**Nature Next Door** Ellen Stroud, 2012-12-15 The once denuded northeastern United States is now a region of trees. *Nature Next Door* argues that the growth of cities, the construction of parks, the transformation of farming, the boom in tourism, and changes in the timber industry have together brought about a return of northeastern forests. Although historians and historical actors alike have seen urban and rural areas as distinct, they are in fact intertwined, and the dichotomies of farm and forest, agriculture and industry, and nature and culture break down when the focus is on the history of Northeastern woods. Cities, trees, mills, rivers, houses, and farms are all part of a single transformed regional landscape. In an examination of the cities and forests of the northeastern United States, with particular attention to the woods of Maine, New Hampshire, Pennsylvania, and Vermont, Ellen Stroud shows how urbanization processes there fostered a period of recovery for forests, with cities not merely consumers of nature but creators as well. Interactions between city and hinterland in the twentieth century Northeast created a new wildness of metropolitan nature, a reforested landscape intricately entangled with the region's cities and towns.

**The Lobster Coast** Colin Woodard, 2005-04-26 A thorough and engaging history of Maine's rocky coast and its tough-minded people. *Boston Herald*: A well-researched and well-written cultural and ecological history of stubborn perseverance. *USA Today*: For more than four hundred years, the people of coastal Maine have clung to their rocky, wind-swept lands, resisting outsiders' attempts to control them while harvesting the astonishing bounty of the Gulf of Maine. Today's independent, self-sufficient lobstermen belong to the communities imbued with a European sense of ties between land and people but threatened by the forces of homogenization spreading up the eastern seaboard. In the tradition of William Warner's *Beautiful Swimmers*, veteran journalist Colin Woodard, author of *American Character: A History of the Epic Struggle Between Individual Liberty and the Common Good*, traces the history of the rugged fishing communities that dot the coast of Maine and the prized crustacean that has long provided their livelihood. Through forgotten wars and rebellions and with a deep tradition of resistance to interference by people from away, Maine's lobstermen have defended an earlier vision of America while defying the tragedy of the commons, the notion that people always overexploit their shared property. Instead, these icons of American individualism represent a rare example of true communal values and collaboration through grit, courage, and hard-won wisdom.
