National Identity And Democracy In Africa:

National Identity and Democracy in Africa Mai Palmberg, 1999 Province of South Africa Media and Identity in Africa John Middleton, Kimani Njogu, 2010-01-04 What is the role of the media in Africa How do they work How do they interact with global media How do they reflect and express local culture Incorporating both African and international perspectives Media and Identity in Africa demonstrates how media outlets are used to perpetuate question or modify the unequal power relations between Africa and the rest of the world Discussions about the construction of old and new social entities which are defined by class gender ethnicity political and economic differences wealth poverty cultural behavior language and religion dominate these new assessments of communications media in Africa This volume addresses the tensions between the global and the local that have inspired creative control and use of traditional and modern forms of media **The Politics of Ethnicity and National Identity** Santosh C. Saha, 2007 Textbook National Identity and State Formation in Africa Manuel Castells, Bernard Lategan, 2021-03-17 This book examines how the interplay between globalization and the assertion of local identities is reshaping the political landscape of Africa While defending their values against external forces people simultaneously and paradoxically use the interconnectivity of global networks to maximize their particular interests Focusing on the relation between national identity and state formation the authors explore the far reaching consequences of these contradictory dynamics Although Africa shares many common trends with other parts of the world it also displays distinctive features A region characterized by the increased mobility of people goods and ideas challenges some conventional assumptions of statecraft and also highlights the advantages of federalism not merely as a constitutional option but as a pragmatic device for managing diversity and holding fragile states together The book further explores emerging types of state formation in the same political space as exemplified by the combination of elements of a kingdom an independent state and a national power base in the province of KwaZulu Natal and the careful crafting of an alternative state within a state by the Solidarity Movement in South Africa Informed by examples and case studies drawn from different parts of Africa this book will be of great interest to students and scholars of Africa politics sociology media studies and the social sciences more generally Migration and National Identity in South Africa, 1860-2010 Audie Klotz, 2013-09-16 An extraordinary outbreak of xenophobic violence in May 2008 shocked South Africa but hostility toward newcomers has a long history Democratization has channeled such discontent into a non racial nationalism that specifically targets foreign Africans as a threat to prosperity Finding suitable governmental and societal responses requires a better understanding of the complex legacies of segregation that underpin current immigration policies and practices Unfortunately conventional wisdoms of path dependency promote excessive fatalism and ignore how much South Africa is a typical settler state A century ago its policy makers shared innovative ideas with Australia and Canada and these peers which now openly wrestle with their own racist past merit renewed attention As unpalatable as the comparison might be to contemporary advocates of multiculturalism rethinking

restrictions in South Africa can also offer lessons for reconciling competing claims of indigeneity through multiple levels of representation and rights *Understanding Identity in Africa* Robert B. Mattes,2004 *South Africa's Democracy at the Crossroads* Daniel Silander,Charlotte Silander,Herman van der Elst,Pieter Heydenrych,2022-04-18 South Africa s democracy faces increasing challenges from within whether from protest bad governance or general public dissatisfaction South Africa s Democracy at the Crossroads explores the question what are the challenges to future democratization in South Africa

Language and National Identity in Africa Andrew Simpson,2008-02-07 This book focuses on language culture and identity in nineteen countries in Africa Leading specialists mainly from Africa describe national linguistic and political histories assess the status of majority and minority languages and consider the role of language in ethnic conflict **State Building and National Identity Reconstruction in the Horn of Africa** Redie Bereketeab,2017-02-10 This book examines post secession and post transition state building in Somaliland Somalia South Sudan and Sudan It explores two intimately linked yet analytically distinct themes state building and national identity reconstruction following secession and collapse In Somaliland and South Sudan rearranging the state requires a complete metamorphosis of state institutions so that they respond to the needs and interests of the people In Sudan and Somalia the reconfiguration of the remains of the state must address a new reality and demands on the ground All four cases examined although highly variable involve conflict Conflict defines the scope depth and momentum of the state building and state reconstruction process It also determines the contours and parameters of the projects to reconstitute national identity and rebuild a nation Addressing the contested identity formation and its direct relation to state building would therefore go a long way in mitigating conflicts and state crisis

Black Culture, 2003 African Nationalism from Apartheid to Post-apartheid South Africa Ellen Wesemüller, 2005 With the help of discourse analysis and ideology critique Ellen Wesemüller establishes a theoretical framework to analyze African nationalism in apartheid and post apartheid South Africa Following the constructivist school of thought the study adopts the assumption that nations are imagined communities which are built on invented traditions It shows that historically and analytically there are two distinct concepts of nationalism constitutional and ethnic nationalism These concepts can be retraced in South Africa where they form the central antagonism of black political thought The study of post apartheid African nationalism is placed in its historical perspective by focusing on the major milestones of African National Congress discourse before and during apartheid It demonstrates that throughout its history the ANC was characterized by the rivalry between concepts of constitutional and ethnic nationalism While the former concept found its counterpart in Charterism the latter was adopted by African nationalism Though the ANC in its majority embraced Charterism it continually played with the appeal of an exclusive racial nationalism The theoretical and historical contextualization of the book allows for the investigation of the various dimensions of current ANC discourse on African nationalism Wesemüller analyses different concepts of nationalism employed by the ANC and compares these models to those discussed in academic literature She concludes that in post apartheid South Africa the historical dichotomy of Africanist and Charterist nationalism persists within the ANC While early concepts of nationalism like Mandela's rainbow nation and Mbeki's I am an African paid tribute to Charterism the discourses on the African Renaissance and Mbeki's two nation address at least leave openings for Africanist interpretations Furthermore the analysis shows that nationalism is not only a product of discourse but also one of material conditions The study provides evidence that it is not only the ANC that hijacks African nationalism in order to mobilize their electorate and push through unpopular policy choices Also there are compelling material reasons for some South Africans to adopt a nationalist agenda This is demonstrated by the new black bourgeoisie that mediates the gap between rich and poor as well as black and white African nationalism in this regard serves to legitimate domination and existing relations of inequality It affirms an African elite while neither uplifting the majority of African poor nor threatening the material privileges of white South Africans Lastly Ellen Wesemüller gives an outlook on the political implications of a resurrected nationalism The effects can be analyzed according to the two promises of nationalism superiority over outsiders and equality between insiders Superiority in post apartheid South Africa is established over other African countries immigrants and inner South African groups that are considered foreign Cricket and National Identity in the Postcolonial Age Stephen Wagg, 2005-10-09 Bringing together leading international writers on cricket and society this important new book places cricket in the postcolonial life of the major Test playing countries Exploring the culture politics governance and economics of cricket in the twenty first century this book dispels the age old idea of a gentle game played on England's village greens This is an original political and historical study of the game's development in a range of countries and covers cricket in the new

Commonwealth Sri Lanka Pakistan the Caribbean and India the cricket cultures of Australia New Zealand and post apartheid South Africa cricket in England since the 1950s This new book is ideal for students of sport politics history and postcolonialism as it provides stimulating and comprehensive discussions of the major issues including race migration globalization neoliberal economics the media religion and sectarianism [Research Outputs of the University of Botswana, 1995-2001](#) University of Botswana,2003 **National Liberation Movements as Government in Africa** Redie Bereketeab,2017-09-08 Africa is well known for the production of national liberation movements NLMs stemming from a history of exploitation colonisation and slavery NLMs are generally characterised by a struggle carried out by or in the name of suppressed people for political social cultural economic territorial liberation and decolonisation Dozens of NLMs have ascended to state power in Africa following a successful violent popular struggle either as an outright military victory or a negotiated settlement National Liberation Movements as Government in Africa analyses the performance of NLMs after they gain state power The book tracks the initial promises and guiding principles of NLMs against their actual record in achieving socio economic development goals such as peace stability state building and democratisation The book explores the various different struggles for liberation whether against European colonialism white minority rule neighbouring countries or for internal reform or regime change Bringing together case studies from Somalia Somaliland Uganda Ethiopia Eritrea South Sudan Namibia Angola Mozambique South Africa Zimbabwe and Algeria the book builds a comprehensive analysis of the challenges NLMs face when ascending to state power and why so many ultimately end in failure This is an ideal resource for scholars policy makers and students with an interest in African development politics and security studies
