Planning and Markets John Thomas Dunlop,1966 **Planning and Markets : Modern Trends in Various Economic Systems : a Conference ... Held at Nice, France, August 31 - September 7, 1966** nice Conference on planning and markets,1969 **PLANNING AND MARKETS- MODERN TRENDS IN VARIOUS ECONOMIC SYSTEMS- PRESENTED AT AN INTERNATIONAL ECONOMIC ASSOCIATION CONFERENCE.** , *The Economy and Politics of the Netherlands Since 1945* Richard Griffiths,2013-03-09 There is relatively little information on The Netherlands written in the English language which is easily accessible to social science students and even less which is systematically assembled between the covers of a single book This is unfortunate not only because The Netherlands is an important part of Western Europe but because the experience of The Netherlands in the way in which it has attempted to resolve the economic and political problems confronting it may help to shed valuable light on similar issues facing other European countries The contributions for this volume were chosen with these considerations in mind On the one hand the selection of topics was intended to provide an overall impression of the political and economic development of The Netherlands since the Second World War Thus separate chapters are devoted to an examination of economic development counter inflation energy regional and planning policies pressure groups electoral performance cabinet formation and colonial and European policies On the other hand these areas for investigation were chosen to invite specific contrast with the experience of other European nations or to illustrate certain problems of political or economic theory It is my pleasure to thank first of all the contributors themselves for the conscientious way in which they prepared their drafts which made my task as editor so much easier Secondly it will be apparent to even the most casual observer that I have contributed two chapters **Selected Essays on Economic Policy** G. Harcourt,2001-01-26 This volume contains classic essays on economic policy written by one of its great exponents The opening essay traces the author's evolving structures of thought about economics and the policy proposals that came from them over this period Section 2 contains essays which set the background to the policy recommendations In section 3 the role of investment incentives is analysed Section 4 is concerned with the influence of accounting conventions on private decision making and government policy in both capitalist and planned economies Section 5 contains a number of package deals all designed to fit within the constraint of the philosophy of governments in power The last section general essays ranges from a scheme for the payment of prisoners to the celebration of the views on policy of great economists from Colin Clark through Nicky Kaldor to John Cornwall **National Planning In The United States** David E. Wilson,2019-03-13 This annotated bibliography of more than 2 000 entries current through 1977 sheds light on the national planning idea as a substantive issue in past present and future U S public policy presents a bibliographic structure that suggests new emphases relationships and interdisciplinary approaches and makes more easily accessible to students a

Inclusive Economic Theory Ralph William (Bill)

Pfouts, Steven Rosefielde, 2014-11-27 The goal of Inclusive Economics is to tie together various authoritative strands of contemporary economic theory into an easily comprehensible whole that illuminates the need for a broader approach to contemporary economic policymaking undistorted by obsolete 18th century rationalist assumptions about utility ethics worthiness and traditional culture This is accomplished by elaborating the rationalist competitive ideal along the optimizing lines pioneered by Paul Samuelson neoclassical economics plumbing modifications necessitated by Herbert Simon's realist concepts of bounded rationality and satisficing refined further by applying a pragmatist outlook to probe the consequences of relaxing Enlightenment teleological ethical spiritual and cultural taboos The exercise will explain why competitive market economies guided by rational utility seeking invariably are less productive efficient just and beneficent than most theorists concede and will illuminate the full range of interventions needed to achieve better outcomes We call this program in its entirety Inclusive Economics including the integration of micro and macroeconomics *Catalog of Copyright Entries. McKenzie, 2009 A selection of papers by a pioneer in neoclassical economics that traces the development of his thought in three crucial areas *Globalization and the Decline of Social Reform* Gary Teeple, 2000-01-01 Globalization is the coming of the triumph of capitalism the growing ascendancy of economics over politics of corporate demands over public policy of private over public interest It represents the approaching completion of the capitalization of the world carried out by self generating capital in the form of transnational corporations within an increasingly coherent transnational regulatory regime Neo liberal policies at the national level argues the author represent the policy side of globalization the political requirements of global capital the harmonization of the national with the global They mark the transition between two eras from a world of national corporations and nation states to a world of transnational corporations and supranational regulatory agencies The author examines the postwar conditions that gave rise to the modern welfare state and the politics of social democracy throughout the industrial world He traces the transformation of these conditions in the 1970s with the coming of a computer based mode of production and the consequent necessity for global relations of production In the face of global assertions of the rights of corporate private property he makes the case that the world's subordinate classes and peoples will have to create global means of resistance **Crises in Europe in the Transatlantic Context** Bruno Dallago, John McGowan, 2015-01-30 The adoption and management of the common currency has led the Eurozone to a critical point This book analyzes in an interdisciplinary way the fundamental causes of distress making sure to relate economic issues to the social and political aspects of the problem The book explores the reasons why the Eurozone has fallen into a policy trap as well as what Europe did and should do to exit the crisis and why this is proving to be so difficult The book also considers what role the United States has played and could play to help foster a solution for

the Eurozone The main topics explored are the complex nature of the crisis the short circuit between policies and the given institutional architecture the controversial role of Germany and the importance of an active role of the US The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency
