Numerical Methods in Quaternary Pollen Analysis Harry John Betteley Birks, A. D. Gordon, 1985 Palynologie Arch obostatistik **An Annotated Bibliography of Numerical Methods in Quaternary Pollen Analysis 1985-1989** Harry John Betteley Birks, Hazel Juggins, Magne Sætersdal, 1990 **Long-term Environmental Change in Arctic and Antarctic Lakes** Reinhard Pienitz, Marianne S.V. Douglas, John P. Smol, 2007-11-08 Concerns about the effects of global climate change have focused attention on the vulnerability of circumpolar regions Long term historical data are needed to better understand the magnitude and direction of environmental change related to both natural and anthropogenic causes as well as to assess patterns of natural variability The paucity of instrumental data requires that proxy methods be used The abundance of lakes throughout the Arctic and Antarctic makes paleolimnological approaches especially powerful tools to assist interpretations of environmental change This book provides a synthesis of the broad spectrum of techniques available for generating long term environmental records from circumpolar lakes It also provides overviews of the geographic extent of paleolimnological work completed thus far in these regions It explores the diverse ways in which paleolimnology is used to address the pressing and emerging environmental issues of high latitude regions By providing both an introduction and in depth reviews this volume is of interest to students and advanced researchers alike who are studying earth atmospheric and environmental sciences

Encyclopedia of Quaternary Science Cary Mock, 2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up to date reference work on this important and highly varied area of research There are lots of new articles and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written The second edition will contain about 375 articles written by leading experts around the world This major reference work is richly illustrated with more than 3 000 illustrations most of them in colour Research in the Quaternary sciences has advanced greatly in the last 10 years especially since topics like global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigate seamlessly from one unfamiliar topic to the next *Tracking Environmental Change Using Lake Sediments* John B.H. Birks, André F. Lotter, Steve Juggins, John P. Smol, 2012-04-08 Numerical and statistical methods have rapidly become part of a palaeolimnologist's tool kit They are used to explore and summarise complex data reconstruct past environmental variables

from fossil assemblages and test competing hypotheses about the causes of observed changes in lake biota through history This book brings together a wide array of numerical and statistical techniques currently available for use in palaeolimnology and other branches of palaeoecology Visit <http://extras.springer.com> the Springer's Extras website to view data sets figures software and R scripts used or mentioned in this book

Quaternary Vegetation Dynamics of Europe Gerhard Lang, Brigitta Ammann, Karl-Ernst Behre, Willy Tinner, 2023-06-12 Based on palaeoecological studies by many authors this book gives an overview of the changing history of the European plant cover during the past 2.6 million years characterized by numerous cold and warm periods The period of the last 20 000 years from the Last Glacial Maximum to the present is presented in detail with special emphasis on the vegetation dynamics of Europe the history of selected woody plants the development of lakes and bogs and the emergence of European cultural landscapes under the influence of humans over thousands of years In the analysis of the glacial and interglacial periods the focus is on the different vegetation developments and the progressive impoverishment of the European flora Further important topics are the spatio temporal patterns and

causes of long term vegetation changes the legacies of disturbances and land use on vegetation composition the role of palaeoecology in nature conservation and its contribution to ecology and environmental sciences In addition to recent research results the book provides an overview of the main palaeoecological research methods It concludes with a summary of the history of palaeoecology and Quaternary botany For the first time a detailed synthesis is presented of the many findings on European vegetation dynamics which are complex and increasingly difficult to summarize Numerous figures and tables many of them original accompany the text The bibliography includes over 3000 publications This book is primarily intended for students researchers and practitioners in plant ecology palaeoecology palaeoclimatology forestry agronomy Quaternary sciences climate sciences biogeography geography and archaeology *Paleoethnobotany* Deborah M. Pearsall, 2013-10-22 This book describes the approaches and techniques of paleoethnobotany the study of the interrelationships between human populations and the plant world through the archaeological record Its purpose is twofold First it assembles in one volume the three major methods of paleoethnobotany the analysis of macroremains pollen analysis and phytolith analysis for the student or professional interested in the field Second it presents on paleoethnobotanist s view of the discipline its past present and future its strengths and weaknesses and its role in modern archaeology A comprehensive reference work for archaeologists and paleobotanists interested in reconstructing interrelationships between humans and plants from the archaeological record The first general of work theory and methods to emerge from this subdiscipline which has developed during the past twenty years Makes the approaches and techniques of this field more accessible to the general anthropological and botanical audiences Offers archaeologists a handbook of field sampling and flotation techniques as well as an introduction to methods of analysis and interpretation in paleoethnobotany Phytolith Analysis Dolores R. Piperno, 2014-06-28 This is a methodological guide to the use of plant opal phytolith analysis in paleoenvironmental and paleoecological reconstruction It is the first book length treatment of this promising technique which has undergone rapid development within the past few years and is now beginning to be used with considerable success by paleobotanists who serve the archaeological and paleontological research communities It will be mandatory reading for all paleobotanists paleoecologists and archaeological scientists
