Canine Rabies Control and Management in Southeast Asia Kristyna Rysava,2021 **Strategic Framework for Elimination of Human Rabies Transmitted by Dogs in the South-East Asia Region** Searo,2014-12-05 Dog bites are the primary

source of human infection in rabies endemic countries and account for 96% of rabies cases in the South East Asia Region. Elimination of human rabies is dependent on elimination of dog rabies. Some countries have a comprehensive rabies control program but it is a neglected area in others. New innovative tools and techniques have been developed in recent years to improve dog vaccination coverage, dog population management and accessibility of modern rabies vaccines. Considering the importance of consolidating achievements in rabies control in Member countries, the WHO Regional Office for South East Asia has developed a regional strategy for elimination of human rabies transmitted by dogs in the Region. The strategy aims to eliminate human rabies through progressive control of dog rabies and human rabies prophylaxis in rabies endemic countries and to maintain the rabies free status in rabies free areas of the South East Asia Region by 2020. WHO Expert Consultation on Rabies World Health Organization, 2018-08-31. The WHO Expert Consultation on Rabies met in Bangkok Thailand on 26-28 April 2017. Page 1. **International Symposium on Rabies** International Symposium on Rabies (1, 1965, Talloires), 1966. Towards the Elimination of Rabies in Eurasia Betty Dodet, European Union, 2008. This volume presents the proceedings of the second conference on rabies organized by the World Organisation for Animal Health in collaboration with the World Health Organization and the European Union in May 2007. Up to date information on rabies epidemiology in humans and animals throughout Europe, The Middle East and Asia and the most recent data on rabies virus and its structure as well as the basic mechanisms of rabies infection are included here. Experts in the field present their experience and opinions on the prevention and control of rabies in dogs, wildlife including bats and the most recent developments in rabies prevention and management in humans. Further presentations address advances in technology, diagnosis and vaccine development. To conclude, resolutions and recommendations are given in English, French and Russian for the elimination of rabies not only in Europe and Asia but also the rest of the world. This book is highly valuable to regulatory, veterinary services, public health services, medical and veterinary practitioners, scientists and researchers interested in combating this neglected disease which kills more than 50 000 persons annually, mainly children. Rabies elimination is at hand through a One Health strategic collaboration between veterinary and human health authorities, political will and community involvement and application of the knowledge gained from this volume.
