Workmanship Klaus-Dieter Weiss, 2012-12-13 today the name RKW Architektur St dtebau evokes two hundred architects whose work never fails to convince The reason does not lie in the narrowly defined architectural language of individual leaders of the firm More than in any other firm the various teams are given generous latitude for independent initiative Thus this documentation of the last ten years with cross references to the development of this unique partnership since 1950 doesn't just present sixty five structures and projects from an internationally sought after firm On the contrary in its search for the secret of the firm's success it looks behind the scenes in numerous interviews and essays The works considered range from the research facilities for AUDI the new sciences campus of RWTH Aachen University and the corporate headquarters of Vodafone Debitel and Arag to urban revitalization projects residential buildings schools sports halls railroad stations city halls banks urban office buildings and shopping centers and the stadium for the 2012 European Soccer Championship in Gdansk Avery Index to Architectural Periodicals, 2d Ed., Rev. and Enl Avery Library, 1997

Located in the heart of Berlin Alexanderplatz is associated with the famous novel by Alfred Döblin with the avant garde designs of Mies van der Rohe and with the office buildings of Peter Behrens. In the former GDR it was the capital's major square. Today it assumes a key position in the future development of Berlin. The future form of Alexanderplatz was determined in an ideas competition. Hans Kollhoff the competition winner designed through a significant ensemble of high risers a new city district which sets new standards for Berlin. The second prize was awarded to Daniel Libeskind who presented his avant garde concept of the square with consummate ease. An introductory text covers the history of Alexanderplatz while the rest of the book documents the competition proceedings which stimulated heated debates on the future of Berlin.
