Magnetic Materials, Structures and Processing for Information Storage: Brian J. Daniels, Tom P. Nolan, Michael A. Seigler, Shan X. Wang, Christopher B. Murray, 2014-06-05 The exponential growth in information technologies has resulted in an explosion in the need for data storage with increased speed and reliability These requirements have caused rapid development of complex magnetic materials and structures The rate of technology development has led to a situation where the performance envelope of new materials is not fully known until the materials are fabricated into devices In response to this the focus of this book first published in 2001 is not only on magnetic materials but also on techniques and technology associated with device fabrication The work presented in this book effectively spans the range of the myriad of information storage research from concept to product Topics include patterned magnetic recording media characterization of magnetic thin films and structures magnetic tunnel junctions and spin dependent transport GMR and spin valves media GMR CMR writer materials and characteristics and magnetic structure processing techniques **Magnetic Materials** Khan Maaz, 2016-08-24 This book reports on the recent progresses in theory application and characterization of magnetic materials It covers a broad spectrum of topics on magnetic materials with different shapes and morphologies such as transition metals cylindrical and 2D ferromagnetic nanowires core shell nanowires monoatomic layered nanostructures and nanocrystals This book addresses diverse groups of readers with general background in physics and material science and also covers topics for the specialists in the field of magnetism It is believed that this book will be interesting for the readers and will provide a solid foundation about the topic for the students scientists and engineers working in the field of material science and condensed matter physics *Advanced Materials and Processing* , 1992 *Advanced Materials and Processing* Federal Coordinating Council for Science, Engineering, and Technology.
