Rival Hypotheses Schuyler W. Huck, Howard M. Sandler, 1979 **Companion Encyclopedia of Psychology** Andrew M. Colman, 2019-04-08 Psychology plays an increasingly important role in today's society. Its influence can be seen all around us, be it in the home, the workplace, the school, or our private lives. A uniquely diverse discipline, it ranges from social psychology to biological aspects of behaviour, and from basic research to the applied professions. This Companion Encyclopedia covers all these main branches of psychological research and professional practice. The thematic arrangement is the result of the Editor's extensive research into syllabi from which he distilled the 13 most frequently taught units. Students can consult and be referred to sections relating to their lecture programme and can find lucid definitions of frequently used terms in the Glossary. Headings and sub-headings are clearly highlighted at the beginning of each chapter, ideal for quick reference. Provides authoritative and in-depth reference material on all major branches of psychological research and professional practice. Contributors include many of the world's most eminent psychologists. Written in a lively style without assuming previous knowledge of the subject. Structured according to the core topics appearing most often as discrete modules in contemporary psychology courses. Detailed bibliographies, further reading sections, exhaustive index and glossary of technical terms. Containing 165 supporting illustrations. **Developing Research Questions** Patrick

Reading Empirical Research Studies John R. Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline
