Runes And Germanic Linguistics:

Runes and Germanic Linguistics Elmer H. Antonsen, 2002 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. *Runes and Germanic Linguistics* Elmer H. Antonsen, 2011-04-20 The older runic inscriptions ca AD 150-450 represent the earliest attestation of any Germanic language. The close relationship of these inscriptions to the archaic Mediterranean writing traditions is demonstrated through the linguistic and orthographic analysis presented here. The extraordinary importance of these inscriptions for a proper understanding of the prehistory and early history of the present day Germanic languages including English becomes abundantly clear once the accumulation of unfounded claims of older mythological and cultic studies is cleared away.

Advances in Old Frisian Philology Rolf H. Bremmer, Stephen Laker, Oebele Vries, 2007 Like its two predecessors *Aspects of Old Frisian Philology* 1990 and *Approaches to Old Frisian Philology* 1998 *Advances in Old Frisian Philology* combines contributions by specialists of medieval Frisian studies with papers by international specialists from adjacent fields who have been invited for the occasion to bring their expertise to the discipline of Old Frisian. Together the diverse approaches considerably advance our knowledge of and insight into various aspects of Old Frisian philology.

The English Language Before England Bernard Mees, 2022-09-16 This pioneering work explores epigraphic evidence for the development of English before the Anglo Saxon period bringing together linguistic, historical and archaeological perspectives on early inscriptions making them more accessible to a wider audience. The volume offers a new account of the Germanic development of Anglo Saxon England beginning with an examination of the earliest inscriptions from northern Europe and the oldest inscriptions preserving Germanic names many of which have only been discovered since the 1980s. The book charts the origins of key terms such as Angle, Saxon and Jute and early writing systems used by Germanic peoples. Drawing on epigraphic evidence from northwestern Germany through to southwestern Denmark and sub-Roman Britain, Mees situates the analysis within historical and linguistic frameworks but also provides archaeological contextualisations assessed chronologically for the inscriptions. Taken together the work re-examines existing models of the early development of English through the lens of contemporary approaches opening paths for new directions in research on historical

Reading the Runes in Old English and Old Norse Poetry Thomas Birkett, 2017-03-27 Reading the Runes in Old English and Old Norse Poetry is the first book length study to compare responses to runic heritage in the literature of Anglo Saxon England and medieval Iceland The Anglo Saxon runic script had already become the preserve of antiquarians at the time the majority of Old English poetry was written down and the Icelanders recording the mythology associated with the script were at some remove from the centres of runic practice in medieval Scandinavia Both literary cultures thus inherited knowledge of the runic system and the traditions associated with it but viewed this literate past from the vantage point of a developed manuscript culture There has as yet been no comprehensive study of poetic responses to this scriptural heritage which include episodes in such canonical texts as Beowulf the Old English riddles and the poems of the Poetic Edda By analysing the inflection of the script through shared literary traditions this study enhances our understanding of the burgeoning of literary self awareness in early medieval vernacular poetry and the construction of cultural memory and furthers our understanding of the relationship between Anglo Saxon and Norse textual cultures The introduction sets out in detail the rationale for examining runes in poetry as a literary motif and surveys the relevant critical debates The body of the volume is comprised of five linked case studies of runes in poetry viewing these representations through the paradigm of scriptural reconstruction and the validation of contemporary literary historical and religious sensibilities

The History of the Reinforced Demonstrative in Nordic Eric T. Lander, 2020-10-26 The task of reconstructing the reinforced demonstrative paradigm for early Nordic has been called impossible by the eminent Einar Haugen In *The History of the Reinforced Demonstrative in Nordic* Eric T. Lander aims to accomplish exactly this by way of an exhaustive study of the pronoun *s* attestations in the Viking Age runic inscriptions which are the earliest forms of this item to be recorded in Scandinavia The detailed picture of regional variation that emerges is then used to inform reconstructions of the paradigm from Proto Nordic to Common Nordic The book represents the first serious attempt in historical comparative linguistics to grapple with the morphological development of the North West Germanic reinforced demonstrative since the work of 19th century scholars like Sophus Bugge

Phonological Evidence from the Continental Runic Inscriptions Martin Findell, 2012-10-01 The linguistic analysis of runic inscriptions on the Continent tends to focus on individual texts or on groups of texts seen as parallel We can advance our understanding of the state of Continental Germanic dialects in the 5th 7th centuries by examining the evidence for the major sound changes in a larger dataset The study begins with a brief discussion of the Proto Germanic phonemic system and the major processes by which the systems of Old High German OHG and Old Saxon OS develop from it The main body of the work consists of the analysis of a corpus of 90 inscriptions including but not confined to those conventionally labeled South Germanic for evidence of these changes Rather than making the individual inscription the focus for analysis the investigation groups together all possible witnesses to a particular phonological process In many respects the data are found to be consistent with the anticipated developments of OHG and OS but we encounter some problems which the existing models of the sound changes cannot account for There is also some evidence for processes at work in the dialects of the inscriptions which are not attested in OHG or OS
