The One-Sex Body on Trial: The Classical and Early Modern Evidence Helen King, 2016-02-17 By far the most influential work on the history of the body across a wide range of academic disciplines remains that of Thomas Laqueur This book puts on trial the one sex two sex model of Laqueur s *Making Sex* Body and Gender from the Greeks to Freud through a detailed exploration of the ways in which two classical stories of sexual difference were told retold and remade from the mid sixteenth to the nineteenth century Agnodike the first midwife who disguises herself as a man and then exposes herself to her potential patients and Phaethousa who grows a beard after her husband leaves her are stories from the ancient world that resonated in the early modern period in particular Tracing the reception of these tales shows how they provided continuity despite considerable change in medicine being the common property of those on different sides of professional disputes about women s roles in both medicine and midwifery The study reveals how different genres used these stories changing their characters and plots but always invoking the authority of the classics in discussions of sexual identity The study raises important questions about the nature of medical knowledge the relationship between texts and observation

and the understanding of sexual difference in the early modern world beyond the one sex model **The Politics of Reproduction in Ottoman Society, 1838-1900** Gülhan Balsoy, 2015-10-06 Epidemics migration and territorial losses led to population decline in early nineteenth century Turkey In response Ottoman elites began a programme of population growth Balsoy uses previously untapped archival sources to examine these developments arguing that these changes caused reproduction to become a political experience The Philosopher's Guide to Parenthood Teresa Baron, 2023-01-05 Our understanding of what it means to be a parent in any given context is shaped by our biological social legal and moral concepts of parenthood These are themselves subject to the influence of changing expectations as new technologies are produced cultural views of the family are transformed and laws shift in response In this book Teresa Baron provides a detailed and incisive overview of the key questions widespread presuppositions and dominant approaches in the field of philosophy of parenthood Baron examines paradigm cases and problem cases alike through an interdisciplinary lens bringing philosophy of parenthood into dialogue with research on family making and childrearing from across the social sciences and humanities Her book aims to answer old questions draw out new questions and interrogate notions that we often take for granted in this field including the very concept of parenthood itself *Standing Up to Supernanny* Jennie Bristow, 2013-09-09 Parenthood we are told requires a massive adjustment to our lives emotions and relationships and we have to be taught how to deal with that But can it really be so bad that we need constant counselling and parenting classes It is a myth that today's parents are hopeless and lazy in many ways we have become too diligent too hopeful of great outcomes and clear rewards to the point where we lose ourselves in trying to provide some kind of professional service to our children The current obsession with perfect parenting increases our insecurity and distrust of each other and diminishes our authority over our kids This book is about asking Why have we invited Supernanny into our living rooms and how can we kick her out *Losing Sleep* Laura Harrison, 2022-08-16 New insights into the anxiety over infant sleep safety New parents are inundated with warnings about the fatal risks of co sleeping or sharing a bed with a newborn from medical brochures and website forums to billboard advertisements and the evening news In *Losing Sleep* Laura Harrison uncovers the origins of the infant sleep safety debate providing a window into the unprecedented anxieties of modern parenthood Exploring widespread rhetoric from doctors public health experts and the media Harrison explains why our panic has reached an all time high She traces the way safe sleep standards in the United States have changed and shows how parents rather than broader systems of inequality that impact issues of housing and precarity are increasingly being held responsible for infant health outcomes Harrison shows that infant mortality rates differ widely by race and are linked to socioeconomic status Yet while racial disparities in infant mortality point to systemic and structural causes the discourse around infant sleep safety often suggests that individual parents can protect their children from these tragic outcomes if only they would make the right choices about safe sleep Harrison argues that our understanding of sleep related infant death and the crisis of infant mortality in general

has burdened parents especially parents of color in increasingly punitive ways As the government takes a more visible role in criminalizing parents including those whose children die in their sleep this book provides much needed insight into a new era of parenthood

Evil Children in the Popular Imagination Karen J. Renner,2016-12-15 Focusing on narratives with supernatural components Karen J Renner argues that the recent proliferation of stories about evil children demonstrates not a declining faith in the innocence of childhood but a desire to preserve its purity From novels to music videos photography to video games the evil child haunts a range of texts and comes in a variety of forms including changelings ferals and monstrous newborns In this book Renner illustrates how each subtype offers a different explanation for the problem of the evil child and adapts to changing historical circumstances and ideologies

Making Medical Knowledge Miriam Solomon,2015-04-02 How is medical knowledge made New methods for research and clinical care have reshaped the practices of medical knowledge production over the last forty years Consensus conferences evidence based medicine translational medicine and narrative medicine are among the most prominent new methods Making Medical Knowledge explores their origins and aims their epistemic strengths and their epistemic weaknesses Miriam Solomon argues that the familiar dichotomy between the art and the science of medicine is not adequate for understanding this plurality of methods The book begins by tracing the development of medical consensus conferences from their beginning at the United States National Institutes of Health in 1977 to their widespread adoption in national and international contexts It discusses consensus conferences as social epistemic institutions designed to embody democracy and achieve objectivity Evidence based medicine which developed next ranks expert consensus at the bottom of the evidence hierarchy thus challenging the authority of consensus conferences Evidence based medicine has transformed both medical research and clinical medicine in many positive ways but it has also been accused of creating an intellectual hegemony that has marginalized crucial stages of scientific research particularly scientific discovery Translational medicine is understood as a response to the shortfalls of both consensus conferences and evidence based medicine Narrative medicine is the most prominent recent development in the medical humanities Its central claim is that attention to narrative is essential for patient care Solomon argues that the differences between narrative medicine and the other methods have been

exaggerated and offers a pluralistic account of how all the methods interact and sometimes conflict. The result is both practical and theoretical suggestions for how to improve medical knowledge and understand medical controversies.

Without Apology Shannon Stettner, 2016-08-26 Until the late 1960s the authorities on abortion were for the most part men: politicians, clergy, lawyers, physicians, all of whom had an interest in regulating women's bodies. Even today when we hear women speak publicly about abortion, the voices are usually those of the leaders of women's and abortion rights organizations, women who hold political office and on occasion female physicians. We also hear quite frequently from spokeswomen for anti-abortion groups. Rarely, however, do we hear the voices of ordinary women, women whose lives have been in some way touched by abortion. Their thoughts typically owe more to human circumstance than to ideology, and without them we run the risk of thinking and talking about the issue of abortion only in the abstract. *Without Apology* seeks to address this issue by gathering the voices of activists, feminists, and scholars as well as abortion providers and clinic support staff alongside the stories of women whose experience with abortion is more personal. With the particular aim of moving beyond the polarizing rhetoric that has characterized the issue of abortion and reproductive justice for so long, *Without Apology* is an engrossing and arresting account that will promote both reflection and discussion.

Postgenomics Sarah S. Richardson, Hallam Stevens, 2015-05-29 Ten years after the Human Genome Project's completion, the life sciences stand in a moment of uncertainty, transition, and contestation. The postgenomic era has seen rapid shifts in research methodology, funding, scientific labor, and disciplinary structures. Postgenomics is transforming our understanding of disease and health, our environment, and the categories of race, class, and gender. At the same time, the gene retains its centrality and power in biological and popular discourse. The contributors to *Postgenomics* analyze these ruptures and continuities and place them in historical, social, and political context. Postgenomics, they argue, forces a rethinking of the genome itself and opens new territory for conversations between the social sciences, humanities, and life sciences. Contributors: Russ Altman, Rachel A. Ankeny, Catherine Bliss, John Dupré, Michael Fortun, Evelyn Fox Keller, Sabina Leonelli, Adrian Mackenzie, Margot Moinester, Aaron Panofsky, Sarah S. Richardson, Sara Shostak, Hallam Stevens.

The Catholic Enlightenment Ulrich L. Lehner, 2016-01-06 Whoever needs an act of faith to elucidate an event that can be explained by reason is a fool and unworthy of reasonable thought. This line, spoken by the notorious 18th-century libertine Giacomo Casanova, illustrates a deeply entrenched perception of religion as prevalent today as it was hundreds of years ago. It is the sentiment behind the narrative that Catholic beliefs were incompatible with the Enlightenment ideals. Catholics, many claim, are superstitious and traditional, opposed to democracy and gender equality, and hostile to science. It may come as a surprise, then, to learn that Casanova himself was a Catholic. In *The Catholic Enlightenment*, Ulrich L. Lehner points to such figures as representatives of a long-overlooked thread of a reform-minded Catholicism which engaged Enlightenment ideals with as much fervor and intellectual gravity as anyone. Their story opens new pathways for understanding how faith and modernity can interact in our own time. Lehner begins two hundred years

before the Enlightenment when the Protestant Reformation destroyed the hegemony Catholicism had enjoyed for centuries. During this time the Catholic Church instituted several reforms such as better education for pastors, more liberal ideas about the roles of women, and an emphasis on human freedom as a critical feature of theology. These actions formed the foundation of the Enlightenment's belief in individual freedom. While giants like Spinoza, Locke, and Voltaire became some of the most influential voices of the time, Catholic Enlightenmenters were right alongside them. They denounced fanaticism, superstition, and prejudice as irreconcilable with the Enlightenment agenda. In 1789 the French Revolution dealt a devastating blow to their cause, disillusioning many Catholics against the idea of modernization. Popes accumulated ever more power, and the Catholic Enlightenment was snuffed out. It was not until the Second Vatican Council in 1962 that questions of Catholicism's compatibility with modernity would be broached again. Ulrich L. Lehner tells for the first time the forgotten story of these reform-minded Catholics. As Pope Francis pushes the boundaries of Catholicism even further, and Catholics once again grapple with these questions, this book will prove to be required reading. **The Zero Trimester** Miranda

Waggoner, 2017-09-12 A healthy pregnancy is now defined well before pregnancy even begins. Public health messages promote pre-pregnancy health and health care by encouraging reproductive-age women to think of themselves as mothers before they think of themselves as women. This happens despite little evidence that such an approach improves maternal and child health. This book examines the dramatic shift in ideas about reproductive risk and birth outcomes over the last several decades, unearthing how these ideas intersect with the politics of women's health and motherhood at the beginning of the twenty-first century. Voluntary and Involuntary Childlessness Natalie Sappleton, 2018-08-23 While interest in the drivers, consequences, nature, and manifestations of voluntary and involuntary childlessness increases, knowledge progress is hampered by poor linkages across disjointed research fields. The book brings together theoretical insights and empirical investigations into the phenomenon, united within a feminist conceptual framework. *Better Safe Than Sorry* Norah

MacKendrick, 2018-05 How toxic are the products we consume on a daily basis? Whether it's triclosan in toothpaste, formaldehyde in baby shampoo, endocrine disruptors in water bottles, or pesticides on strawberries, chemicals in food and personal care products are of increasing concern to consumers. This book chronicles how ordinary people try to avoid exposure to toxics in grocery store aisles using the practice of precautionary consumption. Through an innovative analysis of environmental regulation, the advocacy work of environmental health groups, the expansion of the health food chain, Whole Foods Market, and interviews with consumers, Norah MacKendrick ponders why the problem of toxics in the U.S. retail landscape has been left to individual shoppers and to mothers in particular. She reveals how precautionary consumption or green shopping is a costly and time-intensive practice, one that is connected to cultural ideas of femininity and good motherhood but is also most available to upper and middle-class households. *Better Safe Than Sorry* powerfully argues that precautionary consumption places a heavy and unfair burden of labor on women and does little to advance environmental
