A. Wilson,2018-12-15 First ever narrative history of the famous aero engine that powered the Spitfire Hurricane Lancaster Mosquito and Mustang the aircraft that made the difference between victory and defeat at critical moments in the Second World War the Battle of Britain and the allied aerial offensive against Germany     *The Magic of a Name: The power behind the jets*; 1945-1987 Peter Pugh,2001     *Making Jet Engines in World War II* Hermione Giffard,2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With *Making Jet Engines in World War II* Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war s end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard s work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product     *The Magic of a Name* Peter Pugh,2002 Shows how Rolls Royce took the courageous decision to invest in a family of engines Their resolve was severely tested in the recession of the early 1990 s but the rewards came through from the mid 1990s onwards winning large orders all over the world     **The Magic of a Name ...** Harold Nockolds,1945     *A Broad Vision* Peter Pugh,2013-10-10 This is a book about the 75 years of a very successful accountancy practice They are 75 important years both in the history of the United Kingdom encompassing the Second World War and all the recessions and periods of growth in the 60 year period following that war and in the history of accountancy and how it has had to adapt to both the changes in accounting practices and in accounting technology As you will see the Price Bailey story is one of growth from a single partner in one office to 22 partners in seven offices not only in East Anglia but in the City and West End of London as well as in Guernsey in the Channel Islands Price Bailey which became a Limited Liability Partnership in 2004 is now the 29th biggest accountancy practice in the country Its new Managing Director Martin Clapson is also Chairman of the European Board of the International Association of Professional Accountants IAPA Many people view accountants as a necessary adjunct to their life because the law of the land demands that financial dealings whether personal or corporate be properly assessed and recorded and that the correct tax if any is due be paid There is no doubt that Price Bailey has always been meticulous in

making sure this work is done properly and in due time However it has also always been the practice of the firm to carry out the above in an open and friendly manner and to offer more than the mere adding up of sums As Richard Price son of one of the original partners and a very long serving member of Price Bailey will tell you in the book the firm has always made sure that they were close to the clients and often mixed with them socially As you will also see Price Bailey especially in the last twelve years under the leadership of Peter Gillman has greatly increased the services it can offer Most recently it is now authorised to give legal advice     The 50 Most Influential Britons of the Past 100 Years The 50 Most Influential Britons of the Past 100 Years Peter Pugh,2016-03-03 Peter Pugh presents his selection of not the best fastest most successful or richest but the 50 most influential British men and women of the modern world for good or ill Pugh discusses and ranks the influence of scientists and inventors such as Francis Crick John Logie Baird and Alan Turing lawmakers and leaders like prime ministers Attlee Churchill and Thatcher entrepreneurs including James Dyson Mary Quant and Terence Conran and cultural icons like J K Rowling who in the words of Lisa Simpson no less turned a generation of kids onto reading One of the most influential Britons in Pugh s book achieved influence by saying nothing for over 60 years and the top three places are held by an economist a scientist and a civil servant In what amounts to a whistle stop tour through recent British history this undoubtedly contentious and wholly enjoyable book will spark countless debates across our sceptred isle     **Transatlantic Betrayal** Andrew Porter,2013-02-15 The story of the development of the RB211 gas turbine engine and saving of Rolls Royce by the British government     The Magic of Your Name Ray Rueby,2003
