Remaking Eden Closing Genetic Engineering And The Future:

Remaking Eden Lee M. Silver, 1999 **The Blackwell Companion to the Sociology of Families** Jacqueline Scott, Judith Treas, Martin Richards, 2008-04-15 Tackling issues relevant to family life today this authoritative Companion shows why studying social change in families is fundamental for understanding the transformations in individual and social life across the globe Contains original essays by expert contributors on a wide range of topics relating to the sociology of families Includes coverage of social inequality parenting practices children s work the changing patterns of citizenship and multi cultural families Gives special attention to European and North American examples Discusses previously neglected groups including immigrant families and gays and lesbians Explores how revolutionary changes in aging longevity and sexual behavior have radically affected the experience of different generations and the relationships between them Ethics and the New Genetics H. Daniel Monsour, 2007-05-26 Everyday new advances are being made in the science of human genetics Accompanying progress in this area however are new ethical dilemmas At a think tank sponsored by the Canadian Catholic Bioethics Institute an interdisciplinary group of ethicists geneticists physicians lawyers and theologians gathered in an attempt to apply some features of Bernard Lonergan s notion of functional specialization to ethical debates surrounding genetics Editor H Daniel Monsour has brought together a series of articles presented at this think tank The articles accomplish two tasks first they explore some of the advances in human genetic that continue to prompt ethical debate and outline the different stances on those issues second they examine those stances in the context of Roman Catholic moral and religious thought Timely innovative and wide ranging this collection will be of interest to bioethicists and philosophers as well as religious and Lonerganian scholars **Trajectory of the 21st Century** Lawrence J. Terlizzese, 2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book s theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a postrationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of

technological progress and regress are on a direct collision course in the twenty first century *A Christian Response to the New Genetics* David H. Smith, Cynthia B. Cohen, 2003 Life is a gift that includes powers to be used and celebrated but that doesn't necessarily justify the use of every new power that comes along This volume appeals to both secular and religious readers in the centre of the great debate over our new genetic powers These essays affirm many traditional Christian perspectives and virtues while also introducing new insights transfer genetic manipulation patenting health insurance and the moral status of embryos They conclude that it is naive to either to reject outright or wholeheartedly embrace the new genetic powers In fact sometimes the best we can expect is to learn how to cope with moral uncertainty Science in the Contemporary World Eric G. Swedin, 2005-03-08 This work is a unique introductory A Z resource detailing the scientific achievements of the contemporary world and analyzing the key scientific trends discoveries and personalities of the modern age An authoritative reference survey of the modern age of scientific discovery Science in the Contemporary World is a scholarly yet accessible chronicle of scientific achievement from the discovery of penicillin to the latest developments in space exploration and cloning Over 200 A Z entries cover the full spectrum of contemporary science with emphasis on its diverse nature Within the last 50 years medicine has eradicated the killer disease smallpox but primarily because the virus can live only in humans Space probes have revealed that on Europa a moon of Jupiter an ice capped ocean with the potential to support life probably exists Marvels from animal psychology and deep sea exploration are also explored extensively

Returning to Reality Phillip M. Thompson, 2012-11-14 This book synthesizes the diverse reflections on technology by monk and spiritual writer Thomas Merton to develop a compelling contemplative critique of the threats and challenges of nuclear war communication technologies and biotechnologies that may alter what it means to be human At the core of his critique Merton opposes a technological mentality that favors processes of efficiency and utility at the expense of our ultimate purpose a quest for the wisdom to guide us to the divine source of our being and reality To counter this modern idolatry Merton's insights offer a path of reflection balance and community More specifically Merton offers some constructive approaches and healing possibilities through a balanced approach to work a careful and intentional managing of technology and an accessing of the recuperative dimensions of nature In its conclusion the book brings the insights of these chapters together for a final reflection on how to maintain our humanity and our spiritual integrity in a technological world

Biotech Juggernaut Tina Stevens, Stuart Newman, 2019-01-21 Biotech Juggernaut Hope Hype and Hidden Agendas of Entrepreneurial BioScience relates the intensifying effort of bioentrepreneurs to apply genetic engineering technologies to the human species and to extend the commercial reach of synthetic biology or extreme genetic engineering In 1980 legal developments concerning patenting laws transformed scientific researchers into bioentrepreneurs Often motivated to create profit driven biotech start up companies or to serve on their advisory boards university researchers now commonly operate under serious conflicts of interest These conflicts stand in the way of giving full consideration to the social and ethical

consequences of the technologies they seek to develop Too often bioentrepreneurs have worked to obscure how these technologies could alter human evolution and to hide the social costs of keeping on this path Tracing the rise and cultural politics of biotechnology from a critical perspective Biotech Juggernaut aims to correct the informational imbalance between producers of biotechnologies on the one hand and the intended consumers of these technologies and general society on the other It explains how the converging vectors of economic political social and cultural elements driving biotechnology s swift advance constitutes a juggernaut It concludes with a reflection on whether it is possible for an informed public to halt what appears to be a runaway force

God's Judgments Steven J. Keillor, 2007-01-11 What do God s judgments have to do with history Using historical events Steven J Keillor pursues the thesis that divine judgment can be a fruitful category for historical investigation and that Christianity is an interpretation of history more than a worldview or philosophy

REMAKING EDEN: HOW GENETIC ENGINEERING AND CLONING WILL TRANSFORM THE AMERICAN FAMILY. LEE M. SILVER,

Rights and Liberties in the Biotech Age Sheldon Krinsky, Peter Shorett, 2005-03-11 The authors in this book with their carefully reasoned calls for a genetic bill of rights seem to me to be making a powerful conservative argument and proposing amendments far more sensible human and rational than the zealotry promoted by men like More They are assuming there is great value in human beings as we have known them in plants and food crops as we have slowly and within clear boundaries develop them over millennia in the relationship between human being and the natural world

Remaking Eden: Cloning H Lee M. Silver, 1997-12-01 On February 27 1997 a stunning announcement appeared in the British journal Nature for the first time ever a mammal a lamb named Dolly had been successfully cloned from an adult cell Less than a week later scientists reported the successful cloning of a rhesus monkey a primate whose reproduction and development is almost identical to our own With two bold and hitherto unthinkable strokes science fiction was transformed into science fact preparing the way for a miraculous event that is in all

probability inevitable the cloning of a human being A distinguished scientist and professor at Princeton University Lee M Silver reveals what awaits us in the brilliant light of the new day that is now dawning REMAKING EDEN is a fascinating exploration of the future of reprogenetic technologies a cautiously optimistic look at the scientific advances that will allow us to engineer life in ways that were unimaginable just a few short years ago Indeed in ways that go far beyond cloning and that are at once more thrilling and more frightening This is a brilliant provocative and necessary book For better or worse it describes the likely future of humankind beyond fears both reasoned and unreasonable beyond unrealistic utopian visions an extra ordinary journey into a rapidly evolving tomorrow that no man or woman can forestall but that we must all recognize and understand REMAKING EDEN is an essential primer for that tomorrow *Remaking Eden* Harry Griffin,Pam Skelton,James McLean,John Haldane,1998
