Mass Culture. The Popular Arts in America. [By Various Authors.] Edited by B. Rosenberg and D.M. White Bernard ROSENBERG (and WHITE (David Manning)), David Manning White, 1957 **Republic on the Wire** John McMurria, 2017-02

The history of cable television in America is far older than networks like MTV ESPN and HBO which are so familiar to us today Tracing the origins of cable TV back to the late 1940s media scholar John McMurria also locates the roots of many current debates about premium television cultural elitism minority programming content restriction and corporate ownership Republic on the Wire takes us back to the pivotal years in which media regulators and members of the viewing public presciently weighed the potential benefits and risks of a two tiered television system split between free broadcasts and pay cable service Digging into rare archives McMurria reconstructs the arguments of policymakers whose often sincere advocacy for the public benefits of cable television were fueled by cultural elitism and the priority to maintain order during a period of urban Black rebellions He also tells the story of the people of color rural residents women s groups veterans seniors and low income viewers who challenged this reasoning and demanded an equal say over the future of television By excavating this early cable history and placing equality at the center of our understanding of media democracy Republic on the Wire is a real eye opener as it develops a new methodology for studying media policy in the past and present *The Twilight of the American Enlightenment* George Marsden, 2014-02-11 In the aftermath of World War II the United States stood at a precipice The forces of modernity unleashed by the war had led to astonishing advances in daily life but technology and mass culture also threatened to erode the country s traditional moral character As award winning historian George M Marsden explains in *The Twilight of the American Enlightenment* postwar Americans looked to the country s secular liberal elites for guidance in this precarious time but these intellectuals proved unable to articulate a coherent common cause by which America could chart its course Their failure lost them the faith of their constituents paving the way for a Christian revival that offered America a firm new moral vision one rooted in the Protestant values of the founders A groundbreaking reappraisal of the country s spiritual reawakening *The Twilight of the American Enlightenment* shows how America found new purpose at the

Non-Design Anthony Fontenot, 2021-07-09 Anthony Fontenot's staggeringly ambitious book uncovers the surprisingly libertarian heart of the most influential British and American architectural and urbanist discourses of the postwar period expressed as a critique of central design and a support of spontaneous order Non Design illuminates the unexpected philosophical common ground between enemies of state support most prominently the economist Friedrich Hayek and numerous notable postwar architects and urbanists like Robert Venturi Denise Scott Brown Reyner Banham and Jane Jacobs These thinkers espoused a distinctive concept of non design characterized by a rejection of conscious design and an embrace of various phenomenon that emerge without intention or deliberate human guidance This diffuse and complex body of theories discarded many of the cultural presuppositions of the time shunning the traditions of modern design in favor of the wisdom freedom and self organizing capacity of the market Fontenot reveals the little known commonalities between the aesthetic deregulation sought by ostensibly liberal thinkers and Hayek's more controversial conception of state power detailing what this unexplored affinity means for our conceptions of political liberalism Non Design thoroughly recasts conventional views of postwar architecture and urbanism as well as liberal and libertarian philosophies
