Invested Paul Crosthwaite, Peter Knight, Nicky Marsh, Helen Paul, 2022-12-21 Invested examines the perennial and nefarious appeal of financial advice manuals Who hasn't wished for a surefire formula for riches and a ticket to the good life For three centuries investment advisers of all kinds legit and otherwise have guaranteed that they alone can illuminate the golden pathway to prosperity despite strong evidence to the contrary In fact too often they are singing a siren song of devastation And yet we keep listening Invested tells the story of how the genre of investment advice developed and grew in the United Kingdom and the United States from its origins in the eighteenth century through today as it saturates our world The authors analyze centuries of books TV shows blogs and more all promising techniques for amateur investors to master the ways of the market from Thomas Mortimer's pathbreaking 1761 work Every Man His Own Broker through the Gilded Age explosion of sensationalist investment manuals the early twentieth century emergence of a vernacular financial science and the more recent convergence of self help and personal finance Invested asks why in the absence of evidence that such advice reliably works guides to the stock market have remained perennially popular The authors argue that the appeal of popular investment advice lies in its promise to level the playing field giving outsiders the privileged information of insiders As Invested persuasively shows the fantasies sold by these writings are damaging and deceptive peddling unrealistic visions of easy profits and the certainty of success while trying to hide the fact that there is no formula for avoiding life's economic uncertainties and calamities

Mandelbrot, 2013-03-09 IN 1959 61 while the huge Saarinen designed research laboratory at Yorktown Heights was being built much of IBM s Research was housed nearby My group occupied one of the many little houses on the Lamb Estate complex which had been a sanatorium housing wealthy alcoholics The picture below was taken about 1960 It shows from right to left T e Hu now at the University of California Santa Barbara I am next staring at a network I have just written on the blackboard Then comes Paul Gilmore late of the University of British Columbia then seated Richard Levitan now retired and

at the left is Benoit Mandelbrot x FOREWORD EF Even in a Lamb Estate populated exclusively with bright research oriented people Benoit always stood out His thinking was always fresh and I enjoyed talking with him about any subject whether technical poli tical or historical He introduced me to the idea that distributions having infinite second moments could be more than a mathematical curiosity and a source of counter examples This was a foretaste of the line of thought that eventually led to fractals and to the notion that major pieces of the physical world could be and in fact could only be modeled by distrib utions and sets that had fractional dimensions Usually these distributions and sets were known to mathematicians as they were known to me as curiosities and counter intuitive examples used to show graduate students the need for rigor in their proofs
