fishing baits they are not always going to be attracted to the flashiest bait you have and they are not going to be overly attracted to a bait that moves around too much So dropping your bait and waiting is the best way to catch bass and to catch one that is going to be worth catching and worth eating if you are keeping the fish Using live bait or worms is a great way to start as they are a common food source for bass living in ponds Worms are also cheap or free if you dig your own You can use rubber worms that are rather wiggly and that do look real or you can use grubs Bass are going to be caught without a ton of trouble When it comes to fishing it is always best to find out more about the fish you are hoping to catch Fish are more intelligent than we think For example take deep sea fishing to make it relatively easy to bait with sea bass Want to learn more Read *The Bass Fishing* By Dr Wendy Grey *Trophy Bass* Larry Larsen, 1990-02-01 To help the reader better understand how to catch big bass this book explores productive techniques for trophies The information is aimed at those fishermen eager to know more about catching large fish on a less random basis Larry Larsen is a fisherman writer who especially enjoys catching and releasing big bass The author has been fortunate to tally almost 200 largemouth between 5 and 13 pounds and has had two friends lip 15 pound largemouth into his boat Larsen has studied and written about all aspects of bass fishing His articles in major outdoor magazines and his previously published books in the Bass Series Library detail highly productive fish catching methods and special techniques
