Medicine and Paradoxography in the Ancient World George Kazantzidis, 2019-08-05

The present volume offers a systematic discussion of the complex relationship between medicine and paradoxography in the ancient world For a long time the relationship between the two has been assumed to be virtually non existent Paradoxography is concerned with disclosing a world full of marvels and wondrous occurrences without providing an answer as to how these phenomena can be explained Its main aim is to astonish and leave its readers bewildered and confused By contrast medicine is committed to the rational explanation of human phusis which makes it in a number of significant ways incompatible with thauma This volume moves beyond the binary opposition between rational and non rational modes of thinking by focusing on instances in which the paradox is construed with direct reference to established medical sources and beliefs or inversely on cases in which medical discourse allows space for wonder and admiration Its aim is to show that thauma rather than present a barrier functions as a concept which effectively allows for the dialogue between medicine and paradoxography in the ancient world

Rethinking Secularization Gary Gabor, Herbert De Vriese, 2009-05-27 Rethinking Secularization Philosophy and the Prophecy of a Secular Age provides a philosophical appraisal of secularization in light of the recent re emergence of religion in the public sphere It explores the adequacy of classical theories of secularization and rooted in historical and conceptual analysis what might be offered in their place today Responding to the once dominant theories of a global world historical emancipation from an inherited religious past to a modern secular age the volume also considers the extent to which philosophy itself has inspired and nourished such prophecies As a result a more sophisticated view of secularization emerges both more interesting and complex than the simple linear process it is often thought to be From the conceptual origins of secularity in the writings of Saints Augustine and Thomas Aquinas to the contemporary secularization theories of Hans Blumenberg Marcel Gauchet and Charles Taylor Rethinking Secularization considers philosophy s own relationship to the concept of secularization It reflects the trend in contemporary philosophy to rethink the relation between religion and modernity and includes systematic contributions to the debate The book would appeal to a wide range of readers in philosophy sociology religious studies and intellectual history
