Faster, Better, Cheaper Howard E. McCurdy, 2003-04-01 This excellent summary of an important part of NASA's history is recommended for all readers. Choice In *Faster Better Cheaper Low Cost Innovation in the U S Space Program* Howard E. McCurdy examines NASA's recent efforts to save money while improving mission frequency and performance. McCurdy details sixteen missions undertaken as the twentieth century drew to a close including an orbit of the moon, deployment of three space telescopes, four Earth orbiting satellites, two rendezvous with comets and asteroids, and a test of an ion propulsion engine which cost less than the sum traditionally spent on a single conventionally planned planetary mission. He shows how these missions employed smaller spacecraft and cheaper technology to undertake less complex and more specific tasks in outer space. While the technological innovation and space exploration approach that McCurdy describes is still controversial, the historical perspective on its disappointments and triumphs points to ways of developing faster, better, and cheaper as a management manifesto. Readers interested in either the management or economics of complex organizations will find a wealth of material in this well-written exposition. Fans of space travel like the author himself will also enjoy the behind-the-scenes look at NASA's operation. *Enterprise and Society*

The Dynamics of Performance Management Donald P. Moynihan, 2008-03-07 Efficiency, Innovation, Results, Accountability. These advocates claim are the fruits of performance management. In recent decades, government organizations have eagerly embraced the performance model, but the rush to reform has not delivered as promised. Drawing on research from state and federal levels, Moynihan illustrates how governments have emphasized some aspects of performance management such as building measurement systems to acquire more performance data but have neglected wider organizational change that would facilitate the use of such information. In his analysis of why and how governments in the United States have made the move to performance systems, Moynihan identifies agency leadership, culture, and resources as keys to better implementation, goal-based learning, and improved outcomes. How do governments use the performance information generated under performance systems? Moynihan develops a model of interactive dialogue to highlight how performance data, which promised to optimize decision making and policy change for the public's benefit, has often been used selectively to serve the interests of particular agencies and individuals, undermining attempts at interagency problem solving and reform. A valuable resource for public administration scholars and administrators, *The Dynamics of Performance Management* offers fresh insight into how government organizations can better achieve their public service goals.

It Takes a Neighborhood David J. Wright, 2002-01-03 The Neighborhood Preservation Initiative, a comprehensive community building program in ten neighborhoods from nine mostly mid-sized cities, is examined in *It Takes a Neighborhood*. Wright shows what was learned through NPI about the value of focusing on working-class neighborhoods as well as how to think about and structure community building efforts generally. The lessons gained from NPI about engaging established, networked community organizations in deliberate, action-oriented strategies fueled by flexible

funding and linked to systems of local support are shown to be applicable to a wide spectrum of community building initiatives The Pew Charitable Trusts created the NPI targeting it toward working class neighborhoods threatened but not yet affected deeply by decline a significant departure from previous community development efforts The neighborhoods possessed important assets such as strong community organizations talented volunteers and neighborhood strategies that could be capitalized upon neighborhood strengths that could be reinforced through relatively small investments as a way to prevent decline Along with generating attention to working class neighborhoods and public policy on their behalf the goal of NPI was to help residents to improve their quality of life and learn how to sustain long term community stability and vitality

Performance Measurement Harry P Hatry, 2003-10-03 Long before reinventing government came into vogue the Urban Institute pioneered methods for government and human services agencies to measure the performance of their programs This comprehensive guidebook synthesizes more than two decades of Harry Hatry's groundbreaking work It covers every component of the performance measurement process from identifying the program's mission objectives customers and trackable outcomes to finding the best indicators for each outcome the sources of data and how to collect them Hatry explains how to select indicator breakouts and benchmarks for comparison to actual values and describes numerous uses for performance information Since the publication of the first edition in 1999 the use of performance measurement has exploded at all levels of U S government in nonprofit agencies and around the world The new edition has been revised and expanded to address recent developments in the field including the increased availability of computer technology in collecting and presenting information the movement to use outcome data to improve services and the quality control issues that have emerged as data collection has increased It is an indispensable handbook for newcomers and an important resource for experienced managers looking to improve their use of outcome data Measuring the Performance of the Hollow State David G. Frederickson, 2006-10-16 Measuring the Performance of the Hollow State is the first in depth look at the influence of performance measurement on the effectiveness of the federal government To do this the authors examine the influence of the Government Performance and Results Act of 1993 with consideration of the later Program Assessment Rating Tool of 2002 on federal performance measurement agency performance and program outcomes They focus a systematic examination on five agencies in the U S Department of Health and Human Services the Food and Drug Administration the Centers for Medicare and Medicaid Services the Health Resources and Services Administration the National Institutes of Health and the Indian Health Service Besides representing a wide range of federal government organizational structures and program formats these agencies offer a diverse array of third party arrangements including states native American tribes scientists medical schools and commercial and nonprofit health care intermediaries and carriers Exploring the development of performance measures in light of widely varying program mandates the authors look at issues that affect the quality of this measurement and particularly the influence of program performance by third parties They consider factors such as goal

conflict and ambiguity politics and the critical role of intergovernmental relations in federal program performance and performance measurement Through their findings they offer illumination to two major questions in public management today what are the uses and limitations of performance measurement as a policy and management tool and how does performance measurement work when applied to the management of third party government While scholars and students in public administration and governmental reform will find this book of particular interest it will also be of use to anyone working in the public sector who would like to have a better understanding of performance measurement Autopilot Budgeting United States.
