Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability

assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student's knowledge and skills.

Primary Science Education Anne Forbes, 2023-06-15 *Primary Science Education A Teacher's Toolkit* is an accessible guide to primary science education and its effective practice in classrooms.

Teaching History and the Changing Nation State Robert Guyver, 2016-02-11 Capitalizing on the current movement in history education to nurture a set of shared methodologies and perspectives this text looks to break down some of the obstacles to transnational understanding in history focusing on pedagogy to embed democratic principles of inclusion, inquiry, multiple interpretations and freedom of expression. Four themes which are influencing the broadening of history education to a globalized community of practice run throughout: Teaching History and the Changing Nation State, pedagogy, democracy and dialogue, the nation, politics and transnational dimensions, landmarks with questions, shared histories, shared commemorations and re-evaluating past denials. The contributors use the same pedagogical language in a global debate about history teaching and learning to break down barriers to search for shared histories and mutual understanding. They explore contemporary topics including The Gallipoli Campaign in World War I, transformative approaches to a school history curriculum and the nature of federation.

Video-based Research in Education Lihua Xu, George Aranda, Wanty Widjaja, David Clarke, 2018-11-09 The rapid development of video technology in the last decade has changed the ways in which people communicate, how they learn and how research is done. Video technology offers rich potential in capturing complex social interactions over a prolonged period of time and in supporting teacher professional learning and development. This book explores the ontological, epistemological, methodological and ethical challenges associated with the different uses of video in research, ranging from video as a tool for investigating social interactions and for stimulating participants' reflection to the use of video for engaging varied communities and social groups in the process of teaching, learning and research. Each chapter presents the authors' critical reflection on the ways in which video was employed, the research decisions made, the methodological challenges faced and

the consequences for how educational practices were understood As such it illustrates a wide range of philosophical and theoretical standpoints with respect to video based research approaches This book will stimulate broad and rich discussion among education researchers who are interested in video research and contributes to advancing knowledge of the field developing approaches to dealing with emergent ethical theoretical and methodological issues and generating new protocols and guidelines for conducting video based research across a variety of disciplinary areas in education

Becoming a Teacher: Knowledge, Skills and Issues Maggie Clarke, Sharon Pittaway, 2014-04-23 Marsh's *Becoming a Teacher 6e* continues to offer pre service teachers a practical and user friendly guide to learning to teach that students find invaluable throughout their entire degree Marsh covers a comprehensive introduction to teaching methodology preparing pre service teachers for the challenges they face in a 21st century classroom All chapters in this new edition have been updated with new approaches and current references by the two new authors Maggie Clarke and Sharon Pittaway The approach in this 6th edition is more reflective and gives readers an even greater opportunity to interact with issues raised in the text

Resources in Education, 2001-10 *STEM Education in Primary Classrooms* Angela Fitzgerald, Carole Haeusler, Linda Pfeiffer, 2020-03-12 If you were to peer into a primary school classroom somewhere across Australia and New Zealand you would be forgiven for thinking that science technology engineering and mathematics STEM education is synonymous with coding and digital technologies However while these aspects are important technology alone does not reflect the broad learning opportunities afforded by STEM In countering this narrow approach *STEM Education in Primary Classrooms* offers a platform for research that innovates excites and challenges the status quo It provides educators with innovative and up to date research into how to meaningfully and authentically embed STEM into existing classroom practices It incorporates accurate explanations of STEM as an integrated approach to solving real world problems including social issues along with case studies and stories to bring practice to life in evidence informed ways This book showcases the impact of a broader approach to STEM in the primary classroom through Australian based and New Zealand based research that will challenge current teaching practices Thus this book will be of interest to pre and in service primary school teachers along with researchers and postgraduate students in the STEM education field

Teaching Secondary Science Geoff Woolcott, Robert Whannell, 2017-11-16 *Teaching Secondary Science Theory and Practice* provides a dynamic approach to preparing preservice science teachers for practice Divided into two parts theory and practice the text allows students to first become confident in the theory of teaching science before showing how this theory can be applied to practice through ideas for implementation such as sample lesson plans These examples span a variety of age levels and subject areas allowing preservice teachers to adapt each exercise to suit their needs when they enter the classroom Each chapter is supported by pedagogical features including learning objectives reflections scenarios key terms questions research topics and further readings Written by leading science education researchers from universities across Australia *Teaching Secondary Science* is a practical resource
