Science theories regard these quests as products of chance permutations. Religion and mysticism claim, on the other hand, that human origin, human purpose, of existence, and the future trajectory of human civilization had been predetermined by a supreme intelligence that would lead humankind to perfection and the attainment of holiness and heaven. Professor Philip Omoniyi Adetiloye's eureka experience and mental illumination during his doctoral research in the late seventies enabled him to discover the links among science, religion, and mysticism, which he has fully exposed in his ingenious books. After decades of more advanced research, he now offers his insightful revelations and new scientific theories on the origin, purpose, and possible future trajectory of humankind. His findings offer the long-sought paradigm shift that revealed the missing link between science and the spiritual. His insight has earned him various international recognitions as one of the foremost scientists of the twenty-first century and a living legend. His new science theories combine the thinking of the best human minds ever in science, religion, and philosophy. This

valid alternative to the Big Bang the LB FLINE BEC model of universal origins one that fulfills Einstein's prediction and meets Kuhn's criteria In fulfilling both predictions the new model reveals a plethora of impossibilities comprising the Big Bang myth while forming powerful arguments for relegating the Big Bang to the ashes of history The revolutionary model a macroscopic theory of everything is ideal for a microscopic Theory of Everything Thomas Huxley stated it best The microcosm repeats the macrocosm a connection placing science in a favorable position for attaining the long sought Theory of Everything As long as the Big Bang Accretion hypotheses remain in vogue comprehending universal origins and functions will remain impossible In sharp contrast the new model alternative opens floodgates to definitive evidence of universal origins and functions Why in the Big Bang perspective substantiated solutions to universal anomalies will always remain unattainable while in the LB FLINE BEC perspective substantiated solutions to universal anomalies are readily attainable Three simple and beautiful examples out of many The dynamic fiery geometrical spacing of planets in elliptical orbits Why Pluto was originally the tenth planet in our Solar System and now is the ninth planet Why extra solar systems are weirdly different from our geometrically spaced Solar System *Planet Dialectics* Wolfgang Sachs, 2015-03-12 All effects of human action will inevitably be played out within our planet's limits any hope of infinity is an illusion And yet as Wolfgang Sachs warned almost twenty years ago environmental concerns have been assimilated into the rhetoric dynamics and power structures of development This classic collection of trenchant and elegant explorations addresses the crisis of the Western world's relations with nature and social justice Examining the notions of efficiency speed globalization and development Sachs shows that sustainability truly conceived is incompatible with the worldwide rule of economism Planet Dialectics reveals that the Western development model is fundamentally at odds with both the quest for justice among the world's people and the aspiration to reconcile humanity and nature **NASA Authorization for Fiscal Year 1973, Hearings Before ...92-2, on S. 3094 ...** United States.
