Displacing Human Rights Adam Branch, 2011-08-22 Today Western intervention is a ubiquitous feature of violent conflict in Africa Humanitarian aid agencies community peacebuilders microcredit promoters children's rights activists the World Bank the International Criminal Court the U S military and numerous others have involved themselves in African conflicts all claiming to bring peace and human rights to situations where they are desperately needed However according to Adam Branch Western intervention is not the solution to violence in Africa but instead can be a major part of the problem often undermining human rights and even prolonging war and intensifying anti civilian violence Based on an extended case study of Western intervention into northern Uganda's twenty year civil war and drawing on Branch's own extensive research and human rights activism there this book lays bare the reductive understandings motivating Western intervention in Africa the inadequate tools it insists on employing its refusal to be accountable to African citizenries and most important its counterproductive consequences for peace human rights and justice In short Branch demonstrates how Western interventions undermine the efforts Africans themselves are undertaking to end violence in their own communities The book does not end with critique however Motivated by a commitment to global justice it proposes concrete changes for Western humanitarian peacebuilding and justice interventions as well as a new normative framework for re orienting the Western approach to violent conflict in Africa around a practice of genuine solidarity A key strength of the book is its ability to analyse and reveal common patterns in seemingly disparate and complex empirical instances of counterproductive human rights interventions in Uganda This book should be required reading for all those working on various themes in Africa today The Journal of Modern African Studies This book provides a pessimistic but much needed critique of the history of foreign intervention in Northern Uganda Responsible discussions of foreign policy must consider the ways in which great power politics can hurt people in the name of protection this book is an excellent place to start that discussion The Christian Science Monitor

Peaceland Séverine Autesserre, 2014-05-19 This book suggests a new explanation for why international

peace interventions often fail to reach their full potential Based on several years of ethnographic research in conflict zones around the world it demonstrates that everyday elements such as the expatriates social habits and usual approaches to understanding their areas of operation strongly influence peacebuilding effectiveness Individuals from all over the world and all walks of life share numerous practices habits and narratives when they serve as interveners in conflict zones These common attitudes and actions enable foreign peacebuilders to function in the field but they also result in unintended consequences that thwart international efforts Certain expatriates follow alternative modes of thinking and acting often with notable results but they remain in the minority Through an in depth analysis of the interveners everyday life and work this book proposes innovative ways to better help host populations build a sustainable peace *Human Security in Turkey* Alpaslan Özerdem,Fusun Özerdem,2013-07-04 This edited volume explores human security challenges in the context of Turkey Turkey occupies a critical geopolitical position between Europe the Middle East and the Caucasus It is an important peace broker in regional conflicts and a leading country in peacekeeping operations and has been a generous donor for disaster response around the world However Turkey is also facing a number of fundamental sociocultural and development challenges and its internal stability is affected by a protracted armed conflict based on Kurdish separatism In other words Turkey is at a crossroads in its transformation from a state centred security perspective to one based on human security To explore selected human security challenges within a wider context of peace and development this volume focuses on a number of key issues in relation to democratization and social cohesion before going on to investigate the role of Turkey as an agent of peace in the international context Written by academics from the fields of peace studies international relations politics and development studies the discussions examine and highlight the issues that Turkey must overcome if it is to successfully strengthen its human security trajectories in the near future This book will be of much interest to students of human security Turkish politics conflict management peace studies and IR in general *Shari'a and the Constitution in Contemporary Legal Models* Federico Lorenzo Ramaioli,2024-03-23 This comparative law book aims at formulating a new analytical approach to constitutional comparisons assuming as a starting point the different legal perspectives implied in the Sunni Islamic outlook on the juridical phenomena and the Western concept of law with particular reference to constitutionalism The volume adopts a wider and comprehensive viewpoint comparing the different ways in which the Islamic shar a and Western legal categories interact regardless of substantive contents of specific provisions thus avoiding conceptual biases that can sometime affect present literature on the matter The book explores the various dynamics subtended to the interactions between shar a and Western constitutionalism providing a new classification to the different contemporary models The philosophical and legal comparisons are analyzed in a dynamic way based on a wide range of contemporary constitutional systems virtually encompassing all the States in which Sunni Islam plays a major cultural role and taking also into consideration non State actors and non recognized actors Published in cooperation with gLAWcal Global

Law Initiatives for Sustainable Development Hornchurch Essex United Kingdom **Routledge Handbook of Diplomacy and Statecraft** B.J.C. McKercher, 2012-03-12 Despite post Cold War arguments about their demise Great Powers not only continue to thrive with lesser Powers they form the basis of the constellation of global politics This topical new Handbook illustrates how and why the new international order has evolved and is still evolving since the end of the Cold War through the application of diplomacy and statecraft Including cutting edge contributions from over 40 scholars the handbook is structured around seven sections Context of Diplomacy Great Powers Middle Powers Developing Powers International Organisations and Military Alliances International Economy Issues of Conflict and Co operation Through analysis of a wide range of case studies the Handbook assesses the diplomacy and statecraft of individual powers offering insights into how they function their individual perception of national interests and the roles they play in modern statecraft The contributors also seek to evaluate the organizations and contemporary issues that continue to influence the shaping of the new international order A comprehensive survey of diplomacy across the world this work will be essential reading for scholars and professionals alike **The Trouble with the Congo** Séverine Autesserre, 2010-06-14 The Trouble with the Congo suggests a new explanation for international peacebuilding failures in civil wars Drawing from more than 330 interviews and a year and a half of field research it develops a case study of the international intervention during the Democratic Republic of the Congo s unsuccessful transition from war to peace and democracy 2003 2006 Grassroots rivalries over land resources and political power motivated widespread violence However a dominant peacebuilding culture shaped the intervention strategy in a way that precluded action on local conflicts ultimately dooming the international efforts to end the deadliest conflict since World War II Most international actors interpreted continued fighting as the consequence of national and regional tensions alone UN staff and diplomats viewed intervention at the macro levels as their only legitimate responsibility The dominant culture constructed local peacebuilding as such an unimportant unfamiliar and unmanageable task that neither shocking events nor resistance from select individuals could convince international actors to reevaluate their understanding of violence and intervention Local Interests and American Foreign Policy Karl Sandstrom, 2013-07-18 This book provides an alternative perspective on how social interest groups form and interact to affect interventions It combines historic sociological and international relations perspectives in a framework through which to view the relevant socio political dynamics in target societies At a time when American foreign policy seeks to redefine its objectives and its methods of intervention the monolithic ideological assumptions of the state as the panacea to all social ailments both as a format and a vehicle of norm delivery seemingly dooms American foreign policy and European allies to the repetition of old mistakes In environments where interests and priorities are shaped on a highly localised basis interventionist agendas often lack relevant meaning The book focuses in particular on the contrast between the assumptions inherent in Western interventionist strategies and social interest formation in Afghanistan Somaliland and Somalia Based on extensive fieldwork the book draws

on available literature and on interviews with local population or international aid and development workers The conclusion is that in the cases examined the agency of local interest groups largely controls the outcome of external strategies This book will be of great interest to students and scholars of US Foreign Policy International Relations and Security Studies

Conflict Management in Nigeria Oshita O. Oshita, 2007-04-20 In Conflict Management in Nigeria Issues and Challenges Dr Oshita O Oshita one of the leading peace researchers in Nigeria interrogates a number of cross cutting issues and challenges that may be encountered in the process of engaging with conflict mitigation in Nigeria He explores the complex issues involved just as he analyses the challenges arising from the political economy of conflict management in Nigeria from historical and contemporary perspectives *Social Relations in Human and Societal Development* C. Psaltis, A. Gillespie, A. Perret-Clermont, 2015-05-19 Social interaction is the engine which drives an individual's psychological development and it can create changes on all levels of society Social Relations in Human and Societal Development includes essays by internationally renowned academics from a range of disciplines including social psychology international relations and child development *Critical Perspectives on Human Security* David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security Studies and IR The Human Security paradigm has had considerable significance for academics policy makers and practitioners Under the rubric of Human Security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the Cold War era Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices However in its wider use Human Security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non Western spaces or as legitimizing attacks on Iraq and Afghanistan This book is concerned with critical perspectives towards Human Security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security This book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations *The Politics of Civil-Military Cooperation* C. Ankersen, 2014-09-09 Ankersen examines Canada's civil military cooperation efforts in Kosovo Bosnia and Afghanistan through the lens of Clausewitz's Remarkable Trinity The book reveals how military action is the product of influences from the government the armed forces and the people at home *The Future of Just War* Caron E.

Gentry, Amy E. Eckert, 2014-01-01 Just War scholarship has adapted to contemporary crises and situations But its adaptation has spurned debate and conversation a method and means of pushing its thinking forward Now the Just War tradition risks becoming marginalized This concern may seem out of place as Just War literature is proliferating yet this literature remains welded to traditional conceptualizations of Just War Caron E Gentry and Amy E Eckert argue that the tradition needs to be updated to deal with substate actors within the realm of legitimate authority private military companies and the questionable moral difference between the use of conventional and nuclear weapons Additionally as recent policy makers and scholars have tried to make the Just War criteria legalistic they have weakened the tradition s ability to draw from and adjust to its contemporaneous setting The essays in *The Future of Just War* seek to reorient the tradition around its core concerns of preventing the unjust use of force by states and limiting the harm inflicted on vulnerable populations such as civilian noncombatants The pursuit of these challenges involves both a reclaiming of traditional Just War principles from those who would push it toward greater permissiveness with respect to war as well as the application of Just War principles to emerging issues such as the growing use of robotics in war or the privatization of force These essays share a commitment to the idea that the tradition is more about a rigorous application of Just War principles than the satisfaction of a checklist of criteria to be met before waging just war in the service of national interest

Bait and Switch Julie A. Mertus, 2008-02-19 It has become routine for the US government to invoke human rights to justify its foreign policy decisions and military ventures But this human rights talk has not been supported by a human rights walk Policy makers consistently apply a double standard for human rights norms one the rest of the world must observe but which the US can safely ignore Based on extensive interviews with leading foreign policy makers military officials and human rights advocates Mertus tells the story of how America s attempts to promote human rights abroad have paradoxically undermined those rights in other countries The second edition brings the story up to date including new sections on the second half of the Bush administration and the Iraq War and updates on Afghanistan The first edition of *Bait and Switch* won the American Political Science Association s 2005 Best Book on Human Rights

Families of the Missing Simon Robins, 2013-05-29 *Families of the Missing* interrogates the current practice of transitional justice from the viewpoint of the families of those disappeared and missing as a result of conflict and political violence Studying the needs of families of the missing in two contexts Nepal and Timor Leste the practice of transitional justice is seen to be rooted in discourses that are alien to predominantly poor and rural victims of violence and that are driven by elites with agendas that diverge from those of the victims In contrast to the legalist orientation of the global transitional justice project victims do not see judicial process as a priority Rather they urgently seek an answer concerning the fate of the missing and to retrieve human remains As important are livelihood issues where families are struggling to cope with the loss of breadwinners and seek support to ensure economic security Although rights are the product of a discourse that claims to be global and universal needs are necessarily local and particular the product of culture

and context And it is from this perspective that this volume seeks both to understand the limitations of transitional justice processes in addressing the priorities of victims and to provide the basis of an emancipatory victim centred approach to transitional justice

UN-Tied Nations Kate Seaman, 2016-02-24 With the recent developments in Syria the United Nations is once again making headlines The failure to reach an agreement on a Security Council resolution demonstrates the continued problems in forging a coherent international response to crisis situations This lack of coherence continues despite recognition of the need for more cooperation to solve the growing list of global problems With the relative success of global governance initiatives in relation to the environment health issues and economic problems the focus has increasingly shifted to the problems of international security This timely and important book represents a response to that shift and the implications this has for the wider international system Using a number of relevant case studies including the UN

interventions in Bosnia Somalia Burundi the Democratic Republic of Congo and East Timor it examines the securitisation of global governance through the prism of United Nations Peacekeeping Operations and demonstrates that the development of both global governance and global security governance have transformed the environment in which international organisations such as the United Nations are operating Moreover this book brings together a number of the key academic debates surrounding both global security governance and peacekeeping It combines an examination of the power relations of global security governance with the changing nature of peacekeeping operations By bringing the two areas together the book for the first time bridges existing literatures and debates from theoretical discussions of global governance to practical examinations of peacekeeping operations UN Tied Nations provides a concise and analytical introduction to the ongoing debates around the development of global governance global security governance and the continuous impact these are having on the ability of the United Nations to act as an international peacekeeper
