparative history the American South and migration **Routledge Dictionary of Language and Linguistics** Hadumod Bussmann, 2006-02-20 The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language In over 2 500 entries the Dictionary provides an exhaustive survey of the key terminology and languages of more than 30 subdisciplines of linguistics With its term based approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics *Phi-features and the Modular Architecture of Language* Milan Rezac, 2010-11-12 This monograph investigates the modular architecture of language through the nature of uninterpretable phi features person number gender and Case It provides new tools and evidence for the modular architecture of the human language faculty a foundational topic of linguistic research At the same time it develops a new theory for one of the core issues posed by the Minimalist Program the relationship of syntax to its interfaces and the nature of uninterpretable features The work sets out to establish a new cross linguistic phenomenon to study the foregoing person governed last resort repairs which provides new insights into the

nature of ergative accusative Case and of Case licensing itself This is the first monograph that explicitly addresses the syntactic vs morphological status of uninterpretable phi features and their relationship to interface systems in a similar way drawing on person based interactions among arguments as key data base *Proceedings of the 12th West Coast Conference on Formal Linguistics* Stanford Linguistics Association, 1994 Proceedings of a conference on Formal Linguistics

Syntactic Change in Medieval French Barbara S. Vance, 2012-12-06 1 0 V2 AND NULL SUBJECTS IN THE HISTORY OF FRENCH The prototypical Romance null subject language has certain well known characteristics verbal inflection is rich distinguishing six person/number forms subject pronouns are generally emphatic and when there is no need to emphasize the subject the pronoun is not expressed at all Spanish and Italian for example fit this description rather well Modern French however provides a striking contrast to these languages it does not allow subjects to be missing and not unexpectedly it has a verbal agreement system with few overt endings and subject pronouns which are not emphatic One of the goals of the present work is to examine null subjects in two dialects of Romance that fit neither the Italian nor the French model later Old French 12th 13th centuries and Middle French 14th 15th centuries Old French has null subjects only in contexts where the subject would be postverbal if expressed cf Foulet 1928 and Middle French has null subjects in a wider range of syntactic contexts but does not freely allow all persons of the verb to be null The work of Vanelli Renzi and Benincà 1985 along with many other works by these authors individually shows that a number of other geographically proximate medieval dialects had similar systems though it appears that there are significant differences in detail among them **Manual of Grammatical**

Interfaces in Romance Susann Fischer, Christoph Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages **Tzotzil Clause Structure** J.
