G. Baldwin, 2017-10-13 LARGE PRINT EDITION title *The Flush Times Of Alabama and Mississippi* By Joseph G Baldwin SOME of these papers were published in the SOUTHERN LITERARY MESSENGER and having met with a favorable reception from the Public and a portion of the Press the author has yielded to the solicitations of his own vanity and other flattering friends and collected them in a volume with other pieces of the same general character The scheme of the articles he believes to be original in design and execution at least no other work with which he is acquainted has been published in the United States designed to illustrate the periods the characters and the phases of society some notion of which is attempted to be given in this volume The author under the tremor of a first publication felt strongly inclined to offer a sneaking apology for the many errors and imperfections of his work such as the fact that the articles were written in haste under the pressure of professional engagements and amidst constant interruptions and that he has no time or opportunity for correction and revision But he anticipated the too ready answer to such a plea If you had no time to write well why did you write at all Who constrained you If you were not in dress to see company why come unbidden into the presence of the public Why not at least wait until you were fit to be presented He confesses that he sees no way to answer these tough questions unless the apology of Falstaff for rushing into the presence of King Hal before he had time to have made new liveries stained with travel and sweating with desire to see him be a good one as inferring the zeal he had to see him the earnestness of affection the devotion but in poor Jack s case not to deliberate not to remember not to have patience to shift him was not a very effectual excuse for his coming out of sorts and we are afraid that that other Sovereign the Public is not more facile of approach or more credulous of excuses for unfortunately the ardor of an author s greeting is something beyond the heat of the Public s reception of him or as Pat expresses it the reciprocity of feeling is all on one side Without apology therefore he gives these leaves to the winds with that feeling of comfort and composure which comes of the knowledge that let the venture go as it may he loses little who puts but little at hazard *Lands to Mississippi and Alabama. Letter from the Acting Commissioner of General Land Office, in Answer to a Resolution of the House of March 15, 1872, Relative to the Disposition of the Lands Granted to the States of Mississippi and Alabama, to Aid in the Construction of a Railroad from the Mouth of the Ohio River to the City of Mobile, Alabama. Barney, 2004 This is an outline of the economic crisis in the South based on the declining yields increasing class stratification and higher slave prices It supplies data on the property holdings and occupations of the elected representatives and finds the secessionists to be young probably lawyers who were both ambitious and confident Because the economic dislocation of the 1850s made people receptive to a rhetoric that emphasized conspiratorial abolitionists and almost paranoid fear of blacks and strangers the politicians were able to persuade their constituents that a real crisis did exist and that secession was the only remedy **From Greenhouse to Icehouse** Donald R. Prothero, Linda C. Ivany, Elizabeth A. Nesbitt, 2003 The marine Eocene Oligocene transition of 34

million years ago was a critical turning point in Earth's climatic history when the warm high diversity greenhouse world of the early Eocene ceded to the glacial icehouse conditions of the early Oligocene. This book surveys the advances in stratigraphic and paleontological research and isotopic analysis made since 1989 in regard to marine deposits around the world. In particular, it summarizes the high resolution details of the so-called doublet interval roughly 45 to 34 million years ago which is critical to testing climatic and evolutionary hypotheses about the Eocene deterioration. The authors' goals are to discuss the latest information concerning climatic and oceanographic change associated with this transition and to examine geographic and taxonomic patterns in biotic turnover that provide clues about where, when, and how fast these environmental changes happened. They address a range of topics including the tectonic and paleogeographic setting of the Paleogene, specific issues related to the stratigraphy of shelf deposits, advances in recognizing and correlating boundary sections, trends in the expression of climate change, and patterns of faunal and floral turnover. In the process, they produce a valuable synthesis of patterns of change by latitude and environment.
