Mathematical Description Of Shape And Form:

The Mathematical Description of Shape and Form E. A. Lord, C. B. Wilson, 1986 *The Mathematical Description of Shape and Form* Eric A. Lord, C. B. Wilson, 1986 **The Mathematical Description of Shape and Form, by Eric A. Lord and C.B. Wilson** ,1984 **Mathematics of Shape Description** Pijush K. Ghosh, Koichiro Deguchi, 2009-03-04 Image processing problems are often not well defined because real images are contaminated with noise and other uncertain factors In Mathematics of Shape Description the authors take a mathematical approach to address these problems using the morphological and set theoretic approach to image processing and computer graphics by presenting a simple shape model using two basic shape operators called Minkowski addition and decomposition This book is ideal for professional researchers and engineers in Information Processing Image Measurement Shape Description Shape Representation and Computer Graphics Post graduate and advanced undergraduate students in pure and applied mathematics computer sciences robotics and engineering will also benefit from this book Key Features Explains the fundamental and advanced relationships between algebraic system and shape description through the set theoretic approach Promotes interaction of image processing geochronology and mathematics in the field of algebraic geometry Provides a shape description scheme that is a notational system for the shape of objects Offers a thorough and detailed discussion on the mathematical characteristics and significance of the Minkowski operators Mathematical Tools for Shape Analysis and Description Silvia Biasotti, Bianca Falcidieno, Daniela Giorgi, Michela Spagnuolo, 2022-06-01 This book is a guide for researchers and practitioners to the new frontiers of 3D shape analysis and the complex mathematical tools most methods rely on The target reader includes students researchers and professionals with an undergraduate mathematics background who wish to understand the mathematics behind shape analysis The authors begin with a quick review of basic concepts in geometry topology differential geometry and proceed to advanced notions of algebraic topology always keeping an eye on the application of the theory through examples of shape analysis methods such as 3D segmentation correspondence and retrieval A number of research solutions in the field come from advances in pure and applied mathematics as well as from the re reading of classical theories and their adaptation to the discrete setting In a world where disciplines fortunately have blurred boundaries the authors believe that this guide will help to bridge the distance between theory and practice Table of Contents Acknowledgments Figure Credits About this Book 3D Shape Analysis in a Nutshell Geometry Topology and Shape Representation Differential Geometry and Shape Analysis Spectral Methods for Shape Analysis Maps and Distances between Spaces Algebraic Topology and Topology Invariants Differential Topology and Shape Analysis Reeb Graphs Morse and Morse Smale Complexes Topological Persistence Beyond Geometry and Topology Resources Bibliography Authors Biographies **Shape Theory** J. M. Cordier, T. Porter, 2013-12-01 This in depth treatment uses shape theory as a case study to illustrate situations common to many areas of mathematics including the use of archetypal models as a basis for systems of approximations It offers students a unified and

consolidated presentation of extensive research from category theory shape theory and the study of topological algebras A short introduction to geometric shape explains specifics of the construction of the shape category and relates it to an abstract definition of shape theory Upon returning to the geometric base the text considers simplicial complexes and numerable covers in addition to Morita's form of shape theory Subsequent chapters explore B-nabou's theory of distributors the theory of exact squares Kan extensions the notion of a stable object and stability in an Abelian context The text concludes with a brief description of derived functors of the limit functor theory the concept that leads to movability and strong movability of systems and illustrations of the equivalence of strong movability and stability in many contexts **Mechanics**

of Microstructured Materials Helmut J. Böhm, 2014-05-04 The work deals with the thermomechanical mechanical behavior of microstructured materials which has attracted considerable interest from both the academic and the industrial research communities The past decade has witnessed major progress in the development of analytical as well as numerical modeling approaches and of experimental methods in this field Considerable research efforts have been aimed at obtaining microstructure property correlations and at studying the damage and failure behavior of microstructured materials The book combines an overview of important analytical and numerical modeling approaches in continuum micromechanics and is aimed at academic and industrial researchers such as materials scientists mechanical engineers and applied physicists who are working or planning to work in the field of mechanics of microstructured materials such as composites metals and ceramics

Curves and Surfaces in Computer Aided Geometric Design Fujio Yamaguchi, 2012-12-06 This book contains various types of mathematical descriptions of curves and surfaces such as Ferguson Coons Spline B-zier and B-spline curves and surfaces The materials are classified and arranged in a unified way so that beginners can easily understand the whole spectrum of parametric curves and surfaces This book will be useful to many researchers designers teachers and students who are working on curves and surfaces The book can be used as a textbook in computer aided design classes

Physics Of Living Matter: Space, Time And Information, The - Proceedings Of The 27th Solvay Conference On Physics David J Gross, Alexander Sevrin, Boris Shraiman, 2020-03-06 This book is indexed in Chemical Abstracts Service Ever since 1911 the Solvay Conferences have shaped modern physics The format is quite different from other conferences as the emphasis is placed on discussion The 27th edition held in October 2017 in Brussels and chaired by Boris Shraiman continued this tradition and addressed some of the most pressing open questions in the fields of biophysics gathering many of the leading figures working on a wide variety of profound problems The proceedings contain the rapporteur talks giving a broad overview with unique insights by distinguished renowned scientists These lectures cover the five sessions Intra cellular Structure and Dynamics Cell Behavior and Control Inter cellular Interactions and Patterns Morphogenesis Evolutionary dynamics In the Solvay tradition the proceedings also include the prepared comments to the rapporteur talks The discussions among the participants expert yet lively and sometimes contentious have been edited to retain their flavor and are

reproduced in full The reader is taken on a breathtaking ride through a fascinating field which is expanding rapidly and which was for the first time the subject of a Solvay Conference on Physics *Shape Understanding System - Knowledge Implementation and Learning* Zbigniew Les, Magdalena Les, 2012-07-27 This book presents the selected results of research on the further development of the shape understanding system SUS described in our previous book titled *Shape Understanding System the First Steps Toward the Visual Thinking Machines* This is the second book that presents the results of research in the area of thinking and understanding carried out by authors in the newly founded the Queen Jadwiga Research Institute of Understanding In this book the new term knowledge implementation is introduced to denote the new method of the meaningful learning in the context of machine understanding SUS ability to understand is related to the different categories of objects such as the category of visual objects the category of sensory objects and the category of text objects In this book new terms and concepts are introduced in order to describe and explain some issues connected with SUS development These terms are explained by referring to the content of our books and other our works rather than to existing literature in related areas of research This book raises many questions that are discussed in the area of cognitive science or philosophy of mind
