The political economy of food and nutrition policies Per Pinstrup-Andersen, 1993-01-01 Few nutritionists and economists fully appreciate how the political environment shapes policy and subsequently affects the relevance of their policy recommendations When governments fail to follow the recommendations of nutritionists and economists and are unable to design and implement cost effective nutrition programs and policies it is often attributed to politics or to lack of political will on the part of decisionmakers Past nutrition planning efforts frequently failed to understand the goals and behavior of the various agents and institutions inside and outside the government that in the final analysis determine whether the planning effort is successful In *The Political Economy of Food and Nutrition Policies* Per Pinstrup Andersen brings together a group of

distinguished authorities to improve the understanding of how nutrition policies are formulated within larger political and economic contexts and how public sector agencies behave with regard to food and nutrition

Handbook of Nutrition and Ophthalmology Richard David Semba, 2007-12-06 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient health professionals questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the organization of their volume The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then may invite the leading authorities from around the world to be part of their initiative The editor authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences

The Political Economy of Hunger: Volume 1: Entitlement and Well-being Jean Dreze (ed), Amartya Sen, 1990 Part of a major report on world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world

Intervention In Child Nutrition Jan Hoorweg, Rudie Niemeijer, 2013-10-28 First published in 1989 The studies that form the basis for this monograph were carried out between 1976 and 1979 The African Studies Centre in Leiden has a standing interest in child nutrition and provided the funds and resources for what was ambitiously termed the Nutrition Intervention Research Project

An Anthology Regarding Merit Goods Wilfried Ver Eecke, 2007 Merit Goods are those goods and services that the government feels that people will under consume and which therefore ought to be subsidized or provided free at the point of use The consumption of merit goods is thought to generate positive externality effects where the social benefit from consumption exceeds the private benefit Examples of merit goods are health services education public libraries and inoculations against certain diseases Van Eecke has assembled a collection of articles and papers that covers the issue of merit goods from a variety of perspectives and has provided a single source for researchers and economists interested in the issue The work begins with a thorough look at Musgrave's notion of merit goods The subsequent sections expand the definition of merit goods and provide information on the application of merit goods theory in economic philosophical social and religious terms The reference also has an extensive bibliography

National Library of Medicine

Current Catalog National Library of Medicine (U.S.), *Sociologies of Food and Nutrition* Wm. Alex McIntosh, 2013-11-21
Here Wm Alex McIntosh analyzes the relationship between food and nutrition and social factors using a wide array of sociological theories. The author applies theories of social organization, culture, social stratification, social change, rural sociology, the sociology of the body, and social problems to empirical problems in food and nutrition. By doing so, he sheds light on issues such as the rise of the state, population growth, famine, obesity, eating disorders, the maldistribution of food across class, gender, and ethnic boundaries, and the changing nature of the food industry.
