Milton's Century Michael R. Collings, 2013-03-20 No artist creates his works in a vacuum Beyond the conscious influence of books read artwork seen minds probed through conversation or exchange of letters writers are in no small part products of everything that surrounds them people places things events MILTON S CENTURY is designed to place one particular genius John Milton arguably the finest poet the English nation perhaps even Western civilization has produced in the context of his time And what a remarkable time it was a century of revolutions of discoveries of literary and artistic efflorescence of religious turmoil and political turbulence of plagues and fires and ultimate rebuilding and of the first adumbrations of the Modern Age MILTON S CENTURY becomes vital and alive for twenty first century readers through the vast network of connections and interconnections that Professor Collings articulates Borgo Literary Guides No 15

On Close Reading John Guillory, 2025-01-08 John Guillory considers close reading within the larger history of reading and writing as cultural techniques At a time of debate about the future of English as a discipline and the fundamental methods of literary study few terms appear more

frequently than close reading now widely regarded as the core practice of literary study But what exactly is close reading and where did it come from Here John Guillory author of the acclaimed *Professing Criticism* takes up two puzzles First why did the New Critics who supposedly made close reading central to literary study so seldom use the term And second why have scholars not been better able to define close reading For Guillory these puzzles are intertwined The literary critics of the interwar period he argues weren't aiming to devise a method of reading at all These critics were most urgently concerned with establishing the judgment of literature on more rigorous grounds than previously obtained in criticism Guillory understands close reading as a technique a particular kind of methodical procedure that can be described but not prescribed and that is transmitted largely by demonstration and imitation Guillory's short book will be essential reading for all college teachers of literature An annotated bibliography curated by Scott Newstok provides a guide to key documents in the history of close reading along with valuable suggestions for further research
