authority on the development of American firearms during the mid 19th Century having researched and written several important books and numerous articles Roy Marcot Arms Historian and author of Spencer Repeating Firearms and Remington America's Oldest Gunmaker This new monograph from Ed Hull is a masterful description Ed Hull is known for his painstaking and extensive research in obscure and hard to find sources to piece together the story of various small arms systems that have passed into history He has certainly accomplished it again with Robert's Breechloading Firearms Joe Poyer author of The American Krag Rifle and Carbine and The 45 70 Springfield Prominent and provably diligent researcher Edward Hull has once again written a good book on breechloading cartridge arms Author Hull has been researching this topic for over 10 years and his research is first rate and his documentation rock solid This book is very well footnoted and will probably be considered the final word on Benjamin Roberts and his inventions It would make for a wonderful addition to the library of the arms collector Frank Graves Arms Heritage magazine Drawing on a variety of historical sources Hull weaves a compelling history of the process and fully documents the developmental sequencing of General Roberts design The end result has been the creation of a truly excellent monograph about the inventor his work and the structural brilliance of his design Through clearly written technical descriptions of the various designs and most especially by the incorporation of illustrations showing their salient features collectors are well served by Hull's work As such it must be recommended to anyone interested in the American firearms industry of the technical development of arms in general Herb Houze Man At Arms magazine
