Religious Methods And Resources In Bioethics:

Religious Methods and Resources in Bioethics P.F. Camenisch, 2013-03-09 A volume on religious theological methods in biomedical ethics inevitably of whether the methodological dimension can be distinct raises the question guished from the various other things that go on in ethical discourse It is difficult to answer this question definitively since many elements in moral conversation can be interpreted in different ways Barbara Hilkert Andolsen illustrates this issue in this volume when she defines one of her crucial categories gender justice as being both procedural and substantive normative This difficulty of finally separating the methodological from the normative arises in many areas of contemporary ethical writing both feminist and otherwise Nevertheless it seems that in many cases we can separate out the methodological issues with considerable precision Albert Jonsen and James Childress achieve just such a sharp focus in their essays This does not mean that a careful dissecting of their papers would not reveal normative elements lurking about their methodological points It is simply to say that the issues they analyze and the positions they take are at least prima facie overwhelmingly methodological They are much more about how we think about ethical matters than they are about what we think about them **Religious Methods**

and Resources in Bioethics Paul F. Camenisch, 2014-01-15 Secular Bioethics in Theological Perspective E.E. Shelp, 2012-12-06 Theologians and theologically educated participants in discussions of bioethics have been placed on the defensive during recent years The dominance of religious perspectives and theological voices that marked the emergence and establishment of bioethics in the late 1960s and 1970s has eroded steadily as philosophers lawyers and others have relativized their role and influence at best or dismissed it entirely at worst The secularization of bioethics which has occurred for a variety of reasons has prompted some prominent writers to reflect on what has been lost Daniel Callahan for example writes whatever the ultimate truth status of religious perspectives they have provided a way of looking at the world and understanding one's own life that has a fecundity and uniqueness not matched by philosophy law or political theory Those of us who have lost our religious faith may be glad that we have discovered what we take to be the reality of things but we can still recognize that we have also lost something of great value as well the faith vision insights and experience of whole peoples and traditions who no less than we unbelievers struggled to make sense of things That those goods are part of a garment we no longer want to wear does not make their loss anything other than still a loss and it is not a negligible one 2 p 2 AIDS Bibliography, 1995-07 Reading the Bible in the Strange World of Medicine Allen Verhey, 2003-12-11 Author of such major books as Remembering Jesus Christian Community Scripture and the Moral Life Allen Verhey has become one of today's most trusted Christian voices in contemporary ethics including the moral challenges that new medical technologies pose to Christian faith and decision making With this new book Verhey brings the biblical tradition to bear on contemporary bioethical concerns Drawing on an unmatched depth of insight in these two realms Verhey explores how the Bible can illuminate and guide medical ethics He argues that churches are called to think and speak clearly about bioethical concerns

and he lays out here the scriptural tools for them to do so After firmly grounding Christian ethical discourse in Scripture Verhey shows how the Bible can be applied to such pressing questions as suffering genetic intervention abortion reproductive technologies end of life care physician assisted suicide and more Filled with faith based wisdom and apt illustrations of the moral dilemmas discussed this book is a must read for Christians grappling with the ethical dimensions of medicine today

Brave New World? Celia Deane-Drummond, 2003-11-01 One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms The possibility of manipulating human genetics raises many theological ethical and socio political issues These include specific decisions about whether the technology will be developed how it will be applied and more general questions about the technical manipulation of natural processes From a theological perspective the human genome project not only challenges particular doctrines such as that of creation eschatology and anthropology but also raises particular issues of social justice and medical ethics The purpose of this book is to bring together the collective expertise of theologians scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project It is hoped that the results presented in this book offer a sophisticated theological and ethical response

Human Dignity and Human Cloning Silja Vöneky, Rüdiger Wolfrum, 2013-12-01 Human Dignity and Human Cloning contains contributions by philosophers theologians and lawyers on legal and ethical questions concerning the reproductive and therapeutic cloning of human beings The main focus lies on the admissibility of cloning in German Constitutional law as well as in public international law As these legal questions cannot be answered without taking account of the ethical discussion the topic is analyzed from different cultural and religious viewpoints
